PITY FOR QUADRUPLETS' FATHER GETS MRS. WILSON SOME CHILDREN BACK

Los Angeles Woman Who Perpetrated Grotesque Hoax Finally Wins Victory in Court—Majority Loses in Special Election on City Hall Project—Wedding of Note.

LOS ANGELES, July 9.—(Special).—Next to the right at Reno and the special election, Mrs. W. W. Wilson and her hoax babies have held the center of the stage in Los Angeles for nearly a week. In spite of the indignation shouted from the houseboats by the good people of this city when it was discovered some months ago that the quadruplets of which Mr. Wilson was so proud, thinking them his own offspring, were bogus and had been gathered here and there from unfortunate women by a woman who made it her business to furnish babies to make happy the homes of childless couples, there was a sense of pleasure when the court decided that Mrs. Wilson could keep several of the hoax babies—both of the "quads" and of twins and triplets that had previously made the Wilsons happy.

of Chicago and of this city—physicians of reputation—who filed records of birth in the various cases, although the little ones had been brought from other homes. Mr. Wilson was hoaxed; he thought in every case that the children were his own. And he was proud of his fatherhood and happy. Triplets once and twins twice had made the Wilsons happy. It was the last and greatest call several months ago that caused her to have brought into her home the four babies, tiny little ones, whose little red faces and downy heads caused the woman the holiest of joys. She fondled and loved them for a few days and then came the disclosure of their identity and they were taken from her by the courts to be mourned by her as though she had lost her own.

Two little prayers do my darlings each say: Two times do they kneel at my side each day. Two little angels guarding their bed, One at their feet and one at their head.

Business men of Los Angeles are rejoicing over the establishment of direct steamship service between this city and Portland, for it means much to Southern California. It will aid greatly in developing the fruit and vegetable trade between this city and the Northwest. Produce jobbers are particularly jubilant and a canvass of the wholesale district shows the opinion is unanimous. J. C. Richardson, head of one of the principal produce houses here, said: "Good steamer service between Los Angeles and the Northwest is just what Los Angeles has needed for a long time. It will make possible the shipping of much early fruit and vegetables. Southern California always produces vegetables and fruit earlier than any other section and with good shipping facilities could build up an immense exporting business with Portland and other Northwestern cities. The same principle applies in the shipping of potatoes South from Oregon. At present it sometimes takes ten days to bring potatoes from Northwestern points to Los Angeles. If the new steamship line does what it says it will, we can bring produce South in half that time. If the service is quick and frequent enough it may be possible to ship our early strawberries North in the Spring by steamer, thus avoiding the heavy express charges. The steamship line will handle the bulk of the produce trade between Los Angeles and the Northwest from its first sailing, I believe."

man in the city. Special arrangements have been made and are being made for the handling of the cargoes from the North and for loading the harbor. Majority Loses Election. The result of the election and the "Goo-Goo" victory are history now, but one feature of the election has made many citizens wrathful. 16,474 votes were cast favoring the sale of the old City Hall so that the city can build a new one large enough to house the various departments on the ample block recently purchased by the city opposite the new Federal building. Against the proposition were cast only 11,760 votes; but as it required a two-thirds vote the majority lost.

Arizona Brought Near. Word comes from the heart of the Mojave desert of the success of two former Los Angeles school teachers, the Messes E. Rendleman and Anna M. Gibson, who a year ago were teaching the young idea how to shoot. They were struck by the prospects of Government land and each took up 160 acres on the desert. With more fortune than many men display and the same quality that characterized the pioneers of earlier days they have stuck to their work until now they thoroughly enjoy it. They built their own houses and dug their own wells without man's aid and are as independent as human beings can be.

Former Teachers Win Wealth. Their homes, rough on the outside, are as attractive as any city bungalow within. They have been artistically furnished—largely with desert furnishings. Yucca blossoms preserved with wax and pine cones have been used with pleasing effect. The young women first planted a small vegetable garden to supply their own needs. They worked together, their houses being within a stone's throw of each other, and at present one well supplies the two ranches. Their garden is producing and the young women are now devoting themselves to clearing the remainder of their land of sagebrush and cactus. As yet not a man has done a stroke of work on either ranch. The vaqueros to the north have been anxious to be of assistance, but their offers have been declined. No ranchman passes their places without stopping for a call. One whose intentions were suspected was given a delightfully clear object lesson when on the occasion of a visit a hawk swooped down on the chickens about the yard. One of the young women seized her rifle and with unerring aim picked off the

Mrs. Wilson Arouses City. The woman's desire for children was so pathetic, so appealing in its intensity that it moved even the physicians
