NON-FADING CURTAIN MATERIALS

Until recently, manufacturers of curtain materials have been unable to produce fabrics that in color could withstand the severest test of sun and water. We have lately received a stock of new curtain materials that are guaranteed absolutely fast. These are 50 inches wide and in many different weaves—all light weight and shown in various shades of gold, pink, blue, brown, tan and green. They are suitable for front door and side-light curtains, sleeping-room windows, bed drapery, etc., and range in price from 75c to \$2 yard.

**For the Dining-Room no style
of Furniture so thoroughly
adaptable as "Quaint Furniture"**

Its restful influence, its artistic simplicity and its adaptability for this much-used room in the home, has placed it in favor with those who prefer furniture that is practical and homelike. The fumed oak has proven to be the most popular finish yet produced in the quaint designs, and it is entirely in

this that we show our most complete gathering of the various dining-room pieces. The buffets, china cabinets and serving tables display the massive and quaint features that characterize the style. The hand-wrought copper and brass trimmings add no little to the quaint artistic beauty of the pieces on which they are used. In the dining tables and chairs the same characteristic features are preserved without sacrificing comfort. You will find in our line the range for pleasing selection—in both price and design.
