

### NEW HIGH SCHOOL FULL TO CAPACITY

#### East Side Institution Gains 250 Over Attendance of Last Year.

### WELL EQUIPPED FOR WORK

#### Scientific Methods of Training Are in Use, and Results Already Achieved—New Departments Added This Year.

Erected two years ago with the expectation that it would meet conditions for several years at least, the East Side High School during the past week had an attendance of 1063, whereas the capacity of the entire building is 1088. There is a direct gain of 250 students over the attendance of last year and there are 360 new students in the building. Few colleges have so large a body of students as can be found in the East Side High School, and certainly none is better equipped to afford a practical education—education of the head and the hand.

As one wanders through the wide, airy halls of this big building, there is nothing to indicate that back of the closed doors of the class rooms are more than 2000 young men and women, sitting themselves to the practical conditions of life; but the going rings and the heretofore silent halls become filled with young people passing from one period to another. It once happens to be caught in one of the wide halls, he will have some idea of what a football scrimmage is and will look for a protecting niche, or he may find himself pushed into the recitation room in a twinkling. Professor H. H. Herdman, the principal, has his office on the second floor and besides himself, the Board of Education has assembled a faculty gathered from the leading colleges of the country. Oregon schools being well represented.

#### New Departments.

Some new and important departments have been added. Full courses in manual training and domestic science have been established. Principal Herdman said he considered these courses of the greatest importance. Students graduate from these courses the same as from any of the other courses. In the manual training department there are 1088 terms, with mechanical drawing in them all. The first term begins with lettering, freehand dimensions, sketches from castings and mechanical objects, and as the student progresses he is introduced to advanced work in the shop, including molding and pattern-making, light forging and drawing and tempering, wood-working and cabinet work, brush and fine ironing tools, and finally architecture and design.

All the way through, there is shop work. In the basement are the wood shops, where are the lathes and band-saws, operated by electricity, where the student handles the tools in person and does things. Equipment in the manual training department is complete in every way and there is a large class. In connection with the manual training course are the usual literary studies, rounding out the student's education. E. Christensen is the shopman, who gives his entire time to instructions in the shops.

"We do not turn out finished carpenters and mechanics," said Professor Herdman, "but young men learn how to do things, and really are more competent than many workmen who are paid large wages. These young men learn to do things here."

#### School for Homemakers.

Then there comes the domestic science department, which is the most interesting and important in this big building, under Miss Lillian Tingle. Principal Herdman opens a class room door, and one sees a group of young women, with rosy cheeks, preparing food of all kinds, looking neat and dainty in their white aprons, the mothers and homemakers of the future.

"This department is full and overflowing," said Principal Herdman. "It was started as an experiment, but is no longer an experiment. It is a complete success."

Adjoining the kitchen, where the practical work is done, is the recitation or demonstration room, where the work is completed. Here, also, is a table where the students are taught how to serve the food. Students are taught the value of foods by chemical analysis, and how to do the people of Portland good if they could see these hearty, healthy and enthusiastic young women at work in this department, which is the best-equipped in the country.

In connection with the domestic science course there are full lines of literary studies, mathematics, science, history and English literature, drawing, nothing being left out that will round out a thoroughly educated home-maker. Principal Herdman is particularly enthusiastic over the remarkable success that has attended the establishment of this department. He regards it of equal importance to manual training. No more competent teacher could have been secured than Miss Tingle. No money has been spared in fitting up the manual training and domestic science departments.

#### Fine Laboratories.

While this is true the other laboratories in the buildings have also been finely equipped. Profiting by experience of skilled men the Board of Education spared no money in equipping the chemical laboratory. In this laboratory the air is kept sweet and pure by a two-horse power motor which drives out of the room all fumes of the chemicals used in experiments. Principal Herdman says that no college in the country has a better or more complete equipment in its chemical laboratory than the East Side High School. The lecture room adjoining the laboratory. Laboratories of the physics, geography and art have been fitted up without regard to cost. The art department under the charge of Professor Wentz is full of interest. In this department free-hand drawing from models is taught.

#### New Teachers.

Eleven new teachers have been added to the faculty and these are: Virgil Earle, of the University of Oregon, history and mathematics; V. E. Christensen, in charge of the shop; Miss E. Pearl Luokey, of University of Oregon, teacher of English; Miss Elvora McDonald, of Wellesley College, teacher of English; Miss Agnes Murdock, University of California, Latin and English; Miss Lillian Sabin, University of Oregon, history and English; Miss Cora Shaver, mathematics; Miss Cora Wolf, mathematics; Miss Winifred Yager, assistant art teacher; Arthur Yoder, recently of the Phillips High School, teacher of science; Miss Helen Mason, of Pacific University, German and English; J. E. Boudreghien,

head of department of physics; Miss Helen E. Cooper, University of California, Latin and English; W. A. Fenstermacher, Latin department. In temporary absence of Miss Gertrude Yager, head of the department of English, Miss Winifred Hayes, member of faculty, is doing the former's work in addition to her own.

#### Editors Are Elected.

The Lens is the East Side High School paper. At an assembly of the students held Tuesday of the past week editors and assistants were elected as follows: Editor-in-chief, Earle Robinson, son of County School Superintendent R. R. Robinson; assistant editor, Miss M. C. Oakes. There are 30 assistants covering the field of literature—prose, poetry, exchange, school notes, athletics and other matters of interest to the students. William Thurlow was elected business manager and Henry Abbott associate business manager. A committee of ten members of the faculty supervised the school publication and assists the editors in preparing copy. Then numbers are issued each year and the first will be published some time during the present month.

#### School Athletics.

Of course a great school like the East Side High School has athletics. George Frazier was elected manager of the football team and Anson Cornell captain. Rev. Paul Rader, an all-around athlete and member of Multnomah football team, is the head coach for the team. He has for his assistants two members of the faculty—Professor Fenstermacher, Princeton's former great halfback, and Professor Earle, formerly a tackle of the University of Oregon football team, considered one of the best all-around players in the country. Thirty stalwart, robust young fellows have come forward for practices under the direction of Dr. Paul Rader. "Just what we shall do to the other fellows," grimly remarked Principal Herdman, "perhaps it would be better wait until the season comes to a close to find out. It would probably be the part of wisdom to make no predictions at this time."

"But with the fine material at hand the coaches are likely to turn out a good team at least. For athletics in general, basketball, etc., arrangements have been made to use the gymnasium of the Haseloo-street Congregational Church. Dr. Rader, of the Haseloo-street Church, is very popular with the students, as he has been training them for the past year.

#### Literary Societies Organized.

There are two literary societies, the Euklineans, which is the young men's debating society, and the Phrenodikens, the young women's society. The Euklineans Society is arranging for public debates every Friday afternoon and the Phrenodikens society also will have its public functions. Officers of the Euklineans: President, A. K. Bradford, vice-president, G. Johnson; secretary, H. Bauer; treasurer, G. Shawcross; sergeant-at-arms, L. Parsell; editor, E. Hammond.

Officers of the Phrenodikens Society are as follows: President, Margaret Thomas; vice-president, Goldie Grison; secretary, Aileen Noren; assistant secretary, Edna Christman; treasurer, Mary O'Donnell; sergeant-at-arms, Norma Doble; editor, Mary Davis; critic, Claire Oakes. This society will hold its "at home" October 17. The Euklineans will give an entertainment in the near future to raise funds with which to provide sweaters for the football team. The entertainment will be a minstrel performance.

During vacation the building and grounds have been improved. Fire escapes have been erected at several

Professor H. H. Herdman, Principal of East Side High School.

places, and the grounds have been enclosed with a stone wall. On the whole the people of Portland have reason to feel proud of the East Side High School. The average taxpayer, perhaps, is not aware of the fact that it is one of the finest and best-equipped high schools in the Northwest. The hot teachers, which proved so popular last year, are continued and are a permanent feature. About 250 are provided with lunches daily.

### DELEGATES ARE ARRIVING

Every Section to Be Represented at Trans-Mississippi Congress.

SAN FRANCISCO, Oct. 2.—Many delegates to the Trans-Mississippi Congress, which will be in session here for three days, commencing October 6, have already arrived and are registered at headquarters and at the Board of Trade. From Albuquerque, where the National Irrigation Congress has been in session, fully 100 prominent members designated to attend both conventions, are expected to bring latest topics for discussion. Among the speakers will be the Governors of several Western states, university presidents and representatives of the United States and foreign governments. John Barron of Washington, with the title of Envoy Extraordinary and Minister Plenipotentiary, will convey greetings from representatives of all the Latin republics. In the 250 delegates expected to attend, every state and territory and every dependency of the United States will be represented.

### SUIT SALE TOMORROW.

Women's and Misses' new Fall suits in plain colors and stripes; coats trimmed with fancy braids and buttons; sported skirts; regular \$29 and \$25 values, on sale tomorrow (Monday) at \$12.75 each; \$9 high-grade sample suits, one of a kind, at 90c on the dollar. No extra charge for alterations. McAllen & McDonnell, Third and Morrison.

#### MANUFERS' MISTAKE; PEOPLE'S GAIN

\$25.00 Stock New Fall Style Shoes Labeled Incorrectly.

Admit mistake and order shoes sold. Bannister, Kneeland, Slater and Moral, 1235; women's \$1.50 and \$1 grade, \$2.40. Dollar, 2nd Morrison bet. 4th and 6th.

### REVIEW ITS WORK

Oregon W. C. T. U. to Observe Twenty-Fifth Anniversary.

### WILL OPEN ON WEDNESDAY

Leaders in White-Ribbon Movement From All Parts of State Will Attend Convention in Taylor-Street Church.

ADA WALLACE UNRUH.

The dainty silver-tinted programme proclaiming the 25th anniversary of the organization of the Oregon Women's Christian Temperance Union are now out and give promise of an unusually interesting session. The convention will be held in the Taylor-Street Methodist Episcopal Church, where Miss Willard organized the state union a quarter of

Mrs. Henrietta Brown, President of Oregon W. C. T. U.

a century ago. Mrs. Hester J. Shann, who was at the first convention and who has been the very efficient state treasurer for 30 years, will give the reminiscences, assisted by some of the veterans—Mrs. Hoxmer, Mrs. L. A. P. White and others who have done things in the making of W. C. T. U. history in Oregon.

The principal speaker of the convention will be Rev. Eugene St. John, from Kansas, and of National reputation. Mrs. St. John will speak on Thursday evening. The W. C. T. U. makes one of its most important lines of endeavor will be the training of men and women for temperance, so two evenings will be given to some phases of that work. Wednesday evening will be "Y. and L. L. L." night. To the initiated this means that the young women and the children's part in the reformation of the country will be under discussion. How to evolve temperance voters and educators will be the living theme, which will be presented by Mrs. Harford and Mrs. Unruh, who are specialists in these lines.

Friday evening will be, to some, the event of the convention. This will be the occasion of the diamond medal contest, in which a class of young men and women will compete in an oratorical contest for the possession of a beautiful diamond medal, which manifestly only one can win. It will be a good-natured contest, for as hard as it will be to believe, these contestants will be more anxious to make temperance sentiment than to win the medal. They will, however, work hard to win and in that we will be assured of a fine and entertaining programme.

Mrs. Henrietta Brown's president's annual address will be of an unusually fine character, reviewing the wonderful progress of the last 25 years, and giving the watch word for the coming months, fraught with such moment for the cause for which the white-ribboners have labored all these years.

The correspondence would lead us to believe that an unusually large delegation will be in attendance this year. Some are already in the city and many will come this week. The year is closing with great promise of a more than ordinary corps of workers for the new year. All sections will be open to the public and will have of interest to those who are at all in touch with any phase of reform work. The W. C. T. U. has initiated almost all of the modern movements carried on by women and in some form are still active in them.

If you have ever believed that the W. C. T. U. is not worth while, come to the convention and listen to the reports and discussions. Are you interested in the Audubon Society? Come in and hear of our mercy department. Do you think that child labor should claim the attention of women? Why, then, come and hear that we are and have been workers in this reform. Would you have wars to cease? Come when the peace department reports. Are you interested in the question of women? Why, then, come and hear that Edward Bok came to the W.

### INFLUENCE OF THE MOTHER

INTERESTING SUBJECT BEFORE HOME TRAINING CIRCLE.

Mount Tabor Mothers Hear Papers by Dr. J. A. Pettit and Mrs. French.

At a well-attended meeting of the Mount Tabor Home Training Circle, held in the West-avenue School, R. H. Tate presiding, the topic, "When Does a Mother's Influence Begin?" was discussed by Dr. J. A. Pettit and Mrs. F. H. French. Dr. Pettit spoke from the standpoint of a physician, and after discussing heredity and the opinion held concerning it, said:

"It appears more rational to accept the contention that proper environment improves the virtuous gifts and mitigates the sinful instincts of heredity, and the improper environment will surely blight a promising heritage and urge onward with terrific force the development of vicious traits. Obience is required to develop the good than to develop the bad instincts of a human mind, and I believe there is no human being without instincts both good and bad, either one of which may be brought out or smothered, but not eliminated by environment."

"But to come to the question, 'When Does a Mother's Influence Really Begin?' it certainly does not begin at the birth of her child, nor at a later period; it does not begin with her during the period of pregnancy. According to the theories of heredity, the beginning of her influence commences with her ancestors, generations back. To answer the question of the afternoon as shortly as possible, I would state that a mother's influence is actually begun during her own development, and the environments to which she is subjected. Further, her greatest degree of direct influence begins when she becomes a mother, reaches its greatest potentiality during the child's youthful career, and gradually declines thereafter. However, a good mother's influence never ceases, not even with the advent of death."

Mrs. F. H. French, speaking from a mother's standpoint, said:

"A mother's influence really never begins—it always is. The law which underlies true kindergarten work is the law that brings order and harmony in

Rev. Eugene St. John, who will speak at W. C. T. U. Anniversary.

the home and arrives at perfection in the child's character. We cannot hope to work out the whole plan of life at once, but we can, by proving the parts that come to us hourly, at least gain an idea of the perfection of universal and human activity as governed by the one law of life."

Mrs. French urged mothers to bring their influence to bear along the old-fashioned lines, as she termed them, of obedience, self-control, companionship and confidence.

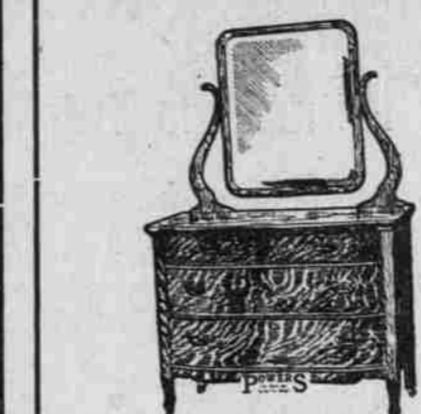

A kindergarten class of 13 was inaugurated under the auspices of the Circle, Miss Hatton, from St. Helens Hill, is teacher. All parents seemed enthusiastic over the class, and responded liberally with contributions. A new set of library books for mothers will be ready at the next meeting.

## Time to Get Your Home Ready For Comfortable Indoor Living

It's goodbye now to porch living. Indoors is the most comfortable place these chilly Fall evenings. Have you "fixed up" your home for this change in your manner of living? Is your living-room as comfortable and attractive as it might be? Or does some other room need brightening up a bit? Notwithstanding the fact that this is the beginning of a new season the goods we offer are right up to the moment in style and most desirable in every way

### Dressers

- No. 265-16: Printed oak Dresser with 17x17 diamond shape French bevel plate mirror, 24x28-inch top; value, \$15.00

on our educational way. Do you think the billboards need cleaning up? Do you think children's minds may be kept pure? Listen to our reports of purity in literature and art. Do you think women should be franchised? It would be well for you to find that we have carried on an educational campaign for woman's political liberation all of these years. In short come and hear the illuminating explanation of the "Do Everything Policy" of the W. C. T. U.

will open Monday night with great splendor. The rink has been remodeled and De Caprio will furnish the music. A clean, careful and healthful policy has been adopted and the Exposition rink will be a model amusement place. There are thousands of Portland people that enjoy the fascinating pastime and skating will be prominent among the Winter pastimes.

### RENT PIANOS

Why not rent a piano for a few months and then buy a Steinway, the greatest among pianos? The leading musicians in every community unite in praising the Steinway. The leading artists of international reputation endorse it as the best among pianos. Investigate our "Money Saving" plan. Strictly one price. The workingman pays no more than the capitalist. All factory cost, plus freight and handling expenses. This is just and right. "The Home of Dependable Pianos."

PIANOS FOR RENT, Sixth and Morrison, Opp. Postoffice.

### Japan's Rice Crop Increases.

NEW YORK, Oct. 3.—The following cablegram was received yesterday from Japan by Yeihiro One, superintendent of agencies of the Bank of Japan:

"According to the report of the Department of Agriculture and Commerce at the end of September, the estimate of the rice crop this year is 52,000,000 koku, or 260,000,000 bushels. This is an increase of 5.1 per cent, compared with the amount of the actual crop of last year, and an increase of 15.2 per cent, compared with the average crop. Foreign exports continued to exceed the imports throughout September. The money market is quiet."

### Sherman, Clay & Co.

PIANOS FOR RENT, Sixth and Morrison, Opp. Postoffice.

### Exposition Rink Opens Monday.

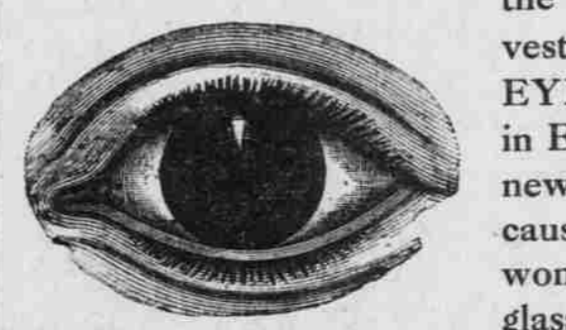

After being closed for the Summer season, the Exposition skating rink

## DR. E. M. DALLAS

### OPTICIAN

Has returned from Europe, where, for the past six months, he has been investigating the different methods of EYE TESTING by prominent opticians in England, France and Germany. The new WIESBADEN METHOD which caused so much talk in Europe, is a wonderful science in finding the correct glasses to be worn by the patient.

QUICK, ACCURATE and ABSOLUTELY CORRECT, this method will be used by Dr. Dallas in all his cases from now on, saving a great deal of time to patient and optician. The doctor wishes to thank all his customers and friends for the confidence they have shown in Dr. Keene and Dr. Walker during his absence in Europe, and from now on, will take entire charge of office, during usual hours, 9 A. M. till 6 P. M.
