Liberals 4. LONDON, Jan. 22 .- Reports were re ceived today from seventy seats of the next House of Commons, but of these sixty-three were voted yesterday. The

results show the following: Unionists, 34; Liberals, 26; Laborites, 1; Nationalists, 9. Balloting went on in twenty-four dis-triets today, but late tonight returns from only seven of these had been re-ceived. The other seventeen will

ceived. The other seventeen will probably not report until Monday. The day was about the brightest the Unionists have experienced since the elections began Saturday. The most sanguine among them hardly predicted the capture from the enemy of nineteen seats, while the Liberals found small satisfaction in two gains from yesterday's belated returns and two from among the five seats announced today. among the five seats announced today.

The week ends with the Unionists publiant and confident. The Liberals cannot possibly control enough of the remaining elections to give them an important majority in the House.

#### Unionists Are Jubilant.

The day's results follow the trend begun on Thursday. The countles conists, who are reversing the Liberal ma-jorities in many places and achieving substantial gains in nearly all the county constituencies.

The Nationalists are assured of the control of the House, according to all political prophets. It was reported today that Premier Asquith would resign and request the King to summon a Conservative to organize the government if the Aberrals failed to sewere a majority of

#### Apostle of Protection Triumphs.

Henry Chaplin, who was regarded as the archeriest of tariff reform before Chamberlain took the field, was re-elected for the Wimbledon division by more than 5200 majority. This is not so great as his previous majority, but Chap-lin's opponent in 1907 was a woman suf-fragist, who was unable to poll a great part of the Liberal vote.

The tariff reformers also made a sub-stantial inroad on the heretofore solid free trade ranks of Yorkshire. Three Yorkshire sents have been pinced to the credit of the Unionists today, two of which were formerly held by Liberals. An interesting member of the new Parliament will be Francis Neilsen, the Liberal candidate elected by the Hyde constituency of Cheshire. He was formerly stage manager at the Convent Gar-

Without stamina man is a fail-ure. What is stamina? It is con-stitutional vigor-health. It is stitutional vigor-health. It is keen, responsive, vibrant nerve force, that gives wonderful inner strength of will, sustains a sound body, supports a wise mentality, makes money and keeps triends. Keen, strong, sensitive nerves make stamina and with it man can excel in business, sport, pleasure and social favor. Without it he is apt to be weak-voiced, weak-memoried, feeble in motion, with cold hands, cold feet, nervousness, timidity, fear without canse, trembling, melancholy, pain in the back of head, neurasthenia and a general lack of grit, courage and nerve so that it is impossible to act naturally under all circumstances, as a man with transless should. It should be the courage and nerve so that it is impossible to act naturally under all circumstances, as a man with stamina should. It should be the aim of every man to correct the condition responsible for fallure and unhappiness, for it can be done by the simple fulfillment of nature's law that the nerves receive their nourishment through the blood, which enables the herve fluids to recover the daily waste which is constantly taking place. The nerve fluids and body tissues undergo constant changes, and unless the supply is equal to the demand the stream of heatth ebbs low, and misery prevails.

Astonishing strength, nerve force and poise is quickly restored by the following valuable formula, which anyone can prepare in the privacy of home.

First, obtain three ounces of syrup sarsaparilla compound in a six-ounce bottle; add one ounce of compound fluid haimwort, shake well, and let stand two of compound fluid haimwort, shake well, and let stand two hours. Then add one ounce tine-ture cademene compound (not cardamom) and one ounce compound essence cardiol. Mix. Shake well and take a teaspoonful after each meal and one when retiring. The above ingredients, except the syrup, are rare concentrations of purest drugs without opiates and are used for various prescriptions.

Conductor Reynolds rescued eight persons from the sunken dining car. When the wreck occurred Reynolds, with W. J. Bell of Ludbury and David Brodie, a police magistrate, had just aat down to dinner. Bell and Brodie were facing the engine and Reynolds were facing the engine and Reynolds sat opposite them, riding backwards. The diner was the last car to enter the water and did not sink at once, but settled slowly while the passengers climbed upon tables to keep their heads

above the water.

Reynolds, exhorting his passengers to hang on to the hatracks, chandellers and other projections, dived down in the ice-chilled waters, broke through the windows and emerged on the outside of the car. JONES TO SEE SPEAKER

Long Session Held With Animated Discussion of Chances for Bond Certificate Measure to Pass. Amounts to Be Available.

OREGONIAN NEW SBUREAU, Dash-ngton, Jan. 22.—The Senate irrigation committee today drafted a substitute for the Borah-Balinger bill authorizing the issuance of \$30,000,000 worth of bonds to assist in the completion of

Government irrigation projects.
Aside from changing the name of the securities from bonds to certificates, the committee made no material change in the Borah bill, except to provide that moneys shall be applied exclusively to the completion of existing projects or extensions thereof. No new projects can be built with this fund.

#### Jones to See Speaker.

The committee is of the opinion that the bil can be passed through the Sen-ate without difficulty, and Senator Jones was again delegated to confer with Speaker Canonn to see what can be done about getting the measure through the House. Carter told the committee Cannon

would not consent to the passage of a bond bill, but would suport a bill issu-ing certificates. Jones is to see the if the Speaker will positively commit himself to this extent.

A long and interesting session was held by the committee, in which was fought the question of issuing bonds or certificates of indebtedness. The princertificates of indebtedness. The prin-ciple on which the proposed legisla-tion is based is contained in Schator Borah's bill providing for the authori-zation of a \$30,000,000 bond issue. (I fear the Greeks even when they bring gifts, or beware of the enemy who makes you presents.) who makes you presents.)

As the quality of our work becomes known patients who need dentistry flock to our radience (offices) like gulla to a lighthouse. We caution you to beware of bargains in dentistry. If a grocer sells you sugar 29 per cent below market, look out for sand, short weight, a catch-peany scheme or some other latent chicanery. There is guilterior motive. When a dentist offers you work at half price, you'll do well, if no other way out of it, to give him half of the price he asks and run out with the other half in your pocket. You'll be driving a better bargain at that than to accept the class of work you are sure to get. In dentistry, we promise you the real article (unadulter-ated), and full weight.

Alveolar Teeth-Where Bridgework Is Impossible.

Impossible.

If only your front teeth are left, say three or four or more, we can replace all those that have been lost on both sides, clear back, with perfect Alveolar teeth, whilst bridgework would be impossible even if you had eight or ten front teeth to tie to. If you have only two back teeth on each side, say molars, we can supply all the front teeth that are missing with beautiful, serviceable, life-like Aiveolar teeth. This could not possibly be done by the bridge route. And where bridgework is possible there is no comparison between the two. A very large percentage of our work is laking out bridgework put in by supposedly high-class dentists, and replacing it with the beautiful and artistic Aiveolar teeth. And, unlike bridgework in another respect, it is practically painless. No boring or cutting into the gums, nothing to be dreaded. Now, then, prices being equal, which would you choose?
