New Styles in "Modart" Corsets

The world extends its admiration, not to those who accomplish what no one else attempts, but to those who do best what others do well.

In years gone by corsets have been designed which gave the wearer a certain degree of comfort; others were produced which, though possessing fashionable lines, inflicted upon the wearer much discomfort. While rapid strides have been made, never before have style, comfort and health been so ably safeguarded as in the "Modart Improved Front Laced" Corset.

Front lacing itself is not new, but front lacing the "Modart" way is, and the beautiful body curves created by this exquisite corset have hitherto been unapproached.

The chief aim of the manufacturers of the "Modart" Corset has been, and is, to offer a corset which, instead of hiding woman's greatest charms of figure, will, on the contrary, accentuate the same, with full regard for her comfort and health. The other important result—that of obeying Fashion's dictates—is attained at the same time, for a corset which will at once conserve and reflect woman's natural graces produces the very effect which style-seekers desire.

No sculptor ever took greater pains to produce perfection than did the designers of "Modart" Corsets, and the end well justifies the effort, for new as it is, the "Modart Improved Front Laced" Corset is widely known and loved by thinking women.

Our corsetieres will be pleased to advise you on the subject of proper corseting.
