OREGON'S SCHOOL FUND

MR. GEER SAYS THAT HE DOES NOT GIVE TWO WHOOPS.

Indignantly Denies That He Is Responsible for Governor Chamberlain—Answers Mr. Buckley.

PENDELTON, Or., April 27.—(To the Editor.)—Again Mr. Buckley, whoever he is, burdens the Oregonian's columns with a complaint that I am individually responsible for the fact that the school fund of Oregon amounts to \$50,000,000 while that of Oregon is less than \$300,000,000. Of course, when a man gets so absurd a notion as this in his head no place short of a "bug house" will furnish him with an appropriate abiding place, but since his communications are admitted into the Oregonian's columns, it seems necessary to again notice what he says.

One of Mr. Buckley's fancies takes this shape: "In Mr. Geer's letter of April 8, he denies that the Governor ever sold an acre of land. I am well aware that it was the State Land Board that sold the land, but I do not see how he could be the dictator in that board while Governor." Now, in the language of the street, "Wouldn't that jar you?" In his insane desire to blame me for something he passes over the two other members of the land board and asserts that I was the dictator of the land board. How does he know? Where is his proof? The two other members of the board never told him so, neither did anybody else.

The Governor has no more to say as to what the land board does than any other member, and as to his being a dictator, he is as far from it as I am. He has never undertaken anything of the things he undertakes to talk about. At any time the State Land Board is in session, he can utterly ignore the views of the Governor and his action is absolute law. Everybody who has any knowledge of the action of the land board knows this. But, as I said in my former communication, if it is the action of the land board, it is those members who agreed to every decision made and every action taken by the board, and who were re-elected at the end of my term by enormous majorities? Why does Mr. Buckley blame me for the action of the land board and utterly effaced them from the slightest consideration of any and all land matters?

If Mr. Buckley will secure a statement from either Mr. Moore or Mr. Dunbar that in a single instance ever endeavored to act as a dictator in any matter that ever came before the board, I stand ready to make a great concession—I will admit that Mr. Buckley has gumption enough to come in out of the wet.

The fact is, Mr. Buckley evidently belongs to a little bunch of fellows who, at the end of my term as Governor, solely for the reason that I would not permit my administration to be a mere tool of their demands, combined to force me out, and used every conceivable little misrepresentation which would probably answer their purpose. Land matters were industriously worked in the scheme and while policies such as selling the state land for too small a sum, as was alleged, were entirely proper, the policy of the state was to sell the land as a whole, while the majority of the board was re-elected and no questions asked. Besides, there was never a protest from the people at any time that the lands were being sold at too low a figure. The Legislature never protested against it. The policy of the state has for 50 years been to sell land toward getting rid of its lands at any price, so they were sold. It has been a very short-sighted policy, to be sure, and while Governor, I drew the attention of the Legislature to this, but they had their mind set in force so long that no attention was paid to the matter.

The state receives two sections out of every township of 36 from the Government. The other 34 sections were sold on the market. The two sections belonging to the state were, and as the 34 sections were sold for a price, I was responsible for the state to enter the market in competition with purchasers with its price any higher than the market value. The Governor, however, was only after all the Government lands were on the market that the state could raise its price. Ever since that time, I have been able to understand this—though there are some who are not, and there who, not understanding the state's position, take their satisfaction in the indulgence of a coyote howl.

If the state should have saved its land, it has indeed been "frustrated away," but, Lord! I didn't do it! Mr. Buckley says: "Why was a member of the House, and Speaker of the House for one of these terms, a powerful position to change and to give a kind of school law, and law, but he did nothing?" Of course I was, but am the only man who has ever been in the Legislature, but not others. I was Speaker of the House? Where is the record of Thayer, Moody, Penney, Lord? Am I not the only man who has ever been Governor? And of course, having been Speaker of the House 17 years ago, all the accumulations of the allied shortcomings of all the past Speakers center on my shoulders. In 1891, there were McBride, Greig, Moore, Smith, Keagy, Reeder, Carter, Harris, each with the same responsibility in the matter, as I, but they are all lost to sight, in the eager delight of Mr. Buckley to make the impression that he is the only man who has served in the Legislature, or have been Speaker of the House. Geer and Greer alone, in responsible for that difference of \$45,000,000 between the school fund of Washington and that of Oregon.

But this blind venom has got in its delectable work. Mr. Buckley is a type of little soteria of managers who, unable to dictate policies and appointments during my administration, determined to undermine me in any and all ways that could be devised. They succeeded, through the varied sources of their influence, in doing this. In this sample of Mr. Buckley's leading on the subject of the school fund, I have seen the Governors, Speakers of the House, Trustees of the Senate, members of both Houses of the Legislature, and the Legislature, never had it is to be hoped that the investigators of it are satisfied. No greater act of injustice has been done to the school fund, but since many of these responsible for it have since had their own troubles, I am disposed to extend the mantle of charity and to suppress every symptom of malice.

is exercised in the selection of men to fill her office. Now, I do not seriously mind that deficiency of \$45,000,000 in the school fund, but the charge that I am responsible for Mr. Chamberlain in more than I can well endure. Not only that, but that I was in the first time, so it is charged, but after four years of private life, I have a legislative spirit in Oregon politics which put him to the good against Mr. Withycombe by some 2000 majority! Mr. Buckley's estimate that I was so bad a man that the people elected Mr. Chamberlain in preference to Mr. Furnish, a new man—white as Furnish's friends insisted, and some of them still so insist, that I was so popular with the people at the end of my term that I elected Mr. Chamberlain because I merely remained at home and said nothing. These are two versions by men who went out among the people against me, solely because I showed any political bias. I was not in the interest of the business men of our city and against the people, as Democrats, as against the regular Republican ticket. That was the basis of it all, but it has permanently had its desired effect. I did my duty and have paid the penalty.

I was not only the entire state government while I was Governor—nobody else has ever been criticized for anything—but my sine of omission reach back to the time of Whitaker in public affairs, and include every administration since that time, legislative and judicial—while I had not vetoed the Portland charter bill and fallen in line at that time the other members of the board would have been held responsible for their acts; that \$45,000,000 would have been divided between all the state administrators; different Speakers of the House would have been required to assume their portion of our lax school laws as to the time of land; and I would have been easily renominated and Mr. Chamberlain would never have been in Oregon politics.

But, as it is, the only thing of importance that has happened on the Pacific Coast since that event which has not been laid at my door was the San Francisco earthquake. How I escaped that constitutes the one wonder of the times. And when Mr. Buckley and his associates present themselves at the party gates for admission and are denied it by St. Peter, they will go their way shouting that I stand ready to make a great concession—I will admit that Mr. Buckley has gumption enough to come in out of the wet.
