3RD SECTION BATTERY A IN ACTION

SEASIDE, Or., July 18.—(Special.)—Battery A, Field Artillery, Oregon National Guard of Portland, Oregon camped north of the old Seaside House, Tuesday afternoon, and during the week has engaged in its annual target practice. The battery is in command of Captain H. U. Welch, an officer of wide experience, ably assisted by First Lieutenants Lee M.

Clarke and Frank Randall, and Second Lieutenants John P. Krupke and George B. Otterstedt. The battery, consisting of 55 enlisted men, will continue target practice until the latter part of next week. The sanitary conditions of the camp as well as the wants of the sick have been assigned to a detail consisting of three men from the Hospital Corps of the Ore-

gon National Guard, in charge of Lieutenant Robert E. L. Holt. The detail of officers in charge is as follows: Lieutenant Clarke, ordnance officer; Lieutenant Randall, commissary officer; Lieutenant Otterstedt, officer of the day; Lieutenant Krupke, officer of the guard; Lieutenant Holt, sanitary officer. The equipment of Battery A naturally

is a source of pride to its officers. It consists of the latest model of field gun and a battery of four pieces, supplied with the latest devices for sighting and range-finding. The men are fitted out in khaki uniforms, cartridge belts and 3-caliber Colt revolvers, causing them frequently to be mistaken for the men of the regular Army.

CASE FOR PSYCHOLOGISTS

PRETTY GERMAN GIRL GUILTY OF FIENDISH MURDER.

Poisons and Shoots Riance After Committing Numerous Thefts and Forgeries—Mind Normal.

DRESDEN, July 18.—(Special.)—German psychologists are puzzled over the extraordinary case of Grete Beyer, the pretty, blue-eyed daughter of the late burgomaster of Freiberg, who is apparently quite sane, but has been convicted after confessing to deliberately murdering her fiancé and forging two wills and other documents. The girl has been sentenced to death, but a petition is being circulated for the commutation of the sentence. This extraordinary girl murdered her fiancé, Engineer Pressler, by mixing cyanide of potassium with a glass of cognac, and then made his death more certain by firing two revolver shots into his mouth as he lay unconscious. At her trial she coolly confessed how she committed the crime, but did not seem to feel the slightest remorse. She listened to the death sentence with the same calm composure she had shown during the trial. The mental experts under whose care she had been placed gave remarkable evidence of her behavior while in an asylum. She was not only absolutely normal in her bearing, but displayed an unusually bright intellect and even

evidence of humane feelings. No traces of hysteria, neurasthenia or epilepsy were to be found in her. The only explanation of her crimes is that she became the victim of an uncontrollable passion, a "brain storm." She had only become engaged to Pressler out of pique because of a quarrel with another man, Merker, whom she loved passionately, and to whom she handed over the money she had obtained by forgery and theft, but who betrayed her to the police. The whole case is one of the most sensational criminal dramas ever known in this country.

WILL NOT INCREASE MAELS

Penny Postage Between England and America Necessitates Few Changes.

LONDON, July 18.—(Special.)—It is believed at the general postoffice that, in view of the introduction of penny postage for letters to the United States, it will probably be necessary to make up mails for many more place there. The principal towns, such as New York, Chicago, Philadelphia, St. Louis and San Francisco, have direct bags made up for them, and this number will in all likelihood now be added to, places getting a direct bag, which formerly had their letters through a receiving office. At the same time, it is not anticipated that there will be any sensational increase immediately in the number of letters dispatched to America because of the change. What happened in the case of the reduction of postage to Canada and Australia and New Zealand is held to be tolerably conclusive on this point.

WEALTH IN MILL WASTE

DR. HAWLEY TO INVESTIGATE LOCAL POSSIBILITIES.

Government Expert Coming to Portland After Several Weeks' Work at Astoria.

ASTORIA, Or., July 18.—(Special.)—Dr. W. C. Hawley, the Government expert who has been on the Coast for several weeks making an investigation of the commercial value of the stumps and other waste from the logged-off lands, returned today from Everett, where he attended a convention called for the purpose of discussing the most feasible means of reclaiming logged-off lands. He says the meeting was largely attended and the consensus of opinion of those present appeared to be one of co-operation, that of forming large tracts into districts to be cleared under one contract, with either county or state backing. Dr. Hawley reports that the Agricultural Department of the Government has detailed Harry Thompson, who will have headquarters in Seattle, to make a special investigation of the logged-off lands. His first duties will be to gather all possible statistics regarding the acreage of these lands on the Coast, the character of soil, etc., and later he will look into the best and cheapest methods of doing the clearing. Dr. Hawley will leave tomorrow

COCKNEYS HATE MOTORBUS

Forced to Endure Tyranny Because Trolley Cars Excluded.

LONDON, July 18.—(Special.)—The patience of the people of London, which is almost American, has at last given out and they have raised a protest against the tyranny of the motor bus, but it is doubtful whether they will accomplish anything, at least for some time to come.

The simple fact is that people growl about motor buses, yet use them because they have practically no alternative. The horse buses are too slow for the 20th century and the Moderates strangle a sensible trolley service. The trolley car service is the only remedy against the drawbacks of the motor bus. Progressive municipalities here, as in America, have introduced trolley cars and are well satisfied, and only London, that always prides itself on lagging behind the times, is afflicted with motor buses. Tomorrow (Monday) will be positive. By the last day for discount on East Side gas bills. Portland Gas Co.

OLIVE WOODLARK OIL

GUARANTEE UNDER PURE-FOOD LAW

Woodlark brand of Olive Oil is the first pressing from choice, ripe, California Olives. It is of superior excellence and is

GUARANTEED ABSOLUTELY PURE

It's especially recommended for family use, being free from the rank, strong taste of some of the cheaper grades of oil. It imparts a pleasant, delicious flavor to salads that can't be surpassed by imported oils.

It's put up in four sizes and retails at 30¢, 50¢, 85¢ and \$3.50 per package.

See The Olive Oil Display in Our Washington Street Window

OPEN SUNDAY FROM 10 A. M. TO 2 P. M.

FOURTH AND WASHINGTON

ELECTRIC GUN IS LATEST

Fires 1200 Bullets a Minute Without Using Powder.

PARIS, July 18.—(Special.)—If we are to believe the Paris daily papers, the committee to which the inventions of military interest to the French government are usually submitted is about to conduct experiments with an electric quick-firing gun, for which wonderful things are claimed. The gun, it is stated, is capable of discharging 1200 projectiles a minute without the use of any powder or other explosive. The inventor is M. Pouteaux, a Dijon chemist and engineer. The new gun resembles the Maxim gun. It consists of an electric motor, a reservoir for bullets and a tube about six feet long and one-third of an inch in diameter, open at both ends. The bullets have no cartridges attached and consist simply of pieces of metal. They are lifted elec-

trically from the reservoir to the tube, on reaching which the "firing current" comes into play and hurls them from the tube. The discharge of bullets continues automatically until the reservoir is emptied. M. Pouteaux maintains great secrecy as to his invention and will only say at present that it is based on the utilization of polyphase currents of relatively high frequency.

Fallieres to Visit Spain.

LONDON, July 18.—(Special.)—Always a fervent admirer of the diplomatic methods of Edward VII, King Alfonso of Spain is desirous of emulating the example of his royal uncle-by-marriage, and entertaining President Fallieres in his own capital. Such a visit, which is now likely to take place before the end of the year, would at once put an end to the absurd rumors of differences between the French and Spanish governments on the subject of Morocco.

MAY SHUT OUT FLEETS

Visits of Foreign Warships Unwelcome in Norway.

LONDON, July 18.—(Special.)—On the occasion of the departure of the British Channel Fleet from Norway many of the newspapers expressed satisfaction at the visit and complimented the crews on their model behavior on shore. In political circles various opinions were expressed as to the wisdom of opening the closed harbors of Norway to large fleets, as has been done recently in the case of the German and the British naval visits. It is possible that a movement will be launched with the object of preventing the recurrence of such visits.

Dean Russell, of the University of Wisconsin, has selected Mrs. Scott Durand to lead the movement for effecting pure milk legislation.

GARLAND STOVES AND RANGES
The "Garland" Way

A Contrast
The Old Way Compared with the "Garland" Way.

The "Garland" Way

The above cut shows the position of the operator when using a Garland Elevated Oven and Broiler Gas Range. Note that when using the oven and broiler the operator is always in an upright position—no stooping or back-bending when you use the Garland Elevated Gas Range. We have the largest and most complete line of gas ranges shown in the City of Portland. Our gas ranges have a price range that will accommodate any purse.

Reliable Gas Plates
Tomorrow only we will again place on sale a lot of the celebrated "Reliable" Gas Plates. Every plate is up to the well-known "Reliable" quality in every respect.

One-burner Gas Plates, small size—Regular \$1.25, sale price...	\$1.05
Two-burner Gas Plates, small size—Regular \$1.75, sale price...	\$1.55
Three-burner Gas Plates, small size—Regular \$2.50, sale price...	\$2.25
One-burner Gas Plates, large size—Regular \$2.25, sale price...	\$1.95
Two-burner Gas Plates, large size—Regular \$3.00, sale price...	\$2.75
Three-burner Gas Plates, large size—Regular \$4.50, sale price...	\$3.95

"Garland" Independent Water Heater
(Double Copper Coil)

LAST LONGEST USE LEAST FUEL
Proven to be the most efficient and strongest Water Heater ever produced. Has cast-iron deflecting plate, extending down the center of the spiral coil, which becomes red-hot—not only helps to increase the efficiency of the heater, but retains the heat within the coil. The heater, which combines the latest improvements, will heat sufficient water for bath in ten minutes; will heat 30 gallons of water to 115 degrees in one hour, with the consumption of fifty feet of gas. Price... **\$16.00**

OTHERS AT \$7.00 AND \$11.00
