The STEINWAY

The Piano of Today and the Future

Piano history shows that Steinway leadership has continued without a break up to the present hour. Every feature of constructive importance introduced into pianos within the last twenty years is a STEINWAY invention.

Today STEINWAY genius and the splendid STEINWAY organization, working through the most complete piano factory in the world, are making the finest piano ever produced.

The STEINWAY is today readily distinguished from all other pianos—as it has ever been. Its tone is the ideal of the musical world and the despair of other makers.

The STEINWAY is, throughout all civilized countries, the natural choice of the sincere musician. It is also the selection of the investor who has an eye to the future.
