BRADLEY IS TAKEN

Man Who Killed Gittings Found Defiant After Arrest.

Blacksmith Who Shot After Charging Patrolman With Breaking Up Home Expected to Return for Trial Without Protest.

THIRSTS FOR MORE BLOOD

Blacksmith Who Shot After Charging Patrolman With Breaking Up Home Expected to Return for Trial Without Protest.

On the night of the murder Bradley had come home from the O. R. & N. carshops, where he was employed under A. J. Smith, foreman, father of Mrs. Bradley.

Bradley and Siverer Meet.

Joe Siverer, heard the tale and started to find Bradley. Gittings, who lived close by, heard of it also and accompanied him.

Bradley pulled his gun. Gittings was standing on the sidewalk a few feet away. When Bradley saw Gittings he no doubt thought that his presence there was part of a premeditated plan so without further ado he opened fire on Gittings and shot him down in a pistol duel...

Following the killing, Bradley rushed to his home and threatening to kill his wife, as he had Gittings, secured a hat, his having been lost in the fight, and then fled. Bloodhounds were later put upon his trail and he was traced to the railroad tracks a short distance away. From that time nothing was heard of him.

It was rumored at one time that he had fled to South Africa, and letters and circulars were sent out by the local authorities and for many weeks a hot search was maintained without avail.

Widow Was Left Destitute.

Sensational features drew more than an ordinary amount of attention to the case, principal among these were the destitute condition in which Mrs. Gittings, widow of the officer, had been left with three small children.

Bradley's family said that he not only abused his wife, but that his children, too, came in for a share of his cruelty.

There were five of them, ranging in age from 12 to 3 years.

Since the killing Mrs. Bradley had been arrested repeatedly for drunkenness, and once was brought before the officials of the District Attorney's office, but a few months ago to answer a charge of bigamy which was being urged against her.

She had married a Greek saloon-keeper without having procured a divorce from Bradley. It was charged, however, that the unwritten law will have a very poor show in this case.

There are two eye-witnesses to the shooting who are ready to swear that Bradley drew his weapon and fired before Gittings drew his.

Gittings had been a patrolman for several years. He had previously been a cowboy and a deputy sheriff in one of the Southwestern states.

He owned a perfect arsenal of weapons and was always interested in firearms.

He was supposed to be one of the crack shots of the night of the fatal encounter.

Bradley in an open duel on the street is only accounted for by the fact that Bradley took refuge behind a telegraph pole. Bradley had never handled a revolver much and his wounding of Gittings was considered to be the result of mere chance.

It is due to their efforts that the long chase after Bradley has been kept up and the man finally run down.

ORIGIN

Of a Famous Human Food.

The story of great discoveries or inventions is always of interest. An active brain worker who found himself hampered by lack of bodily strength and vigor and could not carry out the plans and enterprises he knew how to conduct, was led to study various foods and their effects upon the human system. In other words he knew he could carry out his plans he had to find a food that would carry him along and renew his physical and mental strength.

He knew that a food which was a brain and nerve builder (rather than a mere fat maker) was universally needed. He knew that meat with the average man does not accomplish the desired results. He knew that the soft gray substance in brain and nerve centers is made from albumen and phosphate of Potash obtained from food. Then he started to solve the problem.

Careful and extensive experiments evolved Grape-Nuts, the now famous food. It contains the brain and nerve building food elements in condition for easy digestion.

The result of eating Grape-Nuts daily is easily seen in a marked sturdiness and activity of the brain and nervous system, making it a pleasure to carry on the daily duties without fatigue or exhaustion.

Grape-Nuts food is in no sense a stimulant; but it simply food which renews and replaces the daily waste of brain and nerves.

Its flavor is charming and being fully and thoroughly cooked at the factory it is served instantly with cream.

The signature of the brain worker spoken of, C. W. Post, is to be seen on each genuine package of Grape-Nuts. Look in pkg. for the famous little book "The Road to Wellville." "There's a Reason."
