

WILL MAKE SECOND CHOICE TO DECIDE

New Feature of Direct Primary Factor in Gubernatorial Nomination.

CONTEST IS FIVE-CORNERED

First Choice Candidate Must Secure 30,000 Votes. Politicians Estimate This Will Be a Difficult Mark to Reach.

OLYMPIA, Wash., April 25.—(Special.)—The candidate for the Republican nomination for Governor in the September primaries will have to mark about 30,000 votes in order to be the first choice of his party for the place.

The highest vote for a Republican candidate cast in the general election of 1904 was for F. W. Cushman, candidate for Congress who received 28,000 votes.

The highest Republican vote cast in 1904 was for Presidential electors, S. G. Cosgrove receiving 10,348. The vote on Presidential electors, however, is not considered a fair criterion as to the normal Republican vote, particularly in that year when sentiment in favor of the election of Roosevelt for President permeated other political parties in this state.

Expect Light Vote. Based on the returns of the last election and the growth of the state in the succeeding years, it is estimated that the normal Republican vote this year is about 100,000.

There are several contingencies to be considered in estimating the percentage of the vote that will be cast in the September primaries. One is the fact that the primaries occur in the midst of the harvest season in Eastern Washington when many voters will likely find it impossible to leave their farms to go to the polls.

For offices for which there are four or more candidates, the elector who votes to mark his second choice as well as his first choice will have his vote thrown out. A second choice and first choice vote must not be cast for the same candidate.

When all these contingencies are taken into consideration, the estimate of the Republican vote that will be counted in the September primaries is usually placed at about 70 to 75 per cent of the normal vote of the party. Some estimates go as low as 50 per cent.

Contest Sure to Be Close. When 75 per cent is taken as the basis, or 75,000 of the 100,000, if any candidate for Governor counts on getting 20,000 votes, he will have to admit that the combined vote of his four opponents will be but 45,000, or an average of 11,250 each.

Indications at this time, however, point to a close contest between at least two of the leading candidates. If the primary election should be held at this time, it is likely that Mead and McElrath would run quite close together. To concede either would mean that about 55,000 votes would be cast for the two candidates, leaving only 20,000 to be divided among three candidates.

Politicians who try to figure the thing out in advance almost invariably come to the conclusion that the successful candidate for Governor will not be chosen by first choice votes alone.

The second choice feature of the law is an elusive proposition for them in making pre-election estimates. It is the general theory, however, that if the contest, as is now indicated, results in an energetic fight between two leading candidates, that the supporters of either leading candidate will not cast their second choice votes for the other leading candidate.

May Place Third Man First. It is well within the range of probabilities that the second choice votes of both leading candidates will concentrate upon a third man, who will have sufficient first choice votes to make him the winner when his first and second choice votes are added.

After the second choice votes are taken into consideration, it is the candidate who has the plurality that succeeds to the nomination.

Somewhat similar conditions will exist as to nearly every other state office, except Supreme and Superior Court Judges and members of the Legislature, to whom the second choice provision does not apply. One result anticipated is that before the campaign is well along there will be just as much electorizing for second as for first choice votes.

FLINGS CHARGE AT GROSSCUP Milwaukee Official Says He Misstated Facts to Garfield.

TACOMA, Wash., April 25.—(Special.)—It is claimed that B. S. Grosscup is misrepresenting the facts in his Secretary Garfield regarding the Bedford tideland suit. Officials of the Chicago, Milwaukee & St. Paul deny that any agreement has been made with Grosscup or others prosecuting the Bedford tideland suit respecting the price the Milwaukee should pay for its terminal property in the event that the suit should be successful.

H. H. Field, general Western counsel for the Milwaukee, said today: "Mr. Grosscup has said nothing to me of an agreed price. He did not consult me as to the form of the action. I did not tell him that it was satisfactory. The only conversation I ever had with Mr. Grosscup respecting the suit dealt merely with a statement from him that the litigation affected our terminal property."

In his telegram to Secretary Garfield, Mr. Grosscup said: "Milwaukee officials here express themselves satisfied with the form of action begun. I consulted with them in advance. I have suggested to local officials of the road that with your ap-

Thurston County Republicans in Convention Declare for Taft for President.

OLYMPIA, Wash., April 25.—(Special.)—Thurston County Republicans in convention today elected 15 delegates and 16 alternates to the state convention, at Spokane, headed by G. S. Patton, who was a classmate of Mr. Taft. They also adopted a platform endorsing Mr. Taft for President.

John Rea, of Tacoma, was here in the interests of Jones to secure the adoption of an endorsement of Jones candidacy for Senator, while Deputy Internal Revenue Collector S. A. Madge came to try to fight the adoption of the pledge plank and to oppose Jones in the interests of Ankeny. Postmaster Castanough, of Olympia, and Rea also wanted Congressman Cushman endorsed as National delegate, but neither the Jones endorsement was presented.

Following the selection of the state delegates State Treasurer George G. Mills was chosen chairman of the delegation. He sent wire to Governor Mead, who is on his way East, telling of the Mead endorsement. This caught the Governor on the North Coast Limited in Montana and Mead sent the following reply:

"Message received. Fully appreciate and deeply grateful for endorsement of Thurston County Republicans. Direct primary on trial. Must avoid causing friction in party. Similar endorsement by state convention might be deemed unfair to my contestants for nomination and cause party discord. General endorsement of Republican policies by state convention satisfactory to me. Urge my friends to act accordingly as I desire perfect fairness toward all my competitors."

HISTORIC BUILDING BURNS

Four-Mile House Near Umatilla Was Well Known in Days of Stage.

PENDLETON, Or., April 25.—(Special.)—Four miles located in the Inland Empire, historic building in the Inland Empire, was burned to the ground today. It was located four miles east of the town of Umatilla on the Umatilla River and in the days of the stage-coach and freight-wagon was famed far and wide as a stopping place. The house was erected in 1867 by a Frenchman named Theodore, who conducted a saloon at the Umatilla landing while his wife conducted the road-house. The building has been used as a dwelling for many years. The origin of the fire is unknown.

SALOON ISSUE IN MARION

Lively Contest Expected Over Effort to Make County Dry.

SALEM, Or., April 25.—(Special.)—County Clerk R. D. Allen today completed checking upon the signatures on the Marion County local option petition and found the petition to be in due form and signed by several hundred more voters than the law requires. The saloon question will therefore be submitted to the voters of Marion County June 1. As there will be no fight on any of the county offices and there is no interest in any of the state contests except that for Senator, it is certain that the saloon question will be the center of much attention.

Albany Delights in Nickle Shows.

ALBANY, Or., April 25.—(Special.)—Albany is having an era of electric theaters. Its first entertainment institution of that kind was started here about two months ago and has proven very popular. Its success is probably responsible for another similar theater which is being fitted up on West First street and which will open next week. Now a third theater of that kind is in prospect and its promoter is looking for a satisfactory location.

Can use the same canvas, the same oils, the same brushes; but that does not mean their work will be worth the same. It's the expression of individuality, the note of art, that establishes the value. Same way with Chesterfield Clothes. If it were possible to get Suits cut from the same cloth, the cut wouldn't be the same, the making would be different, the art lacking. It's what you don't see about a suit of clothes that makes what you do see right. It's the way the garment is proportioned, the manner in which the needle-work is done, that produce the shape, the fit, and the swagger set of a suit. It's the art in matching the stripes and patterns exactly, and paying the price for the best tailors to do all this work in a scientific way, that makes Chesterfield Suits several notches better than any other makes. This all goes to make a suit cost more, but you must admit they're worth more than the difference in price.
