### "Slender Effect" Corsets

The Spring fashions dictate a slender effect for the stylish figures. It is not necessary to BE slender-but to produce a slender appearance. And this depends solely on the corset you wear. We direct attention to the W. B. Reduso Corset, which has the great advantage of producing a slender figure for the stout as well as the slim woman. Second Floor.

W. B. Reduso Corset is the ideal corset for stout figures. It not alone restrains the tendency to overfleshiness, but it molds the overdeveloped proportions into those pleasing, graceful outlines hitherto thought to be attainable only by slighter figures; the corset is cut low under the arms, very long over hips and back, strong \$3.50 hose supporters at front and hips..... We are sole Portland agents.

W. B. Corset for the medium figure. This handsome model has high bust, deep hips, long back, garters front and sides, lace and ribbon trimmed. It is a splendid value

which we offer at \$1.00

A dainty W. B. girdle top corset, made for slender figure, with deep hips, gar-ters front and sides; exceptional value at

# **NEW FISH WARDEN**

Names List of Superintendents in Charge of Columbia Hatcheries.

#### WORK WITH GOVERNMENT

H. C. McAllister Selects Men of Long Experience in Federal Service. Will Also Make Several Changes in System.

Though in office but three weeks H. C. McAllister, Oregon's new Fish Warden, has reorganized the Columbia River hatcheries by appointing new superintendents. All are men of long experience in hatchery work. E. C. Freenman, who has been put in charge of the state's new Clackamas station, below the Cazadero dam, has the Fishery Service of the United States 10 years. J. A. Talbert, now in charge of the station on McKenzie River, was formerly in the state's service, until disagreement with H. G. him out. Mr. McAllister will probably put the proposed rearing station at ice 18 years, and established the rearing plant of R. D. Hume on Rogue River. A. J. Sprague, who has been employed by the Government in Alaska hatchery work, has been sent by Mr. McAllister to operate the Tillamook hatchery for three or four weeks.

The new Fish Warden has taken hold of the hatcheries with vigor and will enhas aimed to employ men who know the work and it will be noted that he is re-lying on the test of their fitness as proved National Government. This indicates that Mr. McAllister has adopted a new line of procedure—that of working in closer connection with the United States Bureau of Fisheries. by the service in the fishery work of the

#### Establish Rearing Plant.

Establish Rearing Plant.

There never was a cordial co-operation between Mr. Van Dusen and the Government men. Their lack of harmony seldom found expression on the outside, but they had little respect for each other's opinions. It is the belief of Government hatchery men that the rearing of infant salmon until they shall be large enough to escape predatory fish, will vastly add to the efficiency of the hatcheries. This dea was opposed by Mr. Van Dusen for a long time, until he felt compelled to give it a trial. This far the test by the state has not been conclusive. To carry out the rearing plan, a rearing plant will be established at Bonneville. Eggs for this station will be taken in Eagle and Tanner Creeks. It is likely that the state will turn over to the Government man the station at Cazadere and give over the Clackamas hatchery work completely to the National Government.

"Nursery" pends for infant salmon are now in operation at Salmon River, where 1,500,000 salmon fry are fed two tons of beef liver every week. Mr. Van Dusen fed at Cazadero until April, when he released 800,000 young salmon. He did not

leaned 80,000 young salmon. He did not keep them as long as he intended, and was compelled to stop work because the Portland Railway Light & Power Com-any shut off the supply of water,

#### Transfer to Bonneville.

Feeding is also carried on at Tillamook and Yaquina hatcheries. Late i nthe Fall this work will be done at Bonneville. At Cazadero the hatchery has 75,000 steel-head eggs and enough fish are there now to supply 500,000 steelhead eggs this year. Later in the season, this station will take a large quantity of chinook eggs. This state now buys the food for the infant fish, but after the present canning season this expense will be lopped off by food donations from the canners. The

food donations from the canners. The canners have promised to put up in cans the fish remnants of their canneries. This will make ideal food for the young salmon. The state will supply the cans.

Owing to the high cost of operating the Outario hatchery, it will probably be abandoned and hatchery work will be moved to the Wallowa plant. Mr. McAllister plans to get the parent fish of Snake River at Swan Falls, Idaho, if the Idaho authorities will give permission. Snake River at Swan Falls, Idaho, if the Idaho authorities will give permission. This will save the expense of building the retaining rack at Ontario every year. The Ontario hatchery is the biggest fish hatchery in the world. In 1962 it took 21,000,000 ergs. and in 1963, 25,000,000. Last year it obtained only \$42,000, and the year before, 2,149,000. It is thought that a considerable number of eggs can be obtained this year, however. The expense of maintenance and operation is so heavy, howtenance and operation is so heavy, how-ever, that the station will probably be

#### POLICE RAID FANTAN GAME

Capture Dozen Chinese Players, Despite Numerous Exits From Den.

den at 8 o'clock last night on the top floor of the building at 87 Second Arret, and caught 12 Chinese engaged in the game of fantan. Four detec-tives were required to cover the maze of exits built by the ingenious Celes-

of exits built by the ingenious Celestials and prevent the players from making their escape. Six doors were battered down and all the gambling pharaphernalia captured.

It was found that in planning means of escape, the Chinese had out passage ways through brick walls separating three different buildings, and by devious winding passages afforded intercommunication between Nos. \$3, \$5 and \$7. Second street, so that in case of a raid where the outside of No. \$7 was watched, the fleeing gamsters could calmly emerge to the aldewsik from the stores adjoining without exciting suspicion. In the route of one from the stores adjoining without exciting suspicion. In the route of one of the avenues of escape was a trapdoor through the floor, and its presence so artfully concealed as to be unnoticeable. This led to an exit through the store of Hop Yick Wo Company, 85 Second street. This same resort has been raided repeatedly by the police.
