

# METHODS OF HANDLING MONEY WILL BE REVOLUTIONIZED!

## Extensive Production of Marvelous Mechanical Brain—the Product of the United States Cashier Company — to Begin in About Ninety Days

### RECORD OF UNITED STATES CASHIER CO. UNPARALLELED

In all respects the record of the United States Cashier Co. stands unparalleled. The United States

**THE FIRST MODEL**  
An exact photo of the first model of the Bilyeu machine. Compare it with the perfected product directly opposite.

Cashier Company has been financed in less time than any other of the present-day great successes. Since the company was first launched, a little over a year ago, the leading banks, business men and capitalists of this city and the Pacific Coast have subscribed for a sufficient amount of stock to assure its success. In fact, staid banks which had never before indorsed anything of this nature, lent their enthusiastic support in most strongly worded testimonials IN WRITING. Today the assets of the United States Cashier Co. (not including patents) are over \$400,000, including real estate, factory equipment, machinery, machines, material, cash and bills receivable.

**LIGHTNING CHANGE-MAKER**  
For pay-as-you-enter streetcars, theaters and all other places where small change is handled extensively. Makes change instantaneously, for any amount up to \$5.00, by pressing one key.

### Only 15,000 Shares Remain

The only stock remaining unsold is about 15,000 shares, which are held in escrow by one of Portland's leading banks for payment of the original patent rights. The United States Cashier Co. has the right to redeem this stock any time within twelve months. On or before November 1st the United States Cashier Co.'s stock will positively advance to \$20.00 per share. The last block of stock offered was eagerly purchased by keen business men at \$15.00 per share. Accordingly, instead of waiting to redeem this Patent Stock when it is due twelve months from now, the Board of Directors have decided to offer it now, while it lasts, subject to previous reservation. This will enable those who have recently made application for stock to be taken care of and will also afford a large manufacturing fund, ample to meet any contingencies that might arise.

**HERE'S THE FIRST FACTORY**  
Photo of building at Virginia st., South Portland, where the first model was built. See new factory opposite.

Much has been said and written of the wonderful machines which have been in process of perfection by the United States Cashier Co. for the past twelve months. Operations have now reached the stage where from present indications the extensive production of these wonderful machines will commence in about 90 days. They promise to outrival the Cash Register, Adding Machine and Typewriter in usefulness—in fact, will revolutionize the present systems of handling money. This is a broad statement, but one that is amply borne out by the machines themselves.

For instance, the United States Cashier Co.'s Computing Machine makes exact change mechanically, quickly and correctly. Suppose you purchase \$4.25 worth of merchandise and tender \$10 in payment. All that is necessary is to depress the keys representing the amount purchased and the amount tendered—pull the lever and the machine pays \$5.75, the exact change. The operation is completed quicker than any human calculator can ever hope to do it—besides being absolutely correct. In addition, a printed record is made of both transactions, besides totaling each sale as made.

In other words, the United States Cashier Co.'s Computing Machine does everything that a Cash Register and an Adding Machine do, plus the marvelous faculty of making change, which any merchant recognizes is of far more importance than the mere totalling of sales. In the cashiers of today, the question of change must be figured out by the clerk. In the United States Cashier Co.'s Computing Machine this is done mechanically, which means correctly. And it is safe to state that never was a machine placed on the market for which there is such a great actual need.

The Computing machine alone is sufficient to return the original investors of the United States Cashier Co. tremendous profits. \$100 invested in National Cash Register stock returned \$42,780; \$100 in the Burroughs Adding Machine stock returned \$41,240.

In addition to the Computing Machine, the United States Cashier Co. has perfected and patented four other equally wonderful and equally essential machines, namely the Bank Cashier—which permits of paying checks rapidly by bank cashiers as well as keeping a record of each transaction; a machine that banks have needed and wanted for years. Also a Lightning Change Maker for pay-as-you-enter cars, theaters, etc., a Currency Paying and Computing Machine—which pays paper money, gold and silver, with equal facility and correctness. Also a new style Adding Machine, which is more flexible than any now on the market and has less parts. Bank clerks cannot make mistakes—paying tellers will save hours of time each week—department stores will quicken their service—merchants will be able to stop losses now impossible—in short, the whole system of handling money will be revolutionized.

Any one of the above machines insures big returns, and the future profit of the United States Cashier Co., owning and controlling, as it does, patents of five such marvelous machines, is impossible of calculation. The patent rights are virtually priceless and the demand for such money-saving, labor-saving devices is unlimited.

**AUTOMATIC BANK CASHIER**  
A change-making, listing, adding, check-cancelling and coin-paying machine, designed for banks and payrolls. Pays any amount, 1c to \$200.00. Permanently lists, visibly registers, prints amount on check and totals each transaction.

**THE ADDING MACHINE**  
Embodies all the good features of Adding Machines now on the market, and in addition is more flexible, with less parts.

**CHANGE-COMPUTING MACHINE**  
For department stores and all classes of retail business. Visibly and permanently records amount tendered and amount of purchase, prints on sales slip, totals same and pays out correct change. Simplifies the balancing of cash. Prevents errors.

### SEE THE MACHINES IN OPERATION

Before you invest we are going to ask you to do what we asked all other investors in United States Cashier stock to do. First, look into the management of the company—note the responsible business men that are back of this project—read the indorsements from the leading bankers, financial institutions and business men of the West. Then come and see the machines in operation—actually doing what we claim they'll do. To give everyone the benefit of seeing these machines in actual working operation, we have opened offices at 266 Stark street, ground floor of the Railway Exchange building. See the machines, whether you desire to invest or not. 'Twill prove an educational half hour well spent. Open evenings.

**THE CHANGE-COMPUTING, CURRENCY-PAYING MACHINE**  
For use throughout the East, where currency is prevalent. Records amount tendered and amount purchased and pays out correct change. Simplifies the balancing of cash. Prevents errors.

### PARTIAL LIST, OFFICERS, ADVISORY BOARD AND DIRECTORS

Sheep Raiser.
- DEAN BLANCHARD..... RAINIER, OREGON
- F. A. PETERSON..... NEW YORK, NEW YORK  
With B. T. Babbitt, Inc., No. 11 Broadway.

### EXTRACTS FROM LETTERS FROM LEADING BANKERS AND BUSINESS MEN

Ladd & Tilton Bank—"A device as perfect and practicable as yours has long been desired by bankers."  
Seattle National Bank—"Nothing to equal your machine as mechanical cashier."  
G. W. Hazard, Los Angeles, Mgr. Burroughs Adding Machine Co.—"Your Coin Paying Machine will meet with a ready sale, and think it should stand up mechanically for many years, which means accuracy and durability to the user."

Portland Chamber of Commerce—"The trustees were convinced of its excellence and consider it perfect in every way."  
First National Bank, San Francisco—"The machine is an excellent one, by far the best of its kind that we have ever seen."  
Traders National Bank, Spokane, Wash.—"It will revolutionize the paying teller's cage."

Merchants National Bank, Portland—"I can see no reason why it should not come into universal use."  
Central Bank & Trust Co., North Yakima, Wash.—"We predict a remarkable sale of your wonderful automatic cashier. It will fill a long-felt need."  
American National Bank, San Francisco—"The machine possesses many attractive features; especially noteworthy is the visible record of its transactions."

First National Bank, Los Angeles—"It will be as necessary a machine in the modern bank in the near future as the adding machine of the present day."  
Bank of Boise, Boise, Idaho—"It is destined to become an indispensable part of the equipment of an up-to-date bank or business house. It can do the work of many men."  
Conrad National Bank, of Kalispell, Mont.—"It will undoubtedly become universally used among banks."

Remember stock positively goes to \$20.00 per share on or before Nov. 1st, 1911. If stock is oversubscribed, the company reserves the right to withdraw this offer immediately. The time to act is now—the first thing tomorrow morning. See demonstration in our offices at 266 Stark Street, Ground Floor, Railway Exchange Building.
