QUESTION AS TO OUTCOME

Some Advise Reopening, but This Is Not Thought Feasible-Bickerings and Petty Jealousies Exist From the Opening Day.

NORFOLK, Va., Nov. 30.-(Special.)-The Jamestown Tercentennial closed tonight with the record of being one of the most complete failures in the history of expositions. Its debts form a total of 12,500,000.

The story of the flasco can be told in two words, mismanagement and carelessness. The funds were misdirected, the work was delayed, the officials were not in harmony because of petty lealousies and the publicity department was bungled. When the exposition opened. April 25, it was only about one third complete. The Government pier, which was advertised as one of the chief attractions, was not dedicated until September 10, and many other features were not in readiness until the doom of the Exposition had been sealed.

The attendance was miserable, the people would not come. There were only a few days during the fair when the attendance was more than 50,000. The State of North Carolina carried off the palm with an estiendance of 60,000 upon the day set apart for that commonwealth. Even Georgia brought more people than did the Old Dominion, whose early history the Fair commemorated.

## Attendance Very Low.

The average of attendance was between 30,000 and 50,000. The officials of the Fair complain that it was "knocked" to death. Others declared that the shiftlessness of the management deserved the criticism. It is certain that the opening day left many men who could have been of service to the enterprise in a disgruntled frame of mind. Many prominent visitors were ignored and had to shift for themselves, naturally taking the incident as a snub. Newspaper men, visiting and local, were unanimous in the feeling that they "had been handed a lemm." Even in the face of disaster many of

## Condition of the Finances.

The following table contains the esse tial facts in the financial status of the Exposition:
