HINT AT BOYCOTT MADE BY JAPAN

Meaning of Address by Chambers of Commerce to Americans.

RESENT BAD TREATMENT

Beneficial Results of Chinese Boycott on Reception of Travelers Used as Precedent for Policy of Japan.

WASHINGTON, June 29.—Reading between the lines of the statement issued by the Japanese Chambers of Commerce assembled at Tokyo, directed to President Roosevelt and also to the American Chambers of Commerce, officials in Washington see clearly the implied threat of a boycott against American goods entering Japan. The boycott delivered by Chinese merchants against American products two years ago in resentment of the treatment accorded Chinese of the better class entering America in the course of their travels around the world was productive of better conditions, for the Administration exerted all of its power to ameliorate the rigors of the exclusion laws and to facilitate the entry of Chinese merchants and students. Therefore, it is assumed the Japanese merchants have decided to have recourse to the same method of showing their resentment against the treatment accorded to their people in San Francisco. Unlike the Chinese merchants, however, they have first served notice of their intention upon the American commercial interests so as to afford them an opportunity to avert the boycott by bringing pressure to bear upon the merchants of the Pacific Coast, who supposedly in need of Eastern assistance.

APPEAL TO THE CHAMBERS

Chambers of Commerce of Japan Ask for Redress.

TOKIO, June 29.—At a joint meeting of five Chambers of Commerce here it was resolved to address the principal Chambers of Commerce in America as follows: "It has always been a matter of profound satisfaction to the people of Japan to witness the constant growth of cordial relations between our two countries and of our community interests in the field of trade and commerce, but since last year the people in a section of your country have unfortunately acted in a manner calculated to prejudice the legitimate rights of the Japanese people who have been frequently subjected to unjust and abusive treatment at the hands of a lawless element prevailing. The right of education has been denied them; their houses have repeatedly been attacked and their property destroyed without the least cause or provocation, with the result that not only have the treaty rights of the Japanese been wantonly disregarded, but their persons and property have also been exposed to serious danger. "It is to be extremely regretted that such unfortunate incidents should be allowed to occur so frequently, as it is feared that unless they are speedily stopped, the ill-feeling which our countrymen are now constrained to harbor for the people of a single section in America may eventually have an unhappy effect upon the development of the commercial relations of the two nations, for while the United States is a good customer for our natural products, Japan is also increasing her demand for American goods and promises to become one of the most important markets for your ever-expanding and prosperous industries. "Should the progress of trade and commerce between the two nations become obstructed as the result of the unwarrantable action of a small section of your population, the loss sustained by the two countries would be incalculable. "We therefore venture to address you and express our views on the situation, confident in the hope that they will be shared by you and that you will, considering the matter on the right principles of national intercourse and the mutual advantages of trade relations, do your best to speedily eliminate the present causes of discord and to insure our common prosperity for the future. The Chambers of Commerce have also addressed President Roosevelt as follows: "We have always watched with profound satisfaction the growth of the strength of the bonds of traditional friendship between America and Japan, coupled with the steady progress of the commerce between the two nations. It is therefore a source of deep regret and concern to learn of the actions frequently reported since last year of a section of the community in San Francisco against Japanese residents there, whose persons and property have thus been exposed to serious danger. While highly appreciating your unflinching efforts in the cause of justice, we humbly think that if such abuses are allowed to continue the development of commerce based upon the friendly relations of the two nations may be eventually retarded. "We, the undersigned, representatives of Chambers of Commerce, taking special interest in the promotion of our mutual economic relations, are unable to remain silent spectators of this state of affairs. We accordingly have addressed the principal Chambers of Commerce in America, inviting them to exert their best endeavors for the amelioration of the situation, relying at the same time upon your personality and wisdom for a speedy and satisfactory solution of existing difficulties, and we respectfully appeal to you for your friendly spirit."

JAPANESE POACHERS CAUGHT

Large Party Found on Pribiloff Islands by Cutter Perry.

SAN FRANCISCO, June 29.—The steamer Homer, Captain Donaldson, which arrived today from the Pribiloff Islands, brought word of the capture of 29 Japanese seal poachers at St. Paul's Island of the Pribiloff group by the United States revenue cutter Perry. The Japanese, each of whom was armed and provided with six rounds of ammunition, surrendered to the Government officers and were taken on board the schooner, which was towed by the Perry to Unalaska. No seals were found in the small boats and only 12 skins on the schooner. As the schooner was outside the three-mile limit and as no evidence of poaching in the way of skins was found in the boats, it was decided to give the Japanese another chance before confiscating the schooner.

Japanese Anger Again Boils

TOKIO, June 29.—Another serious report of anti-Japanese feeling in San Francisco has been received to the effect that the San Francisco authorities have placed an embargo on Japanese engaging in the business of intelligence agencies and have also taken licenses of every kind, thus preventing them from engaging in any other business than that of a purely commercial character. Should the report be confirmed, it will serve to confirm the belief here that the display of anti-Japanese feeling in that city is based on racial prejudice.
