SOCKEYES TO BE

F. A. Seufert Enthusiastic Over This Species of Salmon for Canning.

WANTS 4-YEARS' PLANTING

If Bureau of Fisheries Will Not Undertake Work, Packer Himself Declares He Will Stock River on Small Scale.

Realizing the value of the sockeye salfor commercial purposes, F. A. Sou-the well-known Columbia River packer, has resolved to take the initiapacker, has resolved to take the inflative in an effort to stock the Columbia with this appeles of the saimon family. He will first take the subject up with the members of the Oregon delegation at Washington and ask the Bureau of Fisheries to procure 2000,000 or 19,000,000 sockeye eggs annually for the mext four years, to be harbed and planted in the Columbia. Second, he will propose that the packers on the Columbia subscribe to a fund for the same purpose. Failling in a fund for the same purpose. Failing in these plans, Mr. Scufert is so enthusias-tie over this variety of salmon that he will obtain a smaller supply of eggs and begin stocking the river at his own ex-

pense.

Mr. Senfert returned yesterday from Bellingham, Wash., where for several days he has been observing the operations of the salmon camperes on Bellingham Bay and in other northern waters. He reports the run of sockeyes in those waters this year exceeds that for the year 1947, which was the previous high record. Both the Canadian and Federal fish authorities in that section informed fish authorities in that section informed. fish sutherities in that section informed Mr. Seufert that the take of eggs this season would be considerably greater than can possibly be handled by all of the hatcheries by which that district is

Dr. Jordan Disproved?

"These facts positively disprove the cona representative of the United States Gov-ernment, has been investigating the fish-teries of the Pacific Coast," said Mr. Seufert last night, "Dr. Jordan not long sir fert last night. "Dr. Jordan not long since predicted that through the operation of traps in the northern waters the sock-eyes would soon be exterminated. He also announced that if this species of salmon was to be preserved, the traps would have to be ahandoned and operations en-tirely suspended for two years. The enor-mous run of these salmon this season and the great abundance of eggs for hatchery purposes proves the unsoundness of his position and place him hable to the charge of being a Nature faker.

"So heavy was the run this week that in one day the traps received their ca-pacity, which is sufficient to supply the pacity, which is satisfaint to sapply the cannaries for a week, with the result that all traps have been closed until the catch has been disposed of. In the meantime, the fish are permitted in countless numbers to pass up the Fraser River or Baker Lake to their natural spawning grounds. Last Wednesday the Pacific-American Fisheries Company, Frank B. Deming, manager, of South Beilingbam, packed 10,000 cases in one day's run, this being the largest pack ever made in 24 hours. This pack represented a catch of 701,400 pounds of fish.

Sockeyes Thrive in Columbia.

"There is no question but that the sock-eyes will thrive in the Columbia, a stream they do not now inhabit. All that is nacessary is to introduce them to the Columbia by planting probably 5,00,000 every year for four consecutive seasons. This will insure the stocking of this This will insure the stocking of this stream. This season is a good time to begin this task, since there is an abundance of eggs to be had either from Praser River or Baker Lake. It is not until the fourth year after salmon are planted in a stream that they will return to that stream, so by planting these fish in the Columbia for four consecutive years, there would be a continuous run of sockeyes in the Columbia annually. These eggs can readily be handled and hatched in the new hatchery which is being established by the state at Bonne-

"Commercially, the sockeye ranks with the celebrated Chinook. In the market, the price of the two varieties is the same. The value of this fish for all uses certainly justifies making an effort to stock the Columbia with them.

NATIONAL OFFICER COMING

G. A. R. Commander Will Be in Portland Tomorrow.

Sumner Post No. 12, G. A. R., last night Summer Post No. 1, 3, A. L. last night made arrangements for a general recep-tion to Commander-in-Chief Van Sant to-morrow night in the hall of Mulinomah Camp, East Sixth and East Wasbington streets. The following dispatch was re-ceived from B. F. Pike, past department

ceived from B. F. Pike, past department commander:

"Salt Lake, Utah, Aug. 1k.—J. W. Oglibee, Adjutant: Commander-in-Chief Van Sant will be in Portland next Monday; would like to meet Sumner Post. Please arrange it.

Acting on this information, the Weodmen Hall was secured, and it was decided to hold a campfire in honor of the commander-in-chief. Mr. Pike, who will arrive with Commander Van Sant, will be asked to preside. Details will be arranged later. Information received further is that the commander-in-chief will come with a considerable delegation, besides the Oregon veterans, who are returning with him. It is desired that all old soldiers should attend the campfire. At the meeting of Sumner Post last night, at the hall on Grand avenue and Bast Pice street, an interesting account of the Grand Encampment was given by A. C. Schmings, one of the delegates. Commander Van Sant is ex-Governor of Minnesota. He will arrive at \$220 o'clock to nesota. He will arrive at \$20 o'clock to-morrow morning, and M. L. Pratt and G. E. Caukin have been appointed by James B. Shaw as a reception committee.

VISITING EXPERTS

Party From Seattle Convention Pleased With Inspection of Grounds Here.

GUESTS OF CITY OFFICIALS

Portland Has Great Opportunity for Park and Boulevard System. It Is Declared After Automobile Ride.

Mayor Simon, Park Commissioner Weth-rbec and Park Superintendent Mische esterday morning piloted about the city yesterday morning piloted about the city live distinguished park men, among them General Jackson F. Dawson, perhaps the most famous botanist in the world, and the founder of the Boston arboretium, noted the world over. They were here on their way to California, after attending the National convention of Park Super-intendents at Seattle.

the National convention of the second intendents at Seattle.

The party consisted of General Dawson, who is superintendent of parks in Boston: J. W. Duncan, assistant superintendent; J. T. Winters, of Jersey City, superintendent of parks of that place and the state grounds, and retiring president of the National association. John Berry, superintendent of parks at Colorado Springs, Colo., and D. D. England, superintendent of parks at Victoria. After viewing as much of the city as possible in the limited time at their disposal, the party left last night for California.

All but One Auto Breaks.

A peculiar accident caused the party to A neculiar accident caused the party to separate from others, who attended the National convention, and who later took a trip to Mount Rainier in automobiles. It was Friday, the 13th, and all of the automobiles but the one occupied by the five broke down, and these alone reached Tacoma in time to catch the Northern Bacific train for Portland, at 1:30 yesterday morning. They arrived here at 7 A. M., and were met by President Wetherbee, of the Commercial Club, who took them to breakfast at the Hotel Portland, accompanied by Superintendent. Portland, accompanied by Superintendent

At 3:20 o'clock, Mayor Simon, in his new automobile, called at the Portland for the distinguished visitors, and, together with Dr. Wetherbee, who is a member of the Park Board, took the party to the celebrated Forestry building on the Lewis and Clark Pair Grounds. General Dawson was able to enjoy this most interesting sight, and he was greatly pleased with what he saw. Owing to his advanced age, however, he was unable to follow the party when the members left the automobiles at the entrance of Maclesy Park and walked through the beautiful canyon. General Dawson is held in great esteem and is much admired by all who know him, and the members of the party gathered various kinds of wild berriers, foliage and green growth for his inspection upon returning to the automobiles. It is said there is no plant in the world which General Dawson cannot almost instantly designate mean presentation. At 9:30 o'clock, Mayor Simon, in his new eral Dawson cannot almost instantly designate upon presentation, so widely has he studied botany.

Mayor Simon's First Visit.

A peculiar feature of the walk through Macleay Park was the statement of Mayor Simon, who said that, although he has lived in Portland 50 years, this was "I never knew," said Mayor Simon,
"In ever knew," said Mayor Simon,
"that we owned such a magnificent park
as this. I am heartly in favor of expending some of the park funds to improve this and make it accessible to the

public: it is one of the most picturesque places I have ever seen." Dr. Wetherbee holds similar views. In fact, it was his suggestion which led the

Mische, wended its way through the ra-Mische, wended its way inrough the ra-vine, the distinguished visitors, who have seen nearly every park of any conse-quence in the United States and many in foreign countries, frequently praised in unstinted language the natural grandeur, and declared Portland has great somic beauty, and that there is here an oppor-tunity unsurpassed to build up a grand park and boulevard system.

City Park Inspected.

From Macleay the visitors were driven to City Park, where they obtained an excellent view of Mount Hood and the city, it being possible to see the Colum-bia and Willamette Rivers also. City Park is more beautiful this year than at any time in its history. All of the memhers of the party expressed themselves in the highest terms of praise at the ap-pearance of the park and the remurkable panaramic view from the automobile

From City Park, the party drove to From City Park, the party drove to Council Crest, which is becoming famous all over the country. The visitors were greatly surprised and delighted with the view from the Crest, where it is possible to see the entire city, the two rivers and the meuniains in the distance.

After returning downtown, the party was taken to luncheon at the Commercial Club by President Wetherbes, and during the afternoon they resumed sight-seeing until their departure last night.

INSURANCE MEN TO MEET

Mutual Bepresentatives Will Gather in Portland.

Among the most important gatherings o be held in Portland the coming week is the Organization of Mutual Fire Insur ance Companies. Delegates to the annual meeting, which will continue from Tues

meeting, which will continue from Tuesday to Friday, have already begun to arrive from all parts of the country. Reservations and headquarters for 290 Mutual Fire Insurance agents have been made at the Oregon Hotel.

The prime factor of the delegates' efforts at this meeting will be to rectify and detect the prevalent weaknesses in the methods of mutual insurance companies. Suggestions and remedies will be proposed by experts in every phase of the proposed by experts in every phase of the fire insurance business. Numerous ad-dresses will be made upon technical topics of interest to the delegates. Social funcof interest to the delegates. Social func-tions have also been arranged for the en-tertainment of the visitors. Besides an excursion up the Columbia on the steamer Balley Gatzert, many side, trips have been arranged for the visitors during their rojourn here. Following is the programme of addresses which will be delivered:

It is quite unnecessary to buy the most expensive furnishings, although we have that kind if wanted. The point to be remembered about our stock is this: We can supply furniture, floor-coverings, draperies and decorations in any grade or price that are at once correct, artistic and distinctive.

The attractiveness of a home or room depends first of all upon its comfort and restfulness and next upon the harmony and arrangement of colors and the individuality of the whole treatment.

Thousands of Portland people have found in our stock just the combinations of comfort, style and individuality they have despaired of finding. They have found us able and willing to advise in all puzzling questions of color or style. And they have found that their furnishings, those carefully selected from our immense and exclusive stocks, have actually cost them less than if they had been chosen haphazard from indifferent or tawdry lines. .
