THE STATUE ON THE DOME
It is "Armed Liberty," and Stands as Jefferson Davis Fixed It.

Washington (D. C.) Post.

Armed Liberty, the magnificent statue that crowns the dome of the Capitol, is by far the most symbolic of all the statues in Washington, D. C. Beautiful and reposeful, yet with an air of vigilance, it is perhaps the least appreciated of the city's statues, possibly because of its being placed at such an altitude that it cannot easily be studied. The original plans of the statue, comparatively few people know the real name of the statue.

Seeking this information, a Post reporter interrogated a number of persons whose daily occupations keep them almost constantly beneath the shadow of the great statue. To the question, "What is the name of the statue above the dome of the building?" came these widely different opinions:

"The name of that statue? Why, it's the Goddess of Freedom."

"Yes, I can tell you the name. It is the Goddess of Liberty."

Several declared it to be the statue of Independence. Others said, "It is an Indian woman."

"It is the God of Justice and Freedom," declared a portly man in a tone that defied questioning.

"I think you can find some book on statues that will tell you all you want to know. It is a woman, I am sure, so look for the female statues."

A younger member of the House replied to the question about the statue, most suavely and confidently: "It is the God of Progress; you know his name." Several of the colored men in the various parts of the building were nearly all quite sure it was the Goddess of Freedom. One of them knew the year, 1863, when it was placed above the dome, and he affirmed: "It is the Goddess of American Liberty before the war."

"You want to know the name of that statue? Well, just wait a minute, and I will get it for you first hand, and a most accommodating guide passed into the Senate chamber. Directly he returned:

"That is a statue of Pocahontas." Every one had a different name for the statue, not one giving the real name, Armed Liberty.

One who always tries his best to help others said: "Now all statues, as you know, bear the names of the people they represent, and if you will just step over to the library of Congress I think you can find some book on statues that will tell you all you want to know. It is a woman, I am sure, so look for the female statues."

The statue was modeled by Thomas Crawford, father of the novelist, the late F. Marion Crawford. It was cast at a Maryland foundry. Jefferson Davis was Secretary of War when the model was first presented in the War Department. The statue then wore a liberty cap and carried a bundle of rods. Davis objected to the liberty cap as being emblematic of emancipated slaves, while Americans were fresh born. He also thought the bundle of rods, suggesting the functions of the Roman dictator, had lost its symbolic character. Because of these criticisms of Secretary Davis the model was changed, and "Armed Liberty" was evolved.

The statue is nine feet six inches tall and weighs 14,985 pounds. It was put in place on December 2, 1862. The head is thrown back and adorned with eagle's beak and plumes. The right hand rests on a sword and the left holds an olive branch and a shield. The mantle is gracefully draped and is held by a brooch, bearing "U. S." on its face. The helmet is encircled with stars. The supporting globe bears the legend, "E Pluribus Unum."
