After several years of hard study she was admitted to the bar and tried her first case in the Woodburn Justice Court, which she won. She has assisted in trying cases in the Circuit Courts at Salem, Oregon City and Portland and has shown herself to be clever and quick-witted. She recently argued a case in the Circuit Court at Salem, before Judge Galloway, and handled the points at issue so ably that numerous favorable comments were heard from prominent members of her profession. The story of how she came to enter the profession, the difficulties encountered and the advantages the profession gives her, are heat told in her own words and may be of assistance to any of her sex who contemplate following her example. Miss Kemp granted the following interview yenterday:

"How did I come to study law? Well, I think I grew into it. A fondness for law is a family characteristic. I have, at least, one cousin practicing now and several uncles who have been admitted to the bar. Then when my father was Justice of the Peace in Woodpurn, I used to stay in his office and assist him considerably, and found the work very interesting. Later I studied shorthand and in May, 1906, I entered the office of E. P. Morcum, at Woodburn, expecting of act as his amangement. studied shorthand and in May, 1906, I entered the office of E. P. Moreum, at Woodburn, expecting of act as his amanuemis. I always like to understand the work I do and so I decided to read hw, in order to more fully fit myself for my work. From that It was an easy step to assist in searching for authorities, and I enjoyed that work so much that I soon decided to prepare myself for the bar. I did not anticipate an active practice, but I find that practice appeals to me. I have completed a course in brief-making and intend to make that a specialty. Let me have a quiet library, with the latest text-books and decisions, and I am happy, especially so when I find authorities that support my cages.

This could be have come in contact, professionally, peems to take me seriously and as having as much right to do my chosen work as any man has I am not depending entirely upon my practice for my living, as I am still doing amanuemis work in the office, as so many lawyers have when they been to practice. I consider that I have been fortunate, as I have been associated with some prominent lawyers in my dirst cases and haven't had to stay in the Justice Courts for practice.

I consider that I have been fortunate, as I have been associated with some prominent lawyers in my first cases and haven't had to stay in the Justice Courts for practice.

"The advantages law has as a profession for a woman' I have never stopped to consider that question, but I would think it has advantages only to those women who have an ability or talent in that direction. As I regard it, the legal profession is neither man's work nor woman's work, but a work of my first cases and there man's work nor woman's work, but a work nor some lates in that direction.
