A STORY OF A LAWYER, Once upon a time, many, many years ago, there dwelt a lawyer cars ago, there dwent a lors, and state, the state of the the State of Atlantis. There are no lawyers like him now, but we fear Inwyers like him now, but we fear there may be some in the future and therefore we are going to relate a few sive who has been willing to wet his tales from his biography for the warn- feet by crossing the Rubicon, for he ing and admonition of the young. On another occasion Cormorant was to defend him in court. At the trial Simpleton was set free for want of any evidence against him, but he had put up \$500 ball, and this, by some process which the reader may think out for himself, fell into Cormorant's hands. Did he pay it over to poor Simpleton? Not he. He kept it, just as he did Gammon's claim, and again it was necessary for his client to hire another lawyer before he could set his dues. This little piece of sharp practice on Cormorant's part was much admired by his fellow law-yers in those benighted days. Now would all be horrified if such a

thing were to happen. But the climax of Cormorant's sable-hued career came in his deal-lags with Jennie Sago. Jennie was a mature woman who had worked all her life and managed to lay up a litthe money, about \$813. Cormorant, smelling out this fact by a marvelous instinct which was common in those days among lawyers, invelgied Jennie work for him as a mald servant. In this capacity he won her confidence and got the \$813 into his hands. Part he lent on a mortgage. Her new employer, taking pity on the woman for her evil fortune, tried to wrest some of her money from Cor-morant's possession. The lawyer at pretended that he never had heard of such a woman as Jennie Sago. When that pose became impos-shie he cooked up a story that she owed him lawyer's fees enough to up all her money. Meanwhile the forlern woman began to have fits of despondency. The money which Cor-morant had swindled her out of represented the savings of her life and she declared that if she must lose it she misconduct of such a judge does much wanted to die. A short time afterward to bring all judges in public disfavor, she committed suicide. Did Cormor-nnt care? No, indeed. It was all in the way of his business. Everything he had done was quite professional in ary se days. So regular and strictly professional was it all that when a vacancy of curred in the municipal judgeship of Utopia, the Mayor, a most learned and plous man, appointed Cormorant to fill the position. The Mayor knew all about Cormorant when he save him the appointment, so it stands to reason that he approved of his conduct. As a judge, Cormorant pursued the same course of conduct which had won him so much credit when he was practicing at the bar. For example, a certain lewd woman was jailed one day and about to be tried in Cormorant's court. A day or two before the trial the judge visited her in her dungeon and ordered her to employ one in one way of another important politi-Goldsmith, a dear friend of Cormor-ant's, to defend her. If she employed Goldsmith she would be acquitted, Cormorant told her. If she did not, Cormorant told her. If she did not, geon and ordered her to employ one she would be convicted. That was the way justice was dispensed in those days in the Municipal Court of Utopia. lewd woman was ordered to Goldsmith for his services \$150, which was to be divided into three parts, one going to Cormorant, the judge; one to Goldsmith, and the third-who was to get the third nobody knows. Let us all be thankful that in these happy times there are no lawyers like Cormorant, and that, if there were, none of them could ever hope to be appointed a judge. Such is the purity of the legal profession now that no member of it would dare to appropriate money belonging to his clients or would not only be punished by legal process and expelled from the bar, built not a lawyer in all the lind 'would be seen speaking to him for fear of shar ing his diagrace. ## WOMEN AND HEATHEN RELIGION.

Many persons concerned with the velfare of foreign missions are greatly exercised over the spread of some of the so-called heathen religions in the United States. The situation seems to be much the same as it was with Carthage when the Romans sent an army to invade Africa while Hannibal's troops were in Italy. There is more long time when he was found, but the than one flourishing Mohammedan mosque in the United States. At Green Acre, New Hampshire, there is a sort of Chautauqua, amply endowed by the late Miss Farmer, where the mysteries

of the Vedantic philosophy and Hindu mysticism are taught every Summer to capt throngs of converts. All over the country there are classes in "Yoga" which set the Hindu scriptures above the Bible.
