PICTURES AND PERSONAL ITEMS ABOUT WOMEN WHO ARE BEFORE PUBLIC GAZE

EW YORK, June 19 .- (Special.)-Rumor says that Mrs. Smith Hollins Kim will surely marry Alfred Vanderbilt as soon as she obtains a divorce, Mrs. McKim was Margaret Emerson, daughter of Baltimore's multimillionairo, Captain Isano Emerson. Her social conquests have interested two continents. Last year she was the senof Newport. For this season she has taken the Newport villa of Henry White, our Ambassador to France. It is nearby "Harborview," the extensive Newport estate of Elsie French Vanderorced wife of Alfred Vander bilt, the divorced wife of Alfred Vander-bilt, who is now traveling abroad. Mrs. Elsie Vanderbilt suddenly changed her plans and decided not to return to New-port until the end of the Summer season.

The latest Angio-American alliance is that of Miss Ida M. Wynne, whose engagement to Lieutenant Hugh Renald French is announced. Miss Wynne is the second daughter of Robert J. Wynne, who has been Consul-General at London for some years and was at one time Postmaster-General. Mr. French is a First Lieutenant in the Seventh (Princeas Reyal) Dragoons. He belongs to the old Itish family of which Lord de Freyne is the head. The family is wealthy, the Lieutenant having a large private income. Miss Wynne spent most of last Winter in Washington, where she was much admired. She is pletured in the presentation gown which she wore at Buckingham Palace when she was presented to the King. Buckingham sented to the King.

Geraldine Farrar is having a hard time keeping out of matrimony. Because she is a great friend of Scotti, the famous baritone, and is seen with him often, the rumor that they are to be married crops up at short intervals. It is always denied, but as often reasserted. The

latest report they have denied is that Legislature. The amount raised was they are married.

Legislature. The amount raised was \$7500. Probably no presentation to a vessel of the United States Navy has

Legislature. The amount raised was \$7500. Probably no presentation to a vessel of the United States Navy has caused so much commotion, owing to the fact that on one of the pieces is engraved a picture of Jefferson Davis, Representative David A. Hollingsworth introduced a resolution in the House callitors were welcome.

This photograph of Mrs. Leonard Wood, was taken at the occasion of the annual garden party of the New York branch of the Army Relief Association at Governors Island, General and Mrs. Wood held an informal reception during the party, to which all visitors were welcome.

The class of '69 celebrated ivy day at Barnard College June 3. The sweet girl graduates marched in procession from Milbank Cloister through Milbank Quadrangle, where they planted the class ivy almost tearfully. They listened to the steps oration by Olga Rilke and the ivy oration by Lillian Closson. They sang the class song, composed by Ethel Hodson, and they unveiled a tablet in memory of the class of '69. Then they danced a very pretty dance around the maypole on the quadrangle green.

KEEPING THE TIME FOR THE NATION

Wonderful Clocks at the Washington Observatory Where "Noon" Is Flashed 900,000 Miles.

FEW minutes before 12 o'clock minute the clock is on. So it goes up to 111 o'clock. An hour later local operanoon every day in the year a young man walks into a certain room of the main building at the Naval sgain the skipping of one second. Finally

recom of the main building at the Naval Observatory, which is set up on a hill in the northwestern part of the District of Columbia. He glances at the various clocks in the room and then goes over to a table which is covered with electric apparatus.

He watches the clocks to his left closely and waits for the hands to reach five minutes of 12. As the second hand approaches the 60 on the dial he prepares to shift a switch. The clock is so finely adjusted that when the second hand points to 60 it exactly marks the beginning of a new minute.

As it touches the 60 the switches are thrown on. That starts a signal that goes out instantaneously over 200,000 miles of telegraph lines. In Washington, New York, Buffalo, Cleveland, Newport, Baltimore, Newport News, Norfolk, Savantal and other instruments of great value are used, and the taking and recording of the time has reached a point where the human equation is practically eliminated.

The mean time is determined by astronomical observations. When certain stars pass the 75th meridian, called the meridian of Washington, it is a certain time. The operator watches for the stars through a telescope, the field

the stars through a telescope, the field of which is covered with fine wires. As the stars reach a certain point in transit the operator presses a key in his hand. A contact is made and recorded on a chronograph. The chronograph consists of a cylinder covered with paper. A fountain pen rests on the paper. It is held by an arm attached to the mechanism. The cylinder revolves once a minute and the pen moves along the surface of the paper, making a spiral line.

A sidereal clock of the finest make is running in a vault underneath the observatory. With each tick of the clock there is a contact of two points.

observatory. With each tick of the clock there is a contact of two points. These two points are attached to wires that lead to an electro-magnet attached to the arm that holds the pen of the chronograph. The clock is so adjusted that each minute the pen jumps to one side. Consequently there is a break in the line.

York, Buffalo, Cleveland, Newport, Baltimore, Newport News, Norfolk, Savannah, New Orleans, Key West, Galveston, Chicago and elsewhere the time halls go up on their poles. People know that it is five minutes before noon, Washington time.

The clock which keeps the time in the observatory theix on. With each tick there is a contact of electric points. A circuit is closed and an inatrument on the table similar in appearance to a telegraph sounder ticks away loudly.

It goes on to the twenty-ninth second, then skips one lick, then resumes its steady sounding until the last five seconds, then there is another gap. These gaps are for the purpose of giving listened ers at other ends of the great system of wires a chance to know what part of the

from five one-hundredths to ten one-hundredths of a second.

The sidereal clocks are wonderful pieces of work. They were made in Berlin by a man named Riefler. There are two of the clocks in the observatory building here, and a third Riefler clock is in the room from which the time is sent out to the world.

The sidereal clocks in the

the world.

The sidereal clocks in the observatory are beneath the ground, in the basement of the building. The room which contains them is small. There are three walls tains them is small. of the building. The room which contains them is small. There are three walls surrounding it, with spaces between them. The effort is made to keep the temperature within the room always the same For this purpose there is a thermostat so delicately made that the increases in heat caused by the presence of a human being in the room, if only for a minute, will be indicated.

The clocks are in large glass cylinders four or five feet high and hermetically sealed. The cylinders are fastened to stone pillare which reach down into the ground and do not touch any part of the flooring. Thus there is no chance of vibrations affecting the clock except from earthquakes, and such happenings are beyond the control of the scientists.

The clock winds Mself every 30 seconds by means of a small weight. The fail of the weight moves the clock. When the weight reaches a certain point a small electromagnet becomes operative, and the weight is picked up, to start on its downward course again, giving enough power to keep the clock glong.

There are two clocks which may be used in automatically sending out the time, so if one should break down the other would be ready for the emergency. These clocks are made accurate by comparison with the sidereal clocks.

The time of ending a flash over the wires is practically nothing. A flash has reached Greenwich, English Fish in Australian Western

"Jubliate" (Scholz Op. 39), Senior Choral Class.
"Gavotte" (Popper Op. 23); Ceill, Ruth Maginnis, Anna Clemons, Josephine Wagner, Edna Bridwell; harps, Carmel Sullivan, Vivien Rowley.
"The Treasured Past," St. John's Eve Chaminade); solo, Esther Hogan; chorus, Senior Choral Class.
"Fantalisie Symphonique" (Tours); violins, Mary Jessop, Grace Jennings, ceilo; Ruth Maginnis, harp, Carmel Sullivan.
"Pas des Cymbales" (Chaminade), Florence Hughes, Olga Fisher.

WILL HOLD REQUIEM MASS Departed Sisters of the Holy Names to Be Honored.

A solemn pontifical requiem mass will e celebrated in St. Mary's Cathedral by Right Rev. A. J. Glorieux, Friday morning at 10 o'clock, for the deceased bene factors, religious friends and students of the Sisters of the Holy Names. Rev. Arthur Lane will deliver the sermon. Following is the programme of the mu-sical portion of the service.

Springer, Miss Lucile Dunne, Miss Mulien Miss S. Dibble, Miss Ivene Flynn, Miss McKinnon, Miss P. Vocpel, Miss C'Hare, Mis Moran, Miss M. Cain, Miss Rose Friedel Miss Laura Hailinan, Miss Louise McCan, James Flynn, Mr. Lonergan, Frank Barrett Mr. Gill, John Malley, R. A. Cearns, John Cahalin, L. G. Lenon, Gus Cramer, H. J. Christinn, F. G. Delinad, Organist and director, Frederick W. Goodrich.

YOUTH OF 16 IS MURDERER Kills Woman and Babe and Is In-

different Upon Arrest.

MUNICH, June 19.—(Special.)—A youth of 16, named George Gelst, a baker's apprentice in Kronach, Bavaria, followed his mistress yesterday into the store-room and killed her with repeated blows of a hard-result of the worker's ability of the worker

of a hatchet.

The woman's child of 5 entering the room, Geist took her up by the legs and dashed her brains out against the wall. Then he hung the bodies to a beam to convey the impression that the woman had committed murder and suicide. Geist took his victim's purse, containing \$75 from her pocket. He remained in the neighborhood, and even set inquiries about as to the whereabouts of his mistress.

Guardian, but Not Garden.

LONDON, June 19 .- (Special.) -- Newspaper editors are not usually surprised at anything which happens, but the chief of a leading provincial daily confesses he was rather taken aback the other day when a railway official rang him up on the telephone and said they had a buffalo

Following is the programme of the musical portion of the service.

Oran prelude, "The Memorial of the Departed."

At the Vesting of the Bishop, "Misserere Mei Deus." (Vidiana.)
Introit, Gradual, Tract, Sequence, Offertory and Communion, Piain Chant.

Kyrie, Sanctus, Benedictus and Agnus Deiplain chant.

Motet, "O Bone Jesu." (Palestrina.)
Organ Postlude, "Lieder No. 27." (Mendelssohn.)

Choir—Mrs. Kathryn D. Cushing, Mrs. McConsigned to the "Gardens," where there is a zoological collection. The similar-ity in the names had led to the railway officials, amusing mistake.
