

—right now is your opportunity to get a Buck's Range — we offer to send one on approval

--this ventilated, white enameled, sanitary oven makes roasts juicy and sweet--fresh heated oxygen is constantly brought in contact with the contents of the oven--prevents "drying out"--roasts in a Buck's oven lose but little in weight.

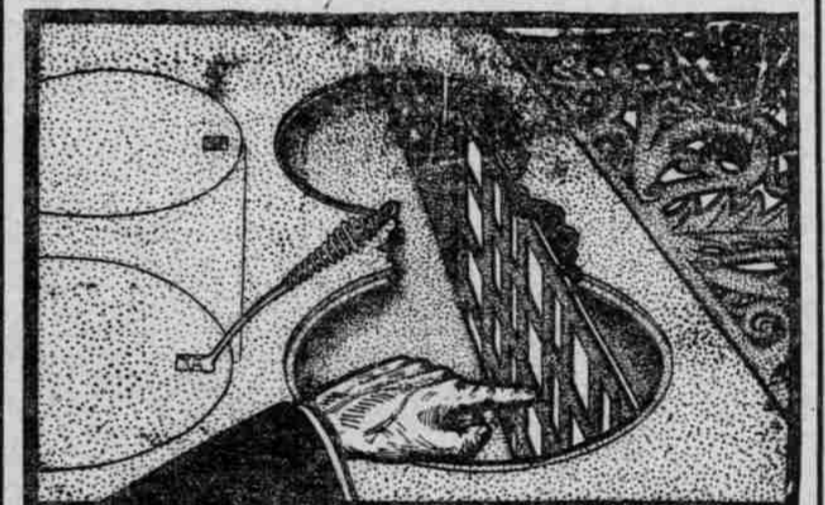

--we will install in your home on the approval terms mentioned below, any Buck's range shown on our sample floor.
--this extraordinary offer is made because of our faith in the superior qualities of these ranges, and through the recommendation of thousands of Portland people in whose homes the Buck's are giving satisfaction.

--if the range does not in every way fulfill its guarantee, we will cheerfully remove it and refund any payment that may have been made on it.

--this unusual range-buying opportunity is of importance to those who intend selecting a better—a more economical cooking apparatus.

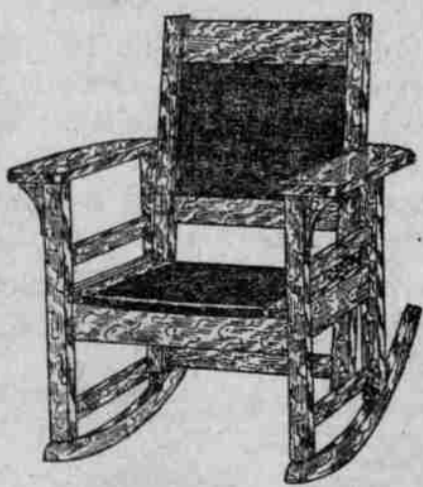

--let us show you the many advantages of Buck's.

--we will accept your old stove or range in exchange—for which we will give liberal allowance.

--in a Buck's Steel Range the heat-retaining asbestos is not glued or riveted on with washers, which hold but a short time, as in many ordinary ranges; but it is held permanently in place by a fret-work of iron securely bolted, so that it cannot bulge or become displaced through long use.
