

PROSPECTOR'S "STRIKE" BECOMES BIG MINE

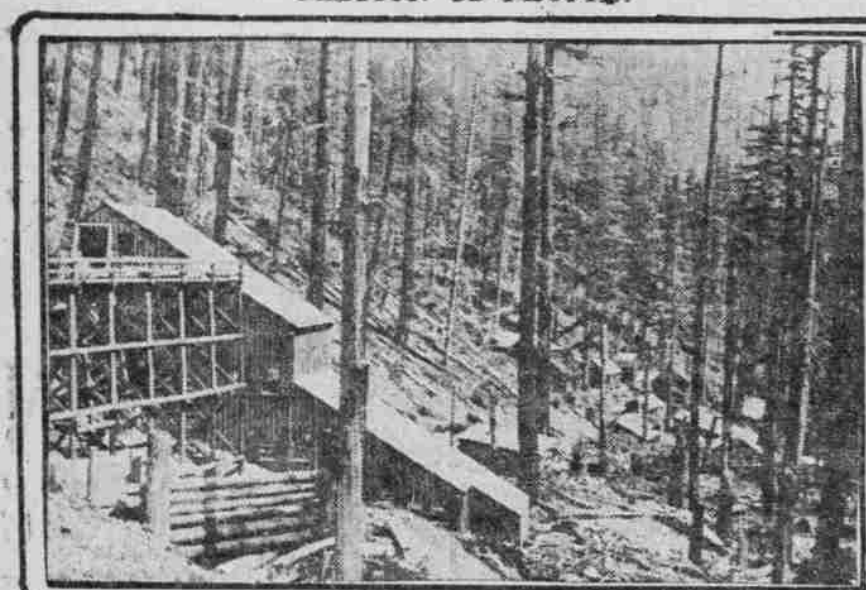

Modern Milling and Smelting Plants Developing Great Copper Ledges on Shirt Creek, in Lower Skamania County.

SECTION OF FLUME.

ASSAY OFFICE & MR. MABEE'S CABIN.

MILL & PART OF TRESTLE - STABLES AND DWELLINGS IN DISTANCE.

PORTAL OF SOUTH TUNNEL.

SCENES AT THE MINE OF THE WASHOUGAL GOLD & COPPER MINING COMPANY, SKAMANIA COUNTY, WASHINGTON.

A lone prospector wandering through the rugged hills near the headwaters of turbulent Shirt Creek in lower Skamania County, Washington, a few evenings ago, was startled to hear the soft, sweet strains of Verdi's classic "Rigoletto" floating on the still twilight air. He paused and listened, for such sounds as these he had never heard in that untraveled region before. Spellbound by the music he waited a while, then started in the direction from which the sounds seemed to emanate.

His trained feet and sturdy limbs quickly carried him through the tangled underbrush and jagged rocks that lay between him and the source of the charming notes. Soon he stood at the entrance of a long, airy dining hall brilliantly illuminated with electric incandescent lamps, and a square upright box whose highly polished sides shone brightly under the glare of the lights, standing in the center of the room. Around it was gathered a group of 50 or more bright-faced, horny-handed miners clad in the picturesque garb of their profession. As soon as they spied him they bade him a hearty welcome.

Music Cheers Workmen.

He was in the camp of the Washougal Gold & Copper Mining Company. The piece of furniture which had arrested his first attention was a mahogany "amberola" containing the finest instruments that can be placed in the manufacture of such a machine. This accounted for the music that he had heard far up on the hillside.

"The cheery disposition of the men and the kindly attention that was shown him soon placed him entirely at ease. He began to ask questions. "What is the cause of all this?" he inquired.

"For an answer one of the men, with a jerk of his head, indicated a little, smooth-faced, ruddy-cheeked, gray-haired gentleman who sat in a high-backed chair behind him. He turned to him and with his arms crossed and with his back to the camera, he began to speak in a clear, confident voice. "This is Mr. Mabee," said one of the men who had acted as spokesman. The quiet gentleman stepped forward. He shook the prospector's hand and told him to make himself comfortable. Victuals and drinks were soon placed at his disposal.

Property Well Equipped.

The company of which Mr. Mabee is the head, owns and operates one of the best equipped and most promising mining properties in the Pacific Northwest. Two tunnels and a complete stamp mill are in steady operation. All the accessories that are consistent with practical and economical mining have been provided, both under ground and on the surface.

At present the principal mineral showing is in the south tunnel which has been driven about 650 feet to the breast of a west drift started 519 feet from the portal. The entire drift has passed through a solid bed of mineral averaging seven feet in width. The vein is a fine fissure in the country rock which seems to be a porphyritic substance of unquestioned volcanic origin.

Geologists are not variance as to the origin of the mineral contained in the fissure. Mr. Mabee and other experts who have examined the property declare that it was caused by an upheaval from the interior of the earth while others contend that the ore was deposited there by surface streams of aqueous past.

Copper Values Predominate.

The streak has a visible outcrop on the surface which exposed to the elements, has oxidized to a depth of probably 100 feet. The copper, which is the principal metal in the ore, has leached away from the oxidized.

feet of workings. A vein was cut about 570 feet from the portal. This has been followed westward for a distance of 747 feet, but the present work is being done in an upraise about 400 feet from the tunnel. Near the breast it can easily produce 50 tons per day. The vein here is of the same nature as that on the south hill. It has been quite extensively worked, but when its size is considered, comparatively little has been done there.

The main north tunnel is about 800 feet long. Near the breast a vein has been sunk 65 feet. This is 1 1/2 in the clear and is cased with a double compartment shaft and equipped with a 12-horsepower hoist, a sinking pump and drainage pump. Mr. Mabee is arranging to sink this vein to a depth of more than 1000 feet. It remains to be seen how far it will run out a level every 100 feet.

At various places along the west drift of the north bore stopes and upraises have been driven. Ore has been taken from all of them. The vein in the north hill is not so wide as the other, averaging about four feet, but with it has been gained with distance.

Both veins pitch into their respective hills. The hanging wall in the north vein is almost vertical at some places.

Timbering Not Necessary.

A feature that has eliminated much cost in the development of this property is the substantial condition of both walls of the veins, which precludes the necessity of timbering. However, should timbers be needed in the future they can be secured with ease, as all of the company's property is heavily wooded.

Wood is burned under the boilers and is used for heating, a small force of men being constantly engaged in felling and cutting it. All of the buildings and much of the furniture in the living apartments of the men have been constructed from timber cut on the ground.

Under the present year the ore produced from the two tunnels was stored. Hauling is expensive and the company has a mill in contemplation. Henry Johnson is superintendent of all underground work.

Early this year the mill was completed. It is a thoroughly modern and fully equipped with every item of machinery necessary for the rapid and complete separation of the mineral from waste material. Fortunately the property is so situated that the mill can be operated on a gravity system. The ore is carted from the mouth of the north tunnel to a common track and trestle to the top of a four-story mill, where it is thrown into the 100-ton hopper. From there it successively passes through a 750-lb. jaw crusher, three 1400-pound Nissen stamps with 40-mesh screens, over three six-foot amalgamating tables, a Pierce amalgamator, a hydraulic classifier, and the slime over a Frue-Vanner rubber belt, while the coarser material goes across a modern Wilfley table. The installation of a second Wilfley table and a set of Huntington rolls is a possibility of the near future. When running full for 20 hours per day, the mill will handle about 100 tons of ore.

Smelter Is on Ground.

Of the present production one ton of concentrate is obtained from each eight ton lot of ore. A recent strike in the south tunnel which contains the heavy deposit of copper may give a ton of concentrate in each six-ton lot. The material that goes to the smelter, therefore, will be worth from \$200 to \$300 per ton. The mill is in charge of William McFarland of Portland and Frank Kerwin.

A complete smelting plant has been purchased and is on the ground. It will be set up and started in operation as soon as possible. In the meantime the concentrates will be stored in a building constructed for that purpose. "Nothing but the pure bullion will be hauled out of here," says Mr. Mabee.

The surface property, in addition to the mill, again exhibits the disposition of the company to purchase nothing but the best. It consists of two 40-horsepower steam boilers, well housed; two 10x12 air compressors, one 25-horsepower steam engine, one air receiver, a hot water feed, a four-foot Pelton water-wheel, a four-foot sawmill, a two-foot slab saw, a 15-horsepower logging engine, a Jones-Corliss mill blower and a three-foot fan blower. Steam to operate the mill is conducted in a three-inch pipe encased in sawdust.

Electricity for use in the entire camp is provided through a 15-kilowatt generator attached to the engine at the mill. Every building in the place is

equipped with lights and the men have an incandescent bulb to light their paths through the bowels of the earth while at work under ground.

The camp is additionally equipped with blacksmith shop where the tools are sharpened and repaired and where the half score of horses in use there are provided with shoes. This building, like all the others, is substantially constructed.

Assay Office Completed.

One of the most complete assay offices ever set up, has just been completed. All the samples as well as the concentrate samples are run through there. This work is in charge of Mark Harris, a graduate of the Michigan College of Mines and an assayer and metallurgist of many years experience. He also acts as bookkeeper for the company. While a civil engineer is not regularly employed all the tools that a man of that profession requires in his work are on hand. A draftsman's table and a complete set of instruments are also a part of the company's property.

The mechanical work is in charge of Miller Masterson, who has superintended the construction of most of the buildings and whose genius has resulted in the plant being so arranged as to prevent unnecessary loss of time and labor in all departments.

Recently Sullivan air drills were installed in both tunnels and under favorable or average conditions they cut 40 feet per week. The south tunnel is 4 1/2 by 7 for the first 400 feet, after which it is the size of the south tunnel. The rock is comparatively soft and the eight holes are necessary for a round of shots. Standard 40 per cent dynamite is used. With the force that it is possible to exert on the blower and the fact that the smoke and fumes in less than 10 minutes after a shot, both tunnels are equipped with steel rails and adequate drainage channels.

Water Supply Generous.

An additional source of water is a flume tapping Shirt Creek far up in the hills. It is run for a distance of a mile along the side of the north hill immediately above the camp it is stored, the pressure thus obtained operating the water wheel. This power is turned into the main shafting of the mill joined with that from the steam engines.

The protection and a complete water works system for the camp are maintained from the storage water. Large quantities of hose and tape at convenient places have been provided. The men practice fire drills. This system has resulted in an appreciable reduction in insurance rates.

Since the start of operations two ten-hour shifts have been worked, giving employment to about 40 men. Beginning with October 1, however, the entire plant will be placed on an eight-hour basis, working a proportionately larger number of men. The quarters of the laborers and mechanics are unusually well appointed, but the most lavish comfort has been expended and daily is being expended in the mammoth dining hall and kitchen.

The latter compartment is equipped with an immense steel range and all the utensils that are to be found in a modern hotel. The kitchen floor is of cement, in keeping with the company's policy to maintain a healthful sanitary standard.

Two tables, always covered with snowy white cloths, run the full length of the dining hall. Porcelain dishes are provided. Much silverware graces the tables. Of the fare itself the healthy and satisfying appearance of the men and the eager, yet ordinary manner in which they answer the call to meals gives convincing testimony as to its palatability and the quality of the food.

It is in the dining room that the music box, a recent acquisition to the entertainment features of the camp, has been installed and it is here that the men gather to while away their spare hours. A library of standard and popular works will be added before the arrival of winter. As wings to the dining room will then house the reading and musical material.

All these improvements have grown up during the past ten years. It was only ten years ago that Mr. Mabee, then only a prospector, started the first tunnel in the hillside more than 200 feet above the present north bore. He drove his first tunnel over 400 feet, caught the ore and found that it extended down into the

hill. Then he started a new bore as low as possible and almost at the edge of the stream at the base of the hill. In the meantime he had been developing the opposite mountain and proceeded in a similar way there.

Locator Shows Faith.

Mr. Mabee himself located all but one of the group of 50 claims comprising the group now held by the company. This one he purchased.

Five teams of horses now carry the supplies from Cape Horn, on the P. & S. to the camp, a distance of 16 miles. A railroad to tap the neighboring logging camps is now being built, and a line will be extended to the mine. The first locomotive which is expected to sound in those hills early next Spring.

Mabee Holds Control.

The Washougal Gold & Copper Mining Company is incorporated for \$1,000,000. Mr. Mabee holds a controlling interest, and says he has no stock for sale. John Schaeffer, a graduate of the Michigan College of Mines and an assayer and metallurgist of many years experience, is vice-president of the company. James B. Jordan, of St. Louis, is secretary. Small blocks of the stock are held in Portland.

Many expert mining men have visited the improvements, and other local men for the most valuable in this region. Colonel J. H. Plisk, who died in Naples a few years ago, made a thorough examination of the place in 1886, and prepared an exhaustive report. He recommended it highly as a most promising proposition. Recently George Lawrence, Jr., a well-known business man of Portland, visited the property as a guest of Mr. Mabee. He was surprised at the extensiveness of the improvements, and other local men frequently go there with the president, who has an enthusiasm over the possibilities of the mine that is exceeded only by the virtues of the property itself.

FUNERAL NOTICES.

BLACK—July 29, William D. Black, aged 73 years, father of Rev. H. Black and Dr. R. G. Black, of Vancouver, Wash. Regular services at St. Francis' Church, East 11th and 12th streets, Monday, August 1, 9:30 A. M. Friends can view the remains at Dunsmuir & McKenzie's chapel.

MARSHALL—July 29, 1910, 24 Skidmore st., Mrs. Mary A. Jackson, aged 63 years. The funeral will be held at St. Lawrence's Church, Third and Salmon streets, at 2 P. M. Sunday, July 31. Remains at St. Mary's Church, Third and Salmon streets, at 1 P. M. today (Sunday), July 30. Friends invited to attend.

WALKER—Friends are respectfully invited to attend the funeral services for the late P. Walker at Dunsmuir & McKenzie's chapel, 108 1/2 Commercial, at 10:30 A. M. Interment Riverside Cemetery.

MARSHALL—In this city, July 29, at good St. Vincent's Hospital, July 29, Mary A. Jackson, aged 63 years. The funeral will be held at St. Lawrence's Church, Third and Salmon streets, at 2 P. M. Sunday, July 31. Remains at St. Mary's Church, Third and Salmon streets, at 1 P. M. today (Sunday), July 30. Friends invited to attend.

WISDOM—In this city, July 29, at the family residence, 608 Glisan st., Sarah Frances Wisdom, aged 85 years. Friends invited to attend the funeral services, which will be held at Holman's Funeral Parlors, Third and Salmon sts., at 2:30 P. M. today (Sunday), July 30. Interment Lone Fir Cemetery.

HUNT—In this city, July 27, Alonzo H. Hunt, member of the Grand Lodge, No. 125, L. O. E. S. (Sunday), under the auspices of the Grand Lodge, at 2:30 P. M. today (Sunday), July 30. Friends invited to attend the funeral services, which will be held at Holman's Funeral Parlors, Third and Salmon sts., at 2:30 P. M. today (Sunday), July 30. Interment Lone Fir Cemetery.

TONSETT FLORAL CO. MARRIAGE FUNERAL DIRECTORS. 714 and 716, Phone Main 440, Lady Assistant, Office of County Coroner.

GENERAL RELIEF COMMITTEE, L. O. E. S. All members are requested to meet in Oddfellows' Temple, First and Alder streets, today (Sunday) at 2 P. M. sharp, to attend the funeral of our late brother, H. Hunt, of Graham Lodge, No. 125, L. O. E. S., from Finley's, Interment Riverside Cemetery. J. JAMESON, Sec.

FORESTERS OF AMERICA—Members of Court Mt. Hood No. 1 are hereby requested to meet at our hall, Marquam bldg. today (Sunday) at 2 o'clock P. M. sharp, to attend the funeral of our late brother, Alonzo Hunt, of Graham Lodge, No. 125, L. O. E. S., from Finley's, Interment Riverside Cemetery. E. BAIRD, Secy.

ROYAL CIRCLED will give a white and 500 social Wednesday, Aug. 3, at 125 11th, W. O. Temple, Dancing. Admission 1c.

DIED. FOSTER—At the Seaside Sanitarium, Seaside, Or., Ida Adele Foster, beloved wife of Robert W. Foster, and mother of Mrs. J. E. Wolff and Mrs. W. E. Williamson. CLANCY—Daniel W. Clancy, July 29, age 70 years. Remains at Dunsmuir & McKenzie's chapel. Funeral notice later.

HOUSEHOLD NEEDS. Coal Richmond and Wallend Australian Independent Coal & Ice Company, opposite City Library. Both phones.

OREGON HUMANE SOCIETY OFFICE, CITY HALL, MAIN 996, A 7889. HUMANE OFFICER, EAST 4712.

NEW TODAY. Auction Sales Geo. Baker & Co. ON TUESDAY NEXT at Baker's Auction House, 152 Park St. We have the fine furniture, etc., removed from private homes on Halsey and Tillamook streets with instructions to sell the same at public auction, comprising rich-toned Upright Pianos, mahogany cases, two lavatories, library tables in golden and mission finishes, several costly library rockers and chairs, electric piano, reading lamp, parlor, rockers and tables, and Singer Sewing Machine, dining-room furniture, one suite in golden and one in early English finish, white and gold china, very massive all brass bed, several steel and iron beds, best spring and silk-floss rubber mattresses, dresser, wash chiffonier, Axminster and Brussels rugs, body Brussels carpets, hall rack and coat closet, and other household necessities, paintings, new style Garland gas range, gas plates and oven, drop-leaf tables, kitchen sink, granite ware, etc., etc. The above furniture is modern and will be sold on Tuesday next at 10 o'clock. On view tomorrow.

ON THURSDAY NEXT We have the neat furnishings of cottage from the Heister family. These goods can be seen Wednesday afternoon. Call on Thursday at 10 A. M. GEO. BAKER & CO. Auctioneers, 152 Park St.

Auction Sales AT WILSON'S AUCTION HOUSE Corner Second and Yamhill Regular Sales Days. Monday, Wednesday, Friday Each Day at 10 A. M.

We are headquarters for all kinds of good second-hand furniture, carpets, steel ranges, refrigerators, typewriters, etc. also office desks, chairs, typewriters and stands, broom safes, show-cases, sewing machines, etc. "Standard" makes in first-class condition, pianos, organs, etc. including complete sets of Century Dictionary, and other valuable works. If you need anything don't fail to give us a call, as we carry the largest stock of little-used goods on the Coast.

J. T. WILSON, Auctioneer. Cash paid for furniture, stocks of merchandise, etc. Call Main 1625, A 4243.

Gift Open for Two Days Only CHOICEST LOT ON East Ninth Street Between Tillamook and Thomson, 50x100 feet.

MACLEOD & NEILL 429 Henry Bldg. S. L. N. GILMAN, Auctioneer 126 Second Street, Between Washington and Alder. SALES OF HOUSEHOLD FURNITURE, ETC., TUESDAY AND FRIDAY.

This week we are selling a large stock of furniture, also the stock of general store from Lexington, Oregon. Sales at private sale at all times. Auction sale Monday, all the goods must be sold at once. Salesroom No. 126 Second St.

S. L. N. GILMAN, Auctioneer. Ladd's Addition \$6000—New 6-room and finished-attic house, everything in modern and complete; hardwood floors. Easy terms. \$5000—New 6 rooms and attic, oak floors, every modern convenience; well built. Easy terms.

F. W. TORGLER 106 Sherlock Bldg. Excellent Buys \$11,500—Business corner close in, West Side, bringing \$100 a month. \$5000 for an elegant, highly improved tract on Carlisle. Nothing as cheap around Portland.

F. FUCHS, 221 1/2 Morrison St. Bargain for Cash Portland Heights, 100x112, grand view, cannot be obstructed; excellent neighborhood; all the advantages of bracing mountain air, with the conveniences of the city. Only \$4200; 10 days' time to sell to neighbor if desired. Main 3551.

Immediate Loan Wanted \$15000 wanted on excellent farm of 115 acres, yielding \$15,000. Will pay 5 per cent interest. High-grade improvements. Land values constantly increasing because of growing demand. Address All 165, Oregonian.

ROY wanted to learn plumbing trade. Call at 751 Northrup st., cor. 23d at 5 P. M. COMPETENT second girl at 770 Marshall st.

NEW TODAY. HALF BLOCK EAST THIRD And—BURNSIDE For a short time at A Very Low Price.

APARTMENT SITE QUARTER BLOCK Southwest corner 28th AND RALEIGH \$6250

QUARTER BLOCK EAST PINE Close in and income-bearing. A great bargain at \$8500

SMITH'S AGENCY 105 Sherlock Bldg.

Hawthorne Lots We offer a few 50x100 building lots one block south of Hawthorne ave., facing either 41st or 42d st., for \$1000 each on terms to suit buyer. Ten dollars monthly will do. These lots are finely located for building, but a few minutes' ride from the city over the new bridge. Any one at all familiar with the doings along Hawthorne ave. know that these lots will increase in value rapidly when the Madison bridge lets the fast, wide-gauge cuts across to go whizzing down magnificent-aved, double-tracked Hawthorne ave. These double-tracked Hawthorne ave. lots are only temporary prices and terms. The wide-awake investor will secure one of these lots now and reap the advantage of it quickly advancing prices. On the terms offered any one can carry one of these lots.

ON THURSDAY NEXT We have the neat furnishings of cottage from the Heister family. These goods can be seen Wednesday afternoon. Call on Thursday at 10 A. M. GEO. BAKER & CO. Auctioneers, 152 Park St.
