SHOOTS ROBBER IN SACK Young Girl's Action Foils Plot of Desperate Thieves.

BUDAPEST, April 4.—(Special.)—A lonely farm on the estate of Count Karolyi has been the scene of an exciting encounter with armed robbers, who had conceived a daring plan for pillaging the house in the absence of its owner. Late in the evening a man carrying a huge sack and apparently almost exhausted knocked at the door of the farm and begged for a night's shelter. The only occupant of the house at the time was the farmer's young daughter, who, not liking the man's appearance, did not care about admitting him, but, at his earnest entreaty, allowed him to leave the sack and enter the house. The girl began to prepare the evening meal. While she was doing so a noise caused her to look around, and to her horror, she saw that the sack was moving as if some one were inside. Then the blade of a knife appeared, slowly cutting through the sack. Thoroughly terrified, she picked up her father's gun and fired, with the result that the movement stopped at once and blood commenced to ooze through the sack and onto the floor. The girl, now almost mad with alarm, fled from the house and went in search of help. After going some distance she met her father and told him what had happened, at which he obtained the assistance of two gendarmes and hurried home. The gendarmes specially cut open the sack and inside found the dark body of a man, armed with a revolver and a knife, which evidently had caused death. Suddenly from the sack a white, and, believing it was intended as a means of summoning accomplices, the police blew a series of whistles. Almost immediately three men ran up and, seeing themselves trapped, opened fire with revolvers. A desperate fight followed, the gendarmes using their revolvers. One of the robbers was shot dead and his two companions were captured.

PHOTOGRAPHS IN RELIEF Parisian Savant Opens New Field in the Art.

PARIS, April 4.—(Special.)—Professor Lippman, a French savant, has discovered a method for photographing pictures in relief. He has been devoting his attention to the matter for more than two years, and has now hit upon a method which he believes will be successful. The idea he says, came to him in connection with his observations on the eyes of insects, which consist of a number of cells, each of which is equivalent to a photographic camera. By covering a sensitive plate with a certain pigment, Indian ink, for example, the surface is divided up into an indefinite number of tiny cells, each of which receives its portion of the negative image, which is raised or lowered according to the impression received. The result is, therefore, that the millions of cells, more or less indented, represent a portrait or a landscape in relief. His observations on this subject are not yet completed, but he believes that the method will open a new field to photography.

TESTIMONY IS VALUELESS Councilmen Give No Help to Franchise Committee.

Mayor Lane's committee of Councilmen citizens, named by him to investigate conditions of franchise, met yesterday morning and was favored by the presence of several Councilmen who had changed their minds over night about testifying. Those who were present, Driscoll, Baker and Wallace. The latter was not summoned, but dropped in to see the fun. The session lasted two hours, and nothing of importance was secured from any witness. Councilman Annand declined, at first, to allow Mayor Lane to administer the oath, but later submitted, and obligingly said that he had no information on the subject under discussion, to wit, the underground cable question, for which Mayor Lane and his advisers recently spent \$25000, according to the declarations of Councilman Driscoll. The latter alleged the money should have been authorized by the Home Telephone Company. Mr. Driscoll, before his duty sworn, deplored and said that he had no information which he could give to the committee, and similar was the sum of the knowledge derived from the lengthy session, as far as the other Councilmen were concerned.
