BERLIN FINDS VENT

Proposed Sale of Milwaukee Stock in Berlin Cause.

TARIFF IRRITATES SPEAKER

Conservative Leader Says Investment in Foreign Stock Raises Interest Rate and Americans Show Hostile Spirit.

DIVIDENDS SAID TO BE PADDED

Count von Kanitz said today: "The movement of capital out of the country necessarily raises the interest rate in Germany. The big banks prefer bringing out foreign issues to exploiting German loans owing to the bigger profits thus secured. It is astonishing with what carelessness second-rate foreign paper is admitted to the German market. The securities of the Chicago, Milwaukee & St. Paul Railway belong ostensibly to the best class of investments and pay 7 per cent, but it is asserted, without contradiction, that this railway recently shows reduced earnings, and that its dividends are kept up to 7 per cent only in order not to discredit the large sums placed in Germany. The same other American securities show fluctuations unknown in Germany. "Why do not Germans keep these securities for themselves? They have more money than we have. They do not find any railway material in Germany. Their high tariff renders this impossible, and the Payne tariff law permits of raising the rate against us to a maximum of 100 per cent."
