

SHIRTWAIST OFFERINGS OF THIS SPRING MORE ATTRACTIVE THAN FOR YEARS

Garments for Warm Weather Wear, Now Coming Into Demand, Are Along Unusually Dainty and Graceful Lines.

NOT for several seasons have the Spring and early Summer shirtwaist offerings been so daintily attractive as those now being displayed in the local shop windows, and several distinctive new features lend a pretty and graceful style to the several varieties from which the shopper may choose to fill or replenish her up-to-date "shirtwaist box."

The "Dutch neck" and attractive variations thereof, being announced as one of the "leaders" of the season, and this cool, comfortable effect, pretty and becoming as well, is also given by the popular "turn-down" collar, which is one of the dainty new accessories.

A pretty "Dutch neck" waist is shown in No. 2, the material being fine linen with embroidered edging. A dainty gimp is adjusted in the neck in case one does not wish to wear it so low cut. As an accessory to this style of low cut "Dutch neck," some of the department stores are selling little "dickies" of embroidery or lace to match the waist.

A charming round neck waist is shown in No. 4. This is of fine chambray in rose pink, with embroidery in white, the pattern being worked on bands of the pink chambray. The long, graceful sleeves still continue, and are predicted as the popular sleeve even of Summer, although it remains to be seen whether it will endure through the warm weather.

Several rows of three horizontal tucks, as sketched in this number, are one of the new features in sleeves. An attractive waist in tan and brown is sketched in No. 1, the design being made up of bias strips of a novelty pattern of muslin, having a brown ground with stripes of tan dotted with brown. The smart stiff collar and brown bow worn with this waist is one of the popular accessories of the season for wear with the tailored or simple styles of waist.

A type of the more fanciful accessory in neckwear, is sketched in No. 2, a jabot of plaited sheer materials, edged with fine lace, and a wide variety of filled "tabs" are among the neckwear offerings. Some of the new ideas are shown in Nos. 2, 10 and 11, a simple yet effective collar and cuff set being sketched in No. 8. No. 7 shows a novel yet attractive style of collar with cuffs and collar of blue, embroidered in white linen. This type of waist is ideally practical and comfortable for the business woman or office girl or indoor wear during the warm weather.

Of a pretty pattern in gray-blue checks is the natty waist shown in No. 6. A dressy effect is given this other, with plain design by the attached gimp of soft white lace with dainty "turn-over" and smart little satin bow. Six large pearl buttons finish the two tabs

down the front, and the waist opens with invisible buttons, down the back. A smart little waist for wear with the popular gray cloth skirt is sketched in No. 5. The body is of a soft wash material in a pretty gray tone, the deep collar pieces are of gray wash silk, and the trim of lace is of dainty cream, matching the gimp and neck trim. Bow tie and cuffs are also of the gray silk.

Government Supplies Printed Guides as to Food Elements

BY LILLIAN FINOLE.
Answers to Correspondents.
GETTOLD OF a book, magazine or article that tells about the various food elements and their value; also that will tell approximately the food elements in all common foods and in what proportion; also about what is the perfect food, how the elements should balance up at the end of a week or month—so many per cent of one and so much of another. If you know of anything in print that will give this, the more condensed the better, I will send you a dollar. Write to me.

You will find a good deal of condensed helpful information and analysis of the common food materials in Farmers' Bulletin, No. 142, "Principles of Nutrition and Nutritive Value of Food." At the same time, the Department of Agriculture, Washington, D. C., No. 93, "Sugar as Food," Abel; No. 74, "Milk as Food," No. 34, "Meats, Composition and Cooking," No. 182, "Poultry as Food," No. 128, "Eggs and Their Use as Food," No. 121, "Beans, Peas and Other Legumes as Food," and No. 85, "Fish as Food," would all prove useful and could be obtained at the same time.

Or books on elementary dietetics I think "Food and Dietetics," Norton, published by the American School of Home Economics, Chicago, or "Human Food," Snyder, published by Macmillan, will be most suited to your needs. Each of these books contains lists of references work in dietetics. I am sending by mail a small domestic science bibliography which may also be of interest.

Portland, Or., May 5, 1909.—May I trouble you for a recipe for cream soup? I am looking for a recipe for cream soup.

Your article in the Oregonian—C. B. O. All cream soups are essentially combinations of white sauce with vegetable fish or meat stock or pulp, thinned to suitable consistency with milk, cream or stock. Accessory flavoring is used, but one main material and flavor predominates and gives its name to the soup. A garnish may be added—usually a few choice morsels of the main ingredient, serving as a sort of label to the soup.

The necessary factors in cream soups are therefore: (1) The foundation, for example, asparagus. (2) Supplementary

flavoring—a morsel of onion, a few peppercorns or similar adjuncts. (3) Some fat—butter, bacon fat or drippings. (4) Liquid—water, stock or milk. (5) Some binding material to prevent the separation of the pulp and liquid. This may be flour or cornstarch mixed in milk or roux—a mixture of flour and fat, or sago, or rice flour, or egg yolks. (6) Occasionally some coloring material, as for instance, a few leaves of spinach to give a greenish tinge to green pea, asparagus or lettuce cream soup.

The following is a typical recipe: One bunch asparagus; 1 slice onion; 10 peppercorns; a bit of bayleaf about 1 1/2 inch square (if liked); 2 tablespoons butter; 2 tablespoons flour; 2 cups water; 2 cups milk; six spinach leaves; (optional) final seasoning of salt, white pepper, speck or the other flavor. That, no doubt, was very much the case away back in the days of the ancients. But we are not now far safer protected by the state, and

pieces, place in a pan with the onion, peppercorns, etc., and sprigged leaves. Let cook five or ten minutes, with the lid on, to draw out the flavor. This process, known as "sweating," greatly improves the flavor of all soups with a vegetable basis. Care is, however, needed to prevent browning, which will spoil both color and flavor. Cover with water or better, white stock, and simmer until the asparagus is tender. Reserve a suitable number of the choice tips for garnishing. Rub the remainder through a sieve, using a wooden spoon. The woody fiber will, of course, remain in the sieve. Meanwhile have the milk heating in a double boiler, thicken it with the flour, being careful to cook this with the flour, and give it a final seasoning. Do not boil after combining the two parts or the mixture may curdle. Season to taste, but be careful not to overpower the delicate asparagus flavor which the seasonings are intended merely to brighten. If the water evaporates very quickly and the little morsels so as to give a suitable consistency—that of cream, not of thick sauce.

For a very rich soup part cream may be used instead of milk, only for a white sauce part; or one or more egg yolks may be added. Egg yolks are added after the starch thickening is cooked. Care must be taken not to overheat them.

Any vegetable soup can be made by a similar method. A useful guiding formula is about two cups vegetable puree or liquid to two cups white sauce. A good and very economical asparagus soup can be made from the tough stalks the tips of which have been served in some other form, and the water in which those tips were cooked. A few tips should be saved for garnish. The general method given above should be followed.

Asparagus puree, made similarly, but without milk, and thickened with a little cornstarch or egg yolk is also quite acceptable. A few more drops of lemon juice may be added to this if liked, as there is no fear of curdling, unless through overcooking. A sprig of mint or parsley may be used as an accessory flavor.

A mixture of asparagus, green peas, and cucumber, being careful to cook this with the thickened milk and give it a final seasoning. Use the fresh pods of green peas as well as the peas themselves, thus obtaining extra color and flavor.

PERFECT STYLE AND COMFORT IN Nemo CORSETS THE NEMO NEW AMERICAN SHAPE

BULLETIN No. 3

THE new long Nemo models make a stout figure fashionably slender and a slight form really sylph-like.

They produce extreme reduction of back and hips with absolute comfort and hygienic safety, because abdomen and internal organs are firmly supported from underneath.

No other corset can produce extreme reduction without extreme discomfort—and extreme danger.

Nemo No. 405 is the greatest corset success of the age. For slender, medium or stout figures, in sizes from 19 up—\$4.00. And No. 320 is another great favorite—\$3.50.

Self-Reducing Corsets IN TWELVE MODELS

A Fit For Every Stout Figure \$3.50, \$4.00, \$5 and \$10

In Good Stores Everywhere KOPS BROS., Manufacturers, NEW YORK

San Francisco Office, 154 Sutter St.

lax, and the courts, as had as some may think, to be, that the people were in those times when they had to secure their supplies by hiding them away in some almost inaccessible cliff in a mountain. One must acknowledge that a man is really a coward when he is in a position of danger, and that a man is really a coward when he is in a position of danger, and that a man is really a coward when he is in a position of danger.

Why should nations lead themselves to the limit of their carrying capacity, with the risk of ruin, when they can secure their supplies by hiding them away in some almost inaccessible cliff in a mountain. One must acknowledge that a man is really a coward when he is in a position of danger, and that a man is really a coward when he is in a position of danger.

There are many people who are beginning to question and wonder if the deepest root of the whole war-matter does not reach into the very life-time of the race, and that the whole war-matter does not reach into the very life-time of the race, and that the whole war-matter does not reach into the very life-time of the race.
