## TEETH CREDENTIALS

Every man who admits that health is an essential requisite to human happiness is under the strictest obligation to take care of his teeth, an essential part of his life. Necessarily is this true, for if our teeth aid in the conversion of food into the nutriment of life, and upon that nutriment depends health and strength of the body, the process of mastication is an omnipotent one; then, in consequence to the care of our teeth we owe the most absolute submission. This submission must find its practical expression in its best equipage. To do so we must have FAITH in the word and the integrity of the Dentist, Every time you sit down in a Dental chair you make an act of faith, and faith is nothing more than the subordination of the intellect to a power which it does not comprehend.

To the inexperienced, dentistry is leaked in mysteries which must be

than the subordination of the intellect to a power which it does not comprehend.

To the inexperienced, dentistry is cloaked in mysteries which must be received and accepted on FAITH. The skeptical could have all doubts washed away by the waters of surety only by a deep and intrinsic knowledge of the rudiments and the developing principles of teeth structure and reconstruction, and even then there would be an unonding following of the Doubting Thomass. If an astronomer of known ability and truthfulness an nounces to you that on a certain day and at a specific time of that day there will be an eclipse of the sun, do you immediately delve into archives of profound and learned calculations on astronomical bodies to verify his statements? Do you not, on the contrary, accept his statement without hesitation? If we tell you that there will be total eclipse of your teeth at a certain time, if specific warning is not heeded, are you going to warp your brain by prolonged investigation into the science of dentistry before you accept in faith the results of a long and carful process of training of the mind in this particular knowledge? Human testimony is the basis of every branch of knowledge. And in Dentistry there is no sounder foundation on which to base your faith in our ability and skill, our moral and financial substantiality, than by accepting the testimony of

those who verify our statements. Place your faith in ALVEOLAR DENTISTRY, because it bears the written and verbal testimony of many thousands of persons and because in itself it is DENTISTRY in the acme of perfection, and its most worthy merit is this—that it possesses a PROCESS OF DENTISTRY WHICH SUPPLIES MISSING TEETH WITHOUT THE INSANITARY EPHEMERAL BRIDGEWORK AND WITHOUT THE NEED OF THE DISCOMFORTING PLATE.

Alveolar Teeth, Where Bridgework In Impossible.

If only your front teeth are left, say three or four or more, we can replace all those that have been lost on both sides, clear back, with perfect Alwediar teeth, whilst bridgework would be impossible, even if you have eight or ten front teeth to tie to. If you have only two back teeth on each side, say molars, we can supply all the front teeth that are miesing with beautiful, serviceable, lifelike Alwediar teeth. This could not possibly be done by the bridge route. And where bridgework is possible, there is no comparison between the two. A very large percentage of our work is taking out bridgework put in by supposedly high-class dentists and replacing it with the beautiful and artistic Alvediar teeth. And, unlike bridgework is in practically painless. No boring or cutting into the gums, nothing to be dreaded. Now, then, prices being equal, which would you choose?

which would you choose?

Curing Pyorrhea (loose teeth), a disease given up by other dentists as incurable, is another of our specialities. We cure it absolutely. He a boastful statement to make, but we can do anything that is possible in dentistry, and what we do is always of the very highest class. Our booklets, Alveolar Dentistry, are free. Write for one if you cannot call. We have samples of our work to show at all times.
