TIMBER USE FAR **EXCEEDS GROWTH**

Three Times as Much Taken Yearly From Forests as Nature Replaces.

UNCLE SAM OWNS FIFTH

Balance of Timber Lands of United States Supply Industries Annual Output of Which Is Computed at \$3,000,000,000.

OREGONIAN NEWS BUREAU, Wasaton, Jan. 8.—"The Forests of the title of lited States: Their Use," is the title of lited States: Their Use," is the Forest

riginal forests covered not less than

The original forests covered not less than \$50,000,000 acres.

Forests publicly owned contain onefifth of all timber standing. Privately owned forests contain four-fifths of the standing timber. The timber privately owned is generally more valuable than that owned by the Government. The Pacific Coast forests probably contained originally 20,000,000 acres, with a stand of 1,500,000,000 feet. The Rocky Mountain forests covered about 11,000,000 acres, with a stand of 500,000,000,000 feet. The Pacific Nucests now cover 20,000,000 acres, or 25 per cent of the original acreage; the Roeley Mountain forests cover 10,000,000 acres, or 21 per cent.

Annual Products \$3,000,000,000.

"Our industries which subsist wholly or mainly upon wood pay hie wages of more than 1,500,000 men and women. The industries which use wood whelly or mainly in manufacture represent an investment of over \$2,250,000,000 and yield each year a product worth nearly \$2,000,000,000.

"The National forests in the Rocky Mountain and Pacific Coast States afford Symmer ranges to over 12 per cent of the cattle and 21 per cent of the states in which they lie.

"Forests publicly owned contain over 100,000,000 acres of marchantable timber, with a stand of \$4,250,000,000 feet board measure, distributing as follows:

National Torents A National Barks Incaserved Public lands Indian reservations Millisty reservations State forests	11,000,000,000 14,000,000,000 58,000,000,000
"Corporate heldings wi	ith the larger in-

dividual holdings contain about 1,00,000, 000,000 feet of timber. This is, on the average, the most valuable timber in the United States. Forestry is practiced on less than 1 per cent of this area.

Use Made of Woods.

We take from our forests annually, actually waste in logging and in manually, actually, actually waste in logging and in manually, actually waste in a normal year 30,000,000 cords of firawood, 40,000,000,000 board feet of imber, 118,000,000 hown tles, 1,500,000,000 taves, over 123,000,000 sets of beadings, learly 500,000,000 barrel hoops, 3,000,000 ords of native pulp wood, 185,000,000 emble set of round mine timbers and 1,250,000 ords of wood for distillation.

Forest fires burn over millions of acres

Forest fires burn over millions of acrea and destroy billions of fest or timber annually. The young growth destroyed by the is worth far more than the merchantistic timber burned. The loss in the million from one-third to two-thirds of the limber sawed. The loss in the million is from one-third to two-thirds of the limber sawed. The loss in the million is from one-seventh to one-fourth, from the firm one-seventh to one-fourth, and forest products. An average of only the feet of himber is used for each 1000 (cet which stood in the forest.

Use Exceeds Growth.

"We take from our forests each year, it counting the loss by lice, three times eir yearly growth. We take 36 cubic in per acre for each 12 cubic feet grown; inke 230 cubic feet per capita, while timary uses 37 cubic feet and France cubic feet.

The condition of the world supply of the condition of the world supply of the makes us already dependent upon what we can produce. We send our or our country one and one-half times as much timber as we bring in. Except for inishing woods, relatively insignificant in quantity, we must grow our own supply or go without. We have taken our dividends out of our forest capital, until we have greatly reduced the capital isself. We have \$5,000,000 acros of cuttover and burned-over forest had, upon which actual planting will be necessary to preduce a merchantable chrop of timeler. Of the \$500,000 acros of forest cut over each year 1,000,000 acros is restocking institutally and 2,750,000 acros go to increase our National task in forest-planting.

Douglas fir and yellow plue, now our choof source of supply, are going far sucker filan they grow. Fouglas fir out 55 per cent more at the mill in 1967 than it did in 1990. condition of the world supply of

PAPERS TO BE REDEEMED

SECRETARY BALLINGER AUTHOR-IZES PAYMENT.

Those Who Helped Bulld Government Irrigation Systems Can Have Uncle Sum's "L O. U's" Cashed.

OREGONIAN NEWS BUREAU, Washington, Jan. 8. - Under the plan of acitlement devised by Secretary Bullinger, all ment devised by Secretary Bullinger, all settlers on Government trigation projects who assisted in building the same, and are paid off in water users' certificates, will be repaid for their labor, if their certificates have not heretofore been accepted as part payment for water rights. The fiscal agent on each project where alone co-operative certificates were issued, will immediately be authorized to pay, by Government check, all settlers who equivalent to the face value of the certificates presented. No such payment, however, will be made to speculators holding certificates. Their only recourse will be to reach an understanding with the settler whose certificates they bought at allows thang face value. The Secretary of the Interior issued the following statement explanatory of his refunding plant.

Secretary Ballinger has approved a least law for the settlement of claims outstanding against the reclaimation fund to work done under the co-operative agreements, whereby such certificates as do not show on their face that they have been assigned may be accepted as evigence that the holder performed the servery certificates as do not show on their face that they have been assigned may be accepted as evigence that the holder performed the servery certificates as do not show on their face that they have been assigned may be accepted as evigence that the holder performed the servery certificates as the not show on their face that they have been assigned may be accepted as evigence that the holder performed the servery certificates as the not show on their face that they have been assigned may be accepted as evigence that the holder performed the servery certificates as the not show on their face that they have been assigned may be accepted as evigence that the holder performed the servery certificates as the not show on their face that they have been assigned may be accepted as evigence that the holder performed the servery certificates as the not show the certificates as the not show the performent of some that the been assigned may be accepted as evidence that the holder performed the servleve or paid some one else to perform it
for him, payments to be made on the
project by check drawn by the local fiscal
usent.

such settlements contemplates the surrender of certificates by the Water Users' Associations and all parties who have certificates or claims on account of work done or materials furnished, or the filing of chalms for the work done where certificates have not been issued.

"Upon the receipt of such certificates, vouchers will be prepared on the usual forms in the name of the persons to receive payment for the amount found to be due, evidenced by attached co-operative certificates of various denominations; in case the liability is not represented by the certificates surrendered, the detail of work done or material furnished to be shown with unit rates in "lieu thereof, with proper deductions for settlements previously made. These vouchers are to be certified to by the claimants, by the project engineer, and approved in the usual manner and submitted to the special fiscal agent for payment.

"All certificates heretofore surrendered and filed in the Department, but not wholly applied, will be forwarded to the project engineer and the engit yet remaining in fayor of the persons surrendering them included in the vanchers presented;

ring them included in the vauchers pre-

"Water users who desire may avail themselves of the opportunity afforded by this plan for making settlement of construction, maintenance, and operation charges due the Government. This may be done on their request, by the payment of the amount due by two checks, one representing an amount equal to the charges for construction, maintenance and operation, the other covering the basance of the claims and the indorsement by the water user of the ope check, which latter he will turn over to the fiscal agent or forward direct to the receiver of the local Land Office in settlement of his charges." It is arrimated that show 221,000 aparts

charges.
"It is estimated that about \$381,000 worth of these co-operative certificates are outstanding. Supervising and project engineers will be fully advised an to the details of the above plan at an early date."

ARMY ENGINEERS OPPOSE IM-PROVEMENT OF STREAM.

Results on River Not as Expected, Harbor Bill Will Not Provide More Funds.

OREGONIAN NEWS BUREAU, Washington, Jan. 8.—The river and harbor bill will make no provision for improving the Okanogan River in Eastern Wash-ington, because of the adverse report of the Army Engineers. This river was ex-amined last Summer from its mouth to Riverside, 42 miles distant, and conditions were not such as to justify a favorable

The report of the chief of engineers de-lares that to June 36, 1968, \$55,000 had een spent on this river below Riverside. as before, operate only during three or four months of high water, and in that period commerce is very light, not more than 1690 tons in a year.

The valley of the Okanogan is developing rapidly, especially since the Government has undertaken the building of a big irrigation project, and it is recognized.

big irrigation project, and it is recognized that navigation is badly needed, but the Great Northern has built a line through the upper end of the valley, to the great relief of the farmers. If this river could relief of the farmers. If this river could be opened to navigation for eight months every year, from March to November, the engineers would recommend the necessary appropriation, but it is believed that nothing short of canalization will be effective for that length of time. In fact, the report says that, based upon work already done, it seems doubtful whether this can be accomplished except by canals, the cost of which would be very great compared with present and

very great compared with present and prospective commerce.

"As to the possible development of water-power, for industrial and commercial purposes," adds the report, "sucu power installation would doubtless be advisable if the river was

"It is understood that the Great Noth-ovs Railroad is planning to construct a line from Oroville through the Okanogan and Columbia Valleys to Wenatchee. If this plan is carried out it is believed that river traffic on the Okanogan w

Tragedy of a Mail Carrier.

Boston Record.

A duck hunter who has fust returned from the Maine shores tells a story typical of the hardy men who live there. On one of the islands near where he went lived a man who acted as postman for the few scattering houses on the island, and who would row to the mainland every day and bring back the mail, for which he received is cents.

One morning during a terrific story the

One morning during a terrific storm the hunter saw the postman pull over; several times during the trip the boat was nearly swamped, and the man in danger of his life. Why in the world did you make that pro-asked the hunter "surely not for

"Well, you see," replied the postman.
"If I miss a trip I have to write a long letter to Washington, D. C., explaining why, and so I thought I had rather pull the boat."

AT ALAMEDA PARK

Tacoma Striker Arrested for Slaying Mississippi Girl.

DETECTIVE PLAYS FRIEND

Family of Jailed Man Sick and Povserts That Husband Is Wrongfully Accused of Crime.

TACOMA, Jan. 8.—(Special.)—A. B. Ferguson was arrested here today by Detective Liewellyn Calhoun, of Jackson, Miss., for the murder of Ethei Maxwell there in February last. Ferguson was working here as a switchman and was one of those out on strike. Calhoun posed as an anarchist and gained Ferguson's friendship. He made certain of Ferguson's identity, when Ferguson dropped the remark confidentially, "I did a little trick down South that will send me to hell," and showed Calhoun a picture of the girl he had murdered.

The man was placed in jail. Calhoun has a requisition from the Governor of Mississippi for him.

Ferguson Feaves a young wife here destitute and ill and without so much as a plece of coal in their cheerless living-rooms, for he has been out of work since the strike began. Mrs. Ferguson said today she met her husband in Bakersfield. Cal., two years agd and was married to him nine months ago in Montana. They came here from Pocatello, idaho, she sayal where Ferguson had been ill.

"He surely is guilty of no crime." said Mrs. Ferguson, "He knew the Chief of Police at Jackson well, having served under him on the police force there and had written to him since coming out here and New Year's day sent him a postal card of greeting. When he was sick in Idaho the lodge to which he belonged at Jackson came a fugitive from justice. He has also been writing regularly to his people at Jackson. His only fault was the drink habit. I do not believe there can be any foundation for this charge."

In Writing a Play.

John Galsworthy, in-the Atlantic.
In writing a play there are, philosophically speaking, three courses open to the scrious drantatigt. The first is definitely to set before the public that which it wishes to have set before it; the views and codes of life by which the below and codes of life by which the

This way is the most common, successful, and popular. It makes the dramatist's position sure, and not too obviously authoritative.

The second course's definitely to set, before the public those views and codes of life by which the dramatist himself seek believes, the more effectively if they are the opposite of what the public wishes to have placed before it, presenting them so that the audience may senting them so that the audience may seek the most common, successful, and popular. It makes the dramatist is position sure, and not too obviously authoritative.

There is a third course: To set before it as third course: To set before the public no cut-and-dried codes, but the phenomena of life and characteristic process of life by which the dramatist's outlook, set down without fear, favor, or prejudice. An audible sigh swept through the way what a blind-eyed decree of Fate down without fear, favor, or prejudice. An audible sigh swept through the way is the public to draw such poor moral as nature may afford. This third wishes to have placed before it, presenting them so that the audience may sympathy with, a love of, senting them so that the audience may afford. This third wishes to have placed before it, presenting them so that the audience may sympathy with, a love of, senting them so that the audience may sympathy with, a love of, senting them so that the audience may sympathy with, a love of, senting them so that the audience may sympathy with, a love of, senting them so that the audience may sympathy with, a love of, senting them so that the audience is a sympathy with, a love of, senting them so that the dramatist is during the more effectively if the public to draw such poor moral as nature may afford. This third method requires a certain detachment; senting them so that the audience is through the common of the public to set the public to set the public to set the public the public to set the publ

We Are Not Getting Rich Quick

We Are Exchanging Our Rugs for Cash

AND IN PLAIN WORDS =

We are really overstocked at present. Our large collections that have been at Seattle, Spokane, and other places are now stacked up together at 394 Washington street. We have made this city our headquarters for the last eight years and we have seen during that period a great change in the Oriental Rug business. We have sold rugs to people who never thought of buying, and not only that, but we have seen these people get so enthusiastic about Oriental Rugs that in many instances they acted as our special advertisers and boosters. We do not need any introduction to the people of Portland and the Northwest. Our method of business has always been satisfactory to our customers, our customers have always been friendly and liberal towards us, and now, at the beginning of this new year, we are trying to increase the confidence of our customers, and to interest our customers-to-be in this, the highest and best collection of Oriental Rugs that we ever had and that we ever will have, at the lowest prices that you ever heard of. The finest pieces that are the cream of the latest importation made by our Mr. Atiyeh during his last trip to the Orient, specially for the A. Y. P. Exposition, and that won the Grand Prize, which was awarded by a committee of experts will be offered now at wonderful reductions. Our stock of large CARPETS, KHIVAS, KAZAKS, MOUSSOLS, IRAMS, FERAGHANS, SERABANDS, SHIRVANS, BELOUCHISTANS, BOKHARAS, KILMS, RUNNERS, etc., etc., must be reduced, and the only way

to do it is to cut the prices instead of cutting the rugs, and to please the customers instead of pleasing ourselves. Following you will see a list of certain prices cut down from their regular prices, and along the same rate you can figure the rest of our huge stock:
