Health and Beauty Hints BY MRS. MAE MARTYN. Mrs. J. L.: Frequent shampoos with catnip and sage water will ensure a fine growth of brilliant, fluffy hair, rich in its natural color, and so responsive to the fingers' touch that doing it up is genuine pleasure. A cupful of catnip dissolved in a teacupful of water, thick rather than quick-dissolving, is the best. It dissolves in oil. Rinsing leaves hair and scalp immaculately clean, and the hair will grow thick and even. The regular use of catnip gives to the hair that exquisite fluff and mass, softness and will insure a lovely growth. E. A. E.: A delatone paste will remove the hairy growth. Mix enough remove the delatone with water to cover the hairy surface, apply and after 2 or 3 minutes remove, wash the skin and the hairs are gone. This treatment is harmless and does not discolor the skin. Anxious: Cutting the lashes is dangerous. Apply a little pyroxin each night at last roots with the thumb and forefinger and even up the entire system. Thin eyebrows will grow thick and heavy if pyroxin is rubbed on the skin without the caution that to get any where hair is not wanted. Mrs. O. H.: Turkish baths are a severe tax on the system. Try the paronitis treatment for fat-reduction and you are sure to get it. To prepare, dissolve a ounce paronitis in 1/2 pint hot water, each meal. This gradually and surely dissolves the fat and restores the figure's symmetrical lines without possible injury or inconvenience, and when your weight is where you want it, you can stop without fear of its returning. Lydia P.: Large pores and skin roughness can be overcome with the cream-jelly. This is made by stirring 2 teaspoonfuls glycerine into 1/2 pint cold water, to which add a couple of drops of lemon-juice. Apply generously to the skin each day and it will clear it of all local impurities. This cream-jelly is fine for beautifying the arms, neck and face, as well as for banishing sallowness and that greasy condition, and it can be used with good effect for rounding out hollows.
