Bulletin No. 6

TAXATION

The state and city taxes of the people of Portland are fair in comparison with the taxes charged by other cities in Oregon and other states. Portland has always been a city which has been governed with a view to the welfare and comfort of its citizens, and the taxes which are levied are for the necessary purposes of maintaining schools, police and fire protection, public parks, and other public improvements. Portland is a city which is progressive, and the taxpayers are proud of their city and are willing to pay the taxes necessary to maintain it in a proper state of repair and comfort.
