High Grade Watch Repairing

Bring us the watch that other watchmakers have failed to make correct time. We guarantee our work, so it costs you nothing if we do not make it run and keep time as the factory intended. We do not ask your work because we do it cheaper than elsewhere, but because we do it better. Every watch entrusted to us for repair is left in the hands of an expert. Moderate charges; money refunded if not satisfactory.

Clever Silk Dresses Worth \$25 for \$6.95

Jumper effects in women's one-piece Gowns of taffeta silk. Decidedly charming models, with yoke and sleeves of pretty lace. Constructed from good quality taffeta silk, in broken checks and in many shades. Just what you need to finish the Summer on, and selling at little more than one-fourth of their regular value. In fact, for much less than the material used in their construction is worth. We predict rapid sale at this extremely low price, and advise early buying. While they **\$6.95** last this lot of 50 goes, each, only.

New Models in Fall Suits

The early arrivals in Fall tailored costumes show decided tendencies toward mannish effects in both cut and fabric. Among the materials, stripes are largely featured, although plain colors are also popular. The long-skirted coat is once more high in favor; although this season's models show radical departures from those of former years. In the semi-dress or afternoon wear tailored gowns, trimmings are used freely; buttons, braid and silk being judiciously combined to form charming effects. Early in the season as it is, we have over 500 suits from which up-to-date buyers may choose.

Never in the history of this store have we been able to offer such splendid style goodness and such superb quality of material for so little money. Market conditions in the East enable us to buy this year on unusually favorable terms. We cordially invite style-seekers of Portland to call and inspect our assortment of **TAILORED SUITS** for early Fall. Always a larger style assortment and better values here than elsewhere.
