ARMY AVIATION

Head of Mikado's Forces Keenly Interested in Development of Flying.

WAR TALK RIFE IN ORIENT

America's Proposed Arbitration Pact With Great Britain Causes Unrest in Nippon - China Strengthening Army.

TOKEO, Japan, June 10,--If any one believes that Japan is allowing her army to drop behind the procession he should have been present at the great military aviation tournament on the Tokorozawa field recently, when fully 10,000 people stood for hours and watched the officers of the aviation corps of the army fly high and low. fly swiftly and slowly, perform all sorts of gyrations in the air, and finally receive the commendation of the head of the Mikado's forces, Field

head of the Mikado's forces, Field Marshal Prince Oyama himself.

Although many officers took part in the maneuvers, the one who won and deserves the greatest praise was Captain Tokugawa, who did wonderful things in the army Farman biplane. Lieutenant Yamaguchi, in a Bieriot monoplane, rose to shout 250 metres and covered at that altitude a distance of three and a half ri in 10 minutes.

Biplane Patents Bought.

In addition to experimenting with foreign makes of airships the Japaness army has recently purchased for its own use the rights to the so-called Narahara biplane, built largely along the lines of the Wright Bros.' machine. This machine, the parts of which were constructed at the inventor's sheds in the city, has been forwarded to the Tokorozawa field for trial flights and has been assembled. A test of the motor recently showed it to have 50-horsepower. The planes measure 10 metres from tip to tip, both in length and in breadth, and three feet in height. The motor is installed in the fore part of the craft and is capable of driving the two-bladed metal propeller at the rate of 1206 revolutions a minute. The machine can accommodate two passengers, whose seats are arranged behind gers, whose seats are arranged behinthe pilot. Trial flights have proved satisfactory, but the government is maintaining much secrecy about the

The intense interest felt through out the army in aviation is surprising to an American. Hints of secret ex-periments being made by the governnent are to be heard everywhere big sheds at the Tokoromawa field are under constant guard, picked from the best restments. No one is allowed to come near them, and officers and men alike refuse to answer any questions regarding the work that is going on behind the dingy walls.

Peace Pact Worries.

Sensational as it sounds it is no more an true that the work of the army as become in some strange way ixed with the discussion, which is mixed with the discussion, which is to be heard in many quarters, of the efforts being made in the United States to formulate an arbitration pact with Great Britain, and it is not difficult to find well-informed Japanese who do not hesitate to express their belief that the next war in which their country will engage will be with the United States. When Bud Mars, the aviator was here, he was given a warm reception and everywhere the question was asked. Has the American army any aviators like him?" Every detail regarding the personnel, equipment, size, ability and mobility of our Army is garding the personnel equipment, size, ability and mobility of our Army is eagerly picked up and becomes the subject of discussion at the gathering places of the people.

England, acting on this sentiment rampant in the Island kingdom, has rested not a little excitement and has net with profound disfavor among the apanese. It is regarded, among other things, as a deliberate move to check Nipponese trade advancement. In this connection the so-called four-power continues to kick up a disturbance here. Japan seems disposed to side with Russia and regard it as a dinlo with Russia and regard it as a diplo-matic defeat for them and is spercising wery opportunity to fortify its power a Manchuria. This, in connection with the great strides that are being made by the Celestial Empire in other directions, is

making the Japanese elder statesmen ause and consider the future, believ-ing it contains another factor to their erablem to which they have not given sufficient consideration. China at pres-ent has an army of 2s divisions, which are not yet in complete thating trim owing to the lack of enough efficient officers, but that army would give trouble to any Japanese force which might be forced to meet it in battle.

CZAR'S POLICY COERCIVE

vostok That Celestial Kingdom Will Become Powerful Factor in Few Years.

VICTORIA, June 10. - Russia conlinues her coercive policy toward China, but the latter empire is making a show of resistance, newspapers brought by the Empress of Japan. It is understood Russia will soon occupy Kildja. The Tokio Yomiuri says that although China has conceded to Russia the demands regarding Ili, promises made in the treaty have been unfulfilled, and Russia has determined to send an armed force to Ili and instead of undertaking further negotiations, dispatched a note to Pekin giving the reason for occupying the territory. The Japanese paper says this step was decided upon by Russian War Min-lister Sukhomilkoff after interviews with officials in Russian Asla.

Serious Outcome Suggested.

"From the fact that the Russian authorities continue to dispatch troops to the Russo-China frontiers, it is to be feared that the situation may assume a serious aspect at any time," says the Yamiuri.

An order for compulsory training by Russian residents of the maritime provinces has been issued by the military governor, all residents who have not served with the colors being ordered to train. Mr. Guchkoff, ex-president of the Russian Duma, who has completed a tour in North China, tetegraphed a warning to Vladivostok that China is strongly preparing to resist. On his arrival at Vladivostok Mr. Guchkoff joined with the Governor-General and other officials in a conference with the War Minister to discuss the situation.

A man taking this route, along an old skid road, would be screened from view except where he crossed the private wagon road leading from Mrs. Griffith's house. On reaching Rock Creek, which has a depth there of not more than a foot, he probably waded down the creek to the dam and there threw the body into the pond below. Near the house any footprints would have been obliterated by the crowds there since the body was found. If two were implicated, as is believed, the second man doubtless was on watch to give warning should someone appear unexpectedly.
