The Chicken Business Does Pay

As an indication of what an awakening of interest in poultry will do, consider one phase of it, the consumption of eggs. When you eat your next egg, remember that it is probably one of the 52,500,000 shipped into Portland from states east of us every year to supply the demand over and above the eggs the Oregon hens furnish.

The above facts and figures are convincing enough that a 5 or 10-acre poultry ranch will pay for itself in a very short time. What other business will yield such large returns on the investment?

Our co-operative policy of teaching you the poultry business and marketing your products, thereby assuring you of top-notch prices at all seasons of the year, is an absolute assurance of your success.

5 and 10-Acre Tracts, \$75 to \$150 Per Acre, on Easy Terms. Write for Literature.
