Nowadays nobody may shake dice for drinks or for cigars and the proprietors may shake, also. The flaw in the law was discovered by Judge Cabanisa. It arises, so he explains, from an attempt on the part of the lawmakers to make a distinction between barienders and cigar-dealers on the one hand and com-mon citizens on the other. The judge held that if two customers could le-gally shake dice that the proprietor or his cierk had an equal right. The re-sult of this decision has been the intro-

Once, when consulting a prominent au-thority on the subject of "the spirit in man," he said that the spirit could see, hear, feel, taste and talk; that it had the hear, feel, taste and talk; that it had the form of a person. When asked why he believed as he did, he replied that the Bible taught it, and for proof referred us to the rich man and Lazarus, and a few other Scriptures that he thought established his idea. When asked what becomes of that portion of a man's spirit which is in-cased in his legs, when the train cut both his legs off, whether that portion of the spirit stayed with the rest, and managed without a house to live in, er whether it thok its flight as soon as it was uncased, or whether it went with the old case into the grave, he replied that such a question was too ridiculous to be answered.

But why?

Robbery Story Enlarged On.

San Francisco has been entertained the past two weeks by a discreetly retiring gentleman, who has come to be known far and wide as "The Drugstore Bandit." The newspapers and more particularly the Examiner, which dearly loves that kind of a yarn, have fairly reveled in the "going," as the racetrack man would asy, and every line that has been obtain-able, together with a lot of manufac-tured information, has gone through the purce the press.

printing press. The world at large is acquainted with the robber, or so much of him as the press associations have seen fit to carry over their wires. Briefly speaking, he over their wires. Briefly speaking, he is the chap who some two weeks ago startled the community by holding-up the Gleason-Courneen drugstore on Market street, near Eighth, and the same night murdering in cold blood an employe in a Turkish hathhouse. That was suf-ficient in itself to make a good story, but he set the city on edge when he re-turned a few nights later to the drug-store and once more, at the point of the pistol, induced the clerk to empty the cash register. And all this while Dr. Gleason (a brother, by the way, of Jack Gleason) stood in the back of the establishment, and looked on. **Detectives Are Foiled.**

Detectives Are Foiled.

Dr. Gleason said it was the same man. Then followed the alleged robbing of a candy store, or rather the attempt at hold-up, by a man thought to be one and the same with the drugstore robber. The detectives were presumed to be out-side the candy store, which is close to the drugstore, but the arch criminal of the century except them, although rumor among the reporters who have been handling the case is to the effect that the plain clothes men were in a been handling the case is to the effect that the plain dothes men were in a neighboring salcon induising in a drink. Davis Evans camped right on the lot and threw in his voice and influence with the prosecutors who were denouncing Will Crocker and try-ling to send his friends to jail. So the Crockers withdrew from Grace Church and joined Trinity. Their friends did the same. Funds for the cathedral did not come in as rapidly as before and griends of the movement com-menced to look around for the cause. They suspected the Rev. Davis, but it would never do to oust him because would never do to oust him because he favored the prosecution and offend-ed the rich. So it was decided to dis-solve Grace Church Parish, absorb it in the Cathedral and let Dr. Evans the dice. down easy.

For Municipal Ownership.

From all that can be learned, municiownership will be given a good trial in San Francisco for the next few trial in San Francisco for the next few years. The people seem to approve of the proposition to buy the Spring Val-ley Water Company and the Indications are that bonds will be voted for the purchase of the Geary-street cable line, which runs from out near the park to Third and Market streets in front of the Chronicle building. There is a tre-mendous fight on as regards the Geary-street line, but the heads of the Union Labor party are for the scheme and

street line, but the heads of the Union Labor party are for the scheme and that will be a big boost. The chief argument against the line being run by the city is the fact that it has no way to reach the ferry, no system of transfers with the United Railroads and will therefore be a white elephant to the city. However that may be, it looks as if enough of the people of San Francisco want a line that their representatives are handling. current in theatrical circles for several days predicts the withdrawal of the Shuberts from the San Francisco field in the near future. The fact of con-tinued poor husiness at the Valencia-street house and the report that the employes have received notice that their services will not be required af-ter the first of the year, are looked upon as confirmation. If the agent says two blocks, the purchased-to-be will rebel at once, and if it is three blocks distant, the trade is off. If not in a thousand places, certainly in nine cases out of ten. The blocks in Portland are usually 200 feet long, and any man or woman can without indulging in unseemly haste walk that distance in a minute. Three blocks will require, say, four minutes' walk, but this distance is so great and the time re-quired so excessive that in most in-stances the problem is too appailing to be favorably considered.
