Her uncle, C. A. Coolidge, announced the betrothal of Miss Leta Minkler to John R. Brophy, the pastor of St. Paul's, Miss Minkler formerly attended the Academy of the Holy Names, at Astoria. She makes her home here with her relatives, Mr. and Mrs. Coolidge. Mr. Brophy is with the C. A. Feldensheimer jewelry store. The wedding is set for September, the exact date to be determined.

Miss Jean Mackenzie's luncheon at the Links Monday for Miss Christine Tate, her former classmate, was one of the smart events in the calendar of the younger set for the week. So many of her friends besleaged Miss Ruth Clements, who will leave Tuesday for New York, to see her etchings and illustrations in book and magazine, that her hostess, Mrs. Preston Smith arranged an afternoon at the Art Museum Thursday to gratify the many friends Miss Clements had made while passing the summer season here. As she was the successful competitor for the official seal of the Jamestown exposition and has furnished the illustrations for Booth Tarkington's "Beulah's Christmas Party" and Ruth McEnery Stuart's "The Unlucky Life of Little Mary Ellen," as well as designing covers of The Craftsman, her standing in the art world is more than an ordinary one.

Dr. and Mrs. J. F. Dickson were dinner hosts last Sunday evening at their apartments at Alexandria Court. The event was in honor of the eminent oculist, Dr. Ernest Fuchs, of Vienna, who is a guest of Dr. J. N. Coghlan, at Arlington Court while here. Dr. Fuchs and Dr. and Mrs. Dickson left early in the past week for San Francisco. Dr. Fuchs will go to the Cooper Medical School to deliver a series of lectures. The al fresco effect of the rink was delightful, there being only a roof, from which hung colorful pennants and lanterns, while the sides of the building were not enclosed. The Japanese lanterns and electric lights, mingled with the mellow moonlight, made an attractive place of the rink, where fitted back and forth maidens in their smart summer frocks. Supper followed at the Heuser home. Among the guests were Mr. and Mrs. W. Stevens, Mrs. George F. Heuser, Miss Lillian O'Brien, Miss Della Hahn, Miss Mildred Grindstaff, Miss Mabel Shea, Miss Edith Evans, Mrs. J. C. Alveolar Dentistry

Has Become International

Does Away Entirely With Plates and Bridge Work

Truth Travels Slowly

A little over eight years ago the patents were issued on the Alveolar method of dentistry, the rights were acquired by the Alveolar Dental Co., west of the Missouri River, and by the G. Gordon Martin Co., east. About 100,000 people in the United States are now wearing teeth replaced by this method. Less than one year ago the rights were disposed of across the oceans. At present there is one or more Alveolar offices in most of the large cities of Great Britain, Europe and Japan. This alone speaks volumes for the system.

Unusual in Quality

There is no satisfaction in looking less than altogether right at any time. If Alveolar Teeth are absolutely right—that is beautiful, comfortable, natural looking and life everlasting, and it costs no more than bridge-work, why should you not prefer it? We have best of which is never entirely right—would you not prefer it? We have treated many hundreds of the best people of this city and state, and if there are any who are not entirely satisfied we would like to know it. Our interest is mutual, our business has grown to be the largest high-class dental business in the world. There must be a reason. It was not by accident.

Briefly, the Alveolar method is this: If you have two or more teeth left in either jaw, we can supply all that you have lost with teeth as good, solid and sound as the best set of natural teeth ever grown in any human being's mouth, and a whole lot more beautiful than nature's best product without resorting to such makeshifts as partial

plates and the unsanitary bridge-work. Alveolar teeth are not only beautiful, but they are comfortable and durable. We guarantee them to last a lifetime, where the longevity of bridge-work is seldom over longer than 5 or 6 years and generally a good deal less. It is never guaranteed to last by any first-class dentist who is responsible and reliable, because all first-class dentists will tell you that bridge-work at best gives trouble from the time it is put in the mouth until it has to be taken out. In many cases where bridge-work is impossible, and in all cases where it is possible, we can replace your missing teeth with perfect Alveolar teeth. The pain incident to this work is practically none; the expense is the same as the best bridge-work; but in satisfaction there is no comparison between the two.

We have samples in our office to show at all times—hundreds of patients here in our home city to refer to. In fact, we would feel safe in referring to most every occupant of this building, where our offices are located. We have, and are doing, the dental work for most of them and their families, including elevator boys, janitors and managers. Seems nice to have one's neighbors think well of him. Examinations and booklets on Alveolar dentistry are absolutely free.

Remember that in addition to our specialty, Alveolar dentistry and curing pyorrhea (tooth) we are experts in every branch of dentistry from the simple filling up.
