The New Spring Suits
Are Deserving of Special Mention

With eagerness are women awaiting news of, and the appearance of, the New Spring Suits. Fashion's dictates are splendidly answered in the first arrivals of Tull & Gibbs' Suits—styles and materials that have delighted and found instant favor with those who have seen them. Noted in the new arrivals of the past few days are suits cut on the severely tailored lines—models that will lead this Spring. Short length skirts, many with Empire tops and cut on straight lines are style features that are in Fashion's highest favor. Coats are short—vary in length from 22 to 26 inches. Many show low fastenings with sailor or shawl collars. Charming, too, are the materials—the mannish effects, the panamas, the homespun, tweeds and serges—they are delightfully introduced in the models already being shown here.

The New Idea Gas Ranges

Are Finding Their Way Into Many Portland Homes

And there are reasons—and many of them, why these modern Ranges are finding favor with all who have seen and are using them. The rich dead black porcelain finish, the white porcelain broiler pans and clean-out trays, the "New Idea" design and construction, are some of their meritorious features. In them do housewives find the ideal gas range. The complete line shown in the Basement Store.
