Senator Bourne Told Chamber of Commerce Showed Apparently Little Interest in Visit of Department's Special Agent.

OREGONIAN NEWS BUREAU, Washington, April 20.-Just as soon as Port-land offers the Department of Agricul-ture suitable quarters for a pure food

ture suitable quarters for a pure food laboratory, such laboratory will be estab-lished there. This positive assurance was today given to Senator Bourne by the Department of Agriculture officials who have the matter in hand. The Senator has long been insisting that this laboratory should be located at Port-land, and at his request a special agent or representative of the Department was sent to Portland to find accommodations. It was the original intention of the De-partment to have but one laboratory in It was the original intention of the De-partment to have but one laboratory in the Northwest, the chances favoring Se-attle: but Senator Bourne finally secured the promise that Portland should have a laboratory of its own. It is now "up to" the people of Portland to assist the Government in finding suitable quarters. Owing to the crowded condition of the Custom-House, it will be necessary to locate the laboratory in rented quarters. This the Government is willing to do, but its special representative had practically no assistance when recently in Portland. When he was unable to find suitable accommodations he left for Seattle. He reported that Collector Malcolm was ap-parently the only man seriously interest-ed in having a laboratory established in Portland. Portland.

In view of the promise he has secured. Senator Bourne believes it is now the part of the people of Portland to find quarters for the laboratory. He has done his part here. When the Government agent, after leaving Portland, went to Scattle, and through the co-operation there given him, soon found suitable quar-ters for a food laboratory in that city, the Department ordered its immedi-ate establishment. Had Portland been active, it, too, could have had the labora-tory at this time.

## Secretary Giltner Thought Labora-

Edmond C. Giltner, secretary of the Chamber of Commerce, and J. W. Balley, State Food and Dairy Commissioner, cannot account for the telegram from Senator Bourne. They think there must be some mistake, for it was generally understood here that the proposed food laboratory was practically assured for Professor Elton Folmer, official chem-

PUERTO CORTEZ, April 15, via Mobile, Ala. April 20.-(Special Corre-spondence of the Associated Press.)-On Sunday at 5 P. M. the Nicaraguan fleet sailed from Puerto Cortez, intending to take on board the Nicaragu-an force of about 1200 men, which had been landed at Truxillo, La Ceiba, Salada and Coast points. Monday, however, the steamer Omotepec returned to Puerto Cortez and disembarked to Puerto Cortez and disembarked about 500 men, and it is understood the entire force received orders to re

turn here. The reason for the return is the in-vasion by the allied forces of Salvador and President Bonilla, of the Western Departments of Copan, Gracias and In-tubucat. It is reported that Santa Rosa, the capital of the Department of Copan, was taken yesterday by these troops, and that forces are marching on Gracias and Esperenta. The force that captured Santa Rosa is now marching against Santa Barbara, and from there will move toward San Pe-dro, hence the Nicaraguan force will

be required to defend San Pedro. The result in the western depart-ments will depend upon the attitude of the men of Copan, Gracias and Intubucat, because 75 per cent of the fighting men of Honduras live in those departments.
