OUAKERS CAPTURE ATHLETIC HONORS

Intercollegiate Contests at Boston Series of Record-Breaking Events.

MICHIGAN CLOSE SECOND

Poor Old Harvard Trails Back in Rear, While Yale Gets Only Third Place in Tests of Brawn and Science.

BOSTON, June 1.—Five star athletes from the University of Pennsylvania won the Inter-Collegiate championship in the Harvard stadium today in what proved to be a series of wonderful athletic performances. Now intercollegiate figures were written in six of 13 events and one more record would have gone down, that of the high hurdles, had not the officials decided that the runners were too much favored by the wind.

Pennsylvania was given a splendid fight for first place by seven men from the University of Michigan, winning by only four points. The Pennsylvanians scored 32 to 25 for Michigan, winning by only four points. The Pennsylvanians scored 32 to 25 for Michigan, winning by only four points. The Pennsylvanians scored 32 to 25 for Michigan, winning by only four points, and Cornell fourth with 15 points; Princeton had 19; Syracuse 8 and Harvard 7.

Intercollegiate records were broken in the mile, the shot put, quarter mile, two miles, high jump and pole vault. OPPOSED BY ENGINEERS

Proposed License Law Does Not Meet Their Approval.

PORTLAND, June 1-(To the Editor.)-There appeared in an evening paper yesterday a communication from one J. D. Asher, of the National Association of Engineers, who seems very desirous of the passage of the engineera' license law. He states that this ordinance provides for four classes of engines, and if an employer desires a fourth-class engineer he can secure the services of one, which statement is utterly false and misleading, for if an employer has a first-class plant in operation under the provision of the ordinance he will be required to employ a first-class engineer and pay him wages accordingly.

Bovernment points out that the railroad men must be provided for and adds that the scale asked by the seamen is far in excess of the scheme for old age workmen's pensions, which the government has under consideration.

In order not to remain entirely passive, some of the navigation companies took action against the strikers today. Formal charges of desertion were made against hearly 900 officers, engineers, seamen and others who have abandoned their ships and under the decree of 1852 are subject to heavy penalties.

BUTTE, Mont., June 1.—Butte lost a accordingly.

Mr. Asher further states that there are point is entirely overlooked: What the city needs first of all is a boiler inspector such as most all Eastern cities have whose duties are to examine the differwhose duties are to examine the differ-ent bollers as to their safety and the amount of steam pressure which they may safety carry. Suppose an em-ployer has a boiler that is in a very had condition, and this measure should pass, what is the result? The engineer either has to operate the boiler in an umsafe condition or resign. But if we had a boiler inspector he would be notified and if the owner failed to make the necessary repairs he would be compelled to cease repairs he would be compelled to cease operation of the boiler, thus giving pro-tection to the engineer who would otheroperation of the bouler, thus giving pro-tection to the engineer who would other-wise have to shoulder the blame in case there should be an explosion.

The report of W. A. Powers, superin-tendent of boiler inspection of Brooklyn,

N.Y., is as follows:
"As a matter of comparison between
the different places in the United States
where there are inspection laws and
where no legal supervision exists, it will be noticed that casualties resulting from

be noticed that cusualties resulting from boller explosions, are as 1 to 100."

There seemed to be a concerted effort on the part of an organization of engi-neers in this city consisting of about 20 members to force this measure upon an unsuspecting public, in order that they may have the naming of the examining board to farther their interests. The at-tention of all voters and especially owners of steam plants is called to defeat this measure. By far the largest organization of engineers in this city, together with of engineers in this city, together with organized, labor are united to secure its defeat.

SEALING SCHOONER SEIZED British Craft Overhauled in Alaska

Waters by Revenue Cutter,

SEATTLE, Wash., June 1.—(Special.)

—A Sitka, Alaska, special tenight says:
The British sealing schooner seized
yesterday by the United States revenue

cutter Rush is the Carlotta C. Fox, of Victoria. She was captured 14 miles of the coast, north of 54:49, for illegal scaling in territory protected by treaty At the time of her capture the Car-lotta C. Fox had 70 skins aboard. Sev-

eral Japanese scalers were seen on the ground at the time, but they could not be restrained for the reason that there are no treaty provisions on scaling rights between the United States and

Japan.

Reports of the illegal sealing were brought to Sitka by Indians, and the Rush set out immediately. She was not long overtaking the sealers, who yielded without resistance. The Fox and her crew have been taken to Juneau for trial. If found guilty the craft will be confiscated.

PENSION FUND PLUNDERED

Government Helpless in Face of the Struggle, Having No Funds to Grant Demands-Prosecutions for Desertion Are Begun.

PARIS, June 1.- The strike of the officers, seamen and longshoremen at the ports of France, was extended to Dunkirk, Calais, Boulogge, Gravelines, Bordeaux and other ports which were not affected yesterday, and is now complete everywhere in France, Algeria and Tunis. Thus far the strike has only affected French ship-ping and foreign vessels at French ports are being unloaded. Unless an immediate settlement of the dispute takes place, many industries will be compelled to shut down and workmen in other branches of trade will be thrown into enforced idle-ness. The commercial interests are deouncing the so-called "tyranny of labor

No Means to Grant Pensions.

The position of the government is exemely difficult, as with the means at its disposal it is impossible to increase the pensions to the extent demanded. The Cabinet met today and considered the strike situation. The measures taken by the Minister of Marine to insure the dispatch of the mails to the colonies were approved and other measures were decided upon in case the strike is prolonged, but the nature of these measures was not announced. Isposal it is impossible to increase the

The cabin passengers who were to sall today from Havre for New York upon the French line steamer La Provence were sent to Cherbourg, where they embarked upon the St. Louis, of the American line. The French Transatiantic Company has arranged to forward the steerage passengers of the La Provence on vessels of the White Star Line sailing from South-amoton.

While Minister Thomson says he hopes the strikers will recognize the logic of facts and come to their senses," the gov-ernment seems to be almost helpless. The seamen's organization is making clear that it has no cause for complaint against the navigation captains and that the at-tack is against the government for an increase of the pensions of men of the mayal reserves to which nearly all the striking officers, engineers, seamen, long-shoremen and even the fishermen belong.

Pension Fund Was Robbed.

The justice of the claim of the seamen that successive French governments since Louis XIV have "borrowed" immense sums from the seamen's fund is rec-ognized, but the culprits cannot now be ognized, but the culprits cannot now be made to disgoge and with the means at the disposal of the treasury the minister of Marine says it is impossible to in-crease the minimum pensions to \$259 and \$300 for men and officers, respectively, as the seamen's organization demands. The government points out that the railroad men must be provided for and adds that
