Of interest to Particular Dressers are the Demonstrations now being given by Madame Vanden Wyer

Never a more complete Showing of Heating Stoves than this Season's

To look along the rows of heating stoves arrayed here for inspection is to be convinced that in this showing is surely the one to meet your requirements. It's a selection of all that is modern in heating stoves—of every size—of every description—heaters for burning wood, for burning coal—or for burning both wood and coal.

The cut shows one from the Moore's line of fire-keeping heaters. It is for burning wood, and is made in two sizes—18-inch and 20-inch. The linings in this stove are of ventilated cast iron, which will last much longer than a solid cast lining. The door, being extra large, permits large sticks of wood to be used. \$13.50 and \$15.50 are the prices of these heaters.

And then there is the Moore's fire-keeping air-tight Heater—the best made—which has heavy reinforced bottom, and heavy steel lining. It has a patent sliding draft and is also supplied with patent ash pan, which can be instantly adjusted, and in such a way that dust or ashes cannot escape when being removed. Four sizes in these, priced as follows: \$11.50, \$13.50, \$15.50, \$17.50. Moore's Airtight Coal Heaters—have what is known as the hot-blast construction, which means a great saving in fuel; three sizes in these—at.....\$23.50, \$25.50 and \$27.50. Any Heater in our line can be purchased on easy-payment terms.
