### HARMONY SETTLES FENDER QUESTION

Officials of Street Railway Company and Safety-Device Men Agree.

BE INSTALLED

President Josselyn Pleased With Tests Undergone by Nelson Appliance-Extension of Time

to Be Asked.

It was announced yesterday that differences between the Portland Railway, Light & Power Company and the Amer-

Light & Power Company and the American Automatic Fender Company have been adjusted and that the manufacture of the Nelson air-controlled fenders, for installation on the Portland cars, will be begun immediately.

This resulted after a series of conferences last week between B. S. Josselyn, president of the local street railway company, and F. E. Manchester, Portland representative of the fender company. C. M. Clark, of Philadelphis, one of the principal stockholders in the Portland Railway, Light & Power Company, also took an interest in the settlement of the fender problem on his recent visit to Fortland.

Under the terms of the agreement reached yesterday, 160 Nelson fenders will be installed on the Portland street cars as soon as they can be manufactured. These fenders will be distributed over all the lines of the city for the purpose of a thorough test, with a view to making any changes or improvements in construction that may be found necessary or advisable, before equipping the remainder of the cars here. equipping the remainder of the cars here.

On account of the narrow-gauge tracks, sharp curves and grades on several of the lines, it will be neces-sary to manufacture special equipment for Portland, and the designs and specifications for the fenders will be passed on by the officials of the Port-land Railway, Light & Power Company before the entire contract is carried

Josselyn Is Pleased.

Mr. Josselyn expressed his gratifica-

ar. Jossacyn expressed as granted tion over the settlement of the long-drawn-out fender controversy.

"I am free to confess," he said, "that a recent examination of the Nelson fender has given me a better impression of it than I had, and if it will do the work that its inventor claims for the work it, we will certainly want it on all our

it, we will certainly want it on all our cars at the earliest possible date.

"It is admitted by Mr. Nelson himself that the fender is now undergoing certain changes and improvements, and this alone justifies us in contracting for only a part of the equipment at this time. We desire to give the citizens of Fortland the best fender to be found, and we want to have the advantage of all the latest improvements and modifications when we equip our lines with a safety device of this kind.

"Our objection has been not so much to the Nelson fender as to the projecting type of fender. We have felt that on account of the narrow streets and sharp curves, as well as the crowded traffic conditions, a wheel guard was

traffic conditions, a wheel guard was preferable to a projecting fender for service in Portland. However, the citizens of this city may be expected to become accustomed to the projecting fender, and when they do, one serious objection to the Nelson fender will

have been overcome."
Mr. Manchester said he believed the understood regarding the fender question, as he experienced no difficulty whatever in arriving at a satisfactory settlement as soon as he took it up

### Differences Found Trivial.

"I found," said Mr. Manchester, "that he was perfectly willing to comply with the terms of the ordinance, and that the differences between the street railway company and the fender com-pany were really unimportant."

It will be impossible to comply with

that provision of the fender ordinance which requires all cars to be equipped with fenders by July 1. It is therefore likely that a new ordinance will be presented to the City Council al-lowing a reasonable extension of time for installing the equipment. The new ordinance will also prescribe suitable fenders for the magnetic brake cars, the nonair cars and the large inter-

urban cars operated here.

For more than three years tests of fenders and wheel guards have been conducted on the testing grounds at Twenty-sixth and Upshur streets under the direction of the Mayor and City Council. More than 30 different devices were demonstrated and tested. Many bushels of sand and sawdust were scattered about the grounds as numerous dummies were ground to pleces by the fenders or the wheels

Finally, last October, the subject was settled by the passage of an ordinance adopting the Nelson air-controlled au-tomatic fender for use on all air cars. An ordinance is pending for the adoption of what is known as the Hunter wheel guards for all nonair cars, and the pilot type of fender for use on the large interurban cars op-erating in Portland. It is probable that an entirely new ordinance will be presented, covering all three types of fenders in the one ordinance. This ordinance will also probably allow a reasonable extension of time beyond July 1 for the installation of fender equipment on the Portland streetcars.

### MAYOR'S STAND APPROVED South East Side Commends Action on

Bridge Penalties.

Mayor Simon is receiving the solid support of the South East Side in his declaration that he intends to demand the full penalties for delinquencies on the Hawthorne bridge from the con-tractors. The Seventh Ward Improvement League and the Waverly-Rich-mond Improvement Association have unanimously adopted resolutions favoring his stand and asking that the fines be levied according to contract. The Waverly-Richmond Association

on the river bridges, and branding as untenable the position of the War Department that river traffic must have the right of way at all times.

Way.

"There is no other food that agrees with me so well, or sits as lightly or pleasantly upon my stomach as this does.

threatening to kill was placed against the peddler. Yesterday's appearance was his fourth for depredations on the Schmeer premises.

## TAPESTRIES ARE SHOWN

TEXTILES PROVE POSSIBILITIES

OF AMERICAN ART.

Exhibit With Domestic Subjects as Inspiration Is Open-Mezzotints Are on Display.

Under the auspices of the Arts and Crafts Society of Portland two exhibitions have been brought here-one from the looms in the factory of Albert Herter, of New York, and the other from London. The textile exhibition in the rooms of the Arts and Crafts in the rooms of the Arts and Cratis building at Seventh and Salmon streets until March 25 is a beautiful collection of tapestries for draperles, upholstery purposes and floor coverings, all Amer-ican-made, with American animals and ican-made, with American animals and plants for patterns. The principal idea which Mr. Herter is endeavoring to bring forward in his work is that American art may be of as high a quality as anything in Europe. Though he has been energetic in furthering the interest of the artistically inclined and the Europe interest of the principal of the Europe interest of the artistically inclined to the Europe in the Eur the interest of the artistically inclined in all the Eastern cities in behalf of his efforts and has sent samples of his work to all the large cities of the Atlantic Coast, this is the first time that the exhibition has been seen west of Chicago, and immediately after it is seen here it will be returned to New York.

Only through the personal efforts of

Only through the personal efforts of Mrs. Henry Ladd Corbett, who is well acquainted with the artist, was it brought here at all. Albert Herter is one of the foremost textile artists in the world and is known as the best in-terior decorator in America. ### HONEST CONFESSION A Doctor's Talk on Food

There are no fairer set of men or earth than the doctors, and when they find they have been in error they are

usually apt to make honest and manly admission of the fact.

A case in point is that of a practitioner, one of the good old school, who lives in Texas. His plain, unvarnished tale needs no dressing up:

"I had always had an intense prejudice which I can now see was unwar-

dice, which I can now see was unwarrantable and unreasonable, against all muchly advertised foods. Hence, I never read a line of the many 'ada' of Grape-Nuts, nor tasted the food till last Winter.

"While in Corpus Christi for my health and visiting my youngest son.

health, and visiting my youngest son, who has four of the ruddlest, health-iest little boys I ever saw, I ate my first dish of Grape-Nuts food for sup-

per with my little grandsons.
"I became exceedingly fond of it and have esten a package of it every wee... since, and find it a delicious, refresh-ing and strengthening food, leaving no ill effects whatever, causing no eructa-tions (with which I was formerly much troubled), no sense of fullness, nau-sea, nor distress of stomach in any

"I am stronger and more active since I began the use of Grape-Nuts than I have been for 10 years, and am no longer troubled with nausea and indigestion." Name given by Postum Co., Battle Creek, Mich.

Sentenced to Serve 30 Days.

the Hudson of the late E. H. Harriman was designed and executed by Mr. Herter. He uses the looms decided by the French to be the best and employs both French and Flemish workmen.

Yesterday was the formal opening of the exhibition in Portland and was largely attended by society and articioning folk of the city. The rooms of the Arts and Crafts Society were adorned with the Herter samples, some radiant with brilliant blues and golds, others duller and with the touch of age upon them, causing them to appear as do the beautiful draperies seen on the eastern side of the Atlantic in art collections and museums, and still others with the dainty tints of Chippen-dale and even Japanese tones, so varied

are they in detail.

Besides this exhibition there is another collection which was shown in Portland for the first time yesterday. This is composed of several proofs taken from plates of mezzotinting work which is so popular new in Engage. work, which is so popular now in England and is an art known only to the English. By this process of mezzo-tinting Stevenson, Gulland and other artists offer almost perfect reproductions of the masterpleces of the sixteenth and seventeenth centuries' art of Reynolds, Gainsborough and Law-rence. There are at the Portland Arts and Crafts headquarters 75 of these exquisitely colored and perfect pictures which will also be here for the view

### THE WORLD'S GREATEST The Neal DRINK HABIT CURE Three Day

HAS MILLIONS OF DOLLARS INVESTED

## **NEAL THREE-DAY CURE**

## Government, Official, Individual Endorsements

Wherever the sun shines there are countless thousands of human beings who are daily and nightly waging an uneven and losing warfare with the demon—ALCOHOL. They would like to escape from his thraidom, but with their poisoned bodies and brains they are powerless to do zo.

If such persons and their friends only knew how easily, surely, and quickly many thousands of good men and women have been perfectly and satisfactorily cured in the short space of time of only three days by the Neal treatment they would gladly and promptly accept the opportunity offered. They are skeptical and incredulous—they forget that we are, and have been living in an age of unparalleled and wonderful progress and advancement; that the lightning express of today actually annthilates dietance as compared with the stage coach of our fathers; that medical skill and science have kept abreast of the times, and that, therefore, it is not surprising to know that Doctor Neal, after many years exclusively spent in study, experimont, and investigation of alcoholsem, its cause, effect and cure. has originated a treatment which antidotes, neutralizes and eliminates the poison of alcohol from the system and cures the drink habit, giving the same and better results in three days than has been given to the many afflicted thousands by the old-time cures of ten to fiftiv years ago, with their hundreds of painful and dangerous hypodermic injections and requiring from three to seven weeks' time of the patient. On account of the long time required—but later have spared the time to attend their own funeral.

First: THE NEAL INSTITUTE located at 354 Hall street, in this city, is one of a mighty chain of Neal Institutes—life-saving stations—in which thousands are annually rescued and save from the curse of drink, extending from far-off Australia to the eastern shores of this continent. In this country the Neal treatment is administered at 354 Hall street, in this city, is one of a mighty chain of Neal Institutes—life-saving stations—in which thousands are annua

Francisco and Los Angeles, Cal. In Canada Neal Institutes are established in every province from coast to coast. In Australia the government has officially indorsed and adopted the Neal treatment and is administering the same to hundreds of patients in a government institution established for that purpose. Many other institutes are contracted for and will be established in the United States and foreign countries at early dates.

Second: FINANCIAL STANDING. The National or parent company, known as the NEAL INSTITUTE COMPANY, which stands not only at the head but back of all local companies, is a corporation authorized by law with a paid-up capital of one million dollars, owned and controlled by a representative class of business and professional men, with its financial and business management in charge of Hon. James E. Bruce, for nine years a State Senator, a banker, a man of large means and high standing in the professional and business world, and the medical department in charge of and under the supervision of Dr. Benj. E. Neal, the originator of the treatment which bears his name.

The Neal institutes named above represent an actual investment of over a million dollars, owned by representative and leading professional and business men in each community, whose combined wealth aggregates many millions of dollars. This, briefly stated, is the financial status and backing of the Neal Cure on the basis of which it seeks and asks the patronage and cooperation of all good people everywhere.

Three-day Treatment is indorsed by all governments, public officials and leading business and professional menparticularly by members of the clergy, who have investigated, and by thouwho have investigated, and by thousands of cured patients, their happy families, relatives and friends. Among these we mention the government of Australia, and men with such National and state standing and reputation as Hishop Schinner, of Wisconsin; Hon. John C. Sherman, Judge of the Iowa Supreme Court; Rev. J. F. Nugent, the well-known Catholic priest and platform lecturer of National reputationnames of hundreds of others, private references to hundreds of cured patients, financial reference to the largest banks and mercantile agencies in the country will be cheerfully furnished upon application.

Fourth: ALCOHOLIC POISON. Dr.

the country will be cheerfully furnished upon application.

Fourth: ALCOHOLIC POISON. Dr. Neal has demonstrated that alcoholism, or the drink habit, is due to and caused by the stored-up poison of alcohol in the system coming from the long-continued or excessipve use of alcohol, and that this causes that extreme nervousness, intense and unbearable craving and gnawing within, calling for more liquor, which all alcoholies experience, and which they only can fully appreciate and understand. Dr. Neal has found the antidote for this poison, and combining same with other remedies, he has originated the Neal treatment, which quickly antidotes it from the system, thus removing the craving and the cause of it. When this is done, nature, aided by the purely vegetable and perfectly harmless medicines administered, takes care of the rest, and in three days' time the patient becomes a perfectly cured person and unless he or she and all relatives or friends are entirely satisfied with the results accomplished at the end of only three days' treatment all money paid by the patient is promptly refunded.

On the above basis and terms, the Neal Institute Comment in this city.

refunded.

On the above basis and terms, the Neal Institute Company, in this city, courts investigation; appeals for the co-operation of all good people, and asks for the patronage of all the afflicted and those interested in them, with the assurance that you can deal with the Neal Company with that same self-confidence that you deal with your own banker, family physician or minister at home. A personal call by those interested at the Neal Institute, 354 Hall street, phone Marshall 2400, is most desirable, but if that is not convenient, phone or write or wire for further free information and advice, and if you live distant from the city, they will furnish you the address of Neal Institute nearest or most convenient to your residence.

THE NEAL INSTITUTE, 354 Hall St.
