New York Motorist Reaches Portland With Rear Tubes Filled in Buffalo.

PACIFIC HIGHWAY LAUDED

E. M. Pierce, Who Is Circling United States in Pathfinder Car, Crosses

> Continent in 222 Hours of Actual Running.

"Considering the age of the country, the Pacific Highway is the most wonderful road I have ever traveled over." declared E. M. Pierce, the New York motorist, who is circling the bounda-ries of the United States on the north, west, south and east, when he arrived in Portland in his Patnfinder car last week. 222 hours' actual running time from New York. "Not only is the Pacific Highway, or

"Not only is the Pacific Highway, or that portion of it I have experienced from Vancouver to Portland, a remark-able tribute to the good roads move-ment on the Pacific Coast, but it com-pares most favorably with the roads I encountered in the East, surpasses those of the Middle West and is much better than those of Canada," con-tinued the New Yorker, who will claim the distinction of being the first owner the distinction of being the first owner following northern and southern routes.

Road Is Kept Up.

"What struck me as surprising on the Pacific Highway was the effort made to keep it in continual repair. Every few miles we would come to sections which gave evidence of repair within the past few days. Some of the Middle Western and Canadian roads look like someone took a wagon out to blaze a trail and then called the job a finished one, leaving travelers to wade through gumbo, pends, and climb

sharp hills as best they could. "New York has the best roads of the entire trip, but next to the Empire State, I believe that Washington and Oregon are the best. Why, back in Wisconsin, a state much older than either of these Northwestern common-wealths, I was compelled to ford a stream for three-quarters of a mile. while the gumbo of the Dakotas and Manitoba made travel almost impossible.

Start Made July 1.

"British Columbia is soing to be the ultimate Northern route for transcon-tinental tourists, for the scenery there is surpassingly grand. Once the Can-adian officials awaken to the neces-sity of rebuilding mountain roads, the tourists are certain to overlook the At Plattsburg the crew of the car was warmly received by President Hadley and other members of the la-ternational Highway Association. Montourists are certain to overlook the United States on the last lap of the trip to the Pacific Coast."

to the Pacific Coast." The pathfinder party, consisting of Mr. Pierce, his wife, and Miss Thelan, all of New York City, left home on July 1 and expect to return by Septem-ber 20. The tourists followed a route taking them from New York to Chi-care Munneapolis through the Dacago, Minneapolis, through the Da-kotas to Winnipeg, and from there to Portage. in Manitoba. They followed the Canadian Pacific Ratiroad to Medicine Hat, then to Phoenix, Westmin-ster, Vancouver, Seattle and Portland, ster.

The return trip itinerary is: San Francisco, Los Angeles, San Diego, Galveston, New Orleans, Tampa, Charleston, Richmond, Washington, New York.

gether June 19, but found terrific go-ing, as soon as Palm Beach had been passed. Record rains had flooded the NORTH JETTY NOW ing, as soon as Paim Beach had been passed. Record rains had flooded the Florida swamps, and the bog holes were almost impassable to heavy, high-powered cars. Singly three of them gave up the battle, one only con-tinuing. This was a Studebaker "20." owned and driven by C. J. Martin, a Miami real estate dealer. Mr. Martin's car splashed along steadily. At times the water was above his running boards for miles at a time. Fish wiggled along in the wake of the car, and alligators poked out their long snouts to watch the un-usual sight. At times shell roads gave a pleasant variety, but not until South-ern Georgia was reached did the go-ing show permanent improvement.

ing show permanent improvement. Martin's car went over the Blue Ridge of Southern Virginia in a downnour similar to that which came s near annihilating last year's Glidden

posed, has met our earnest opposition. Even our patents are licensed to others, to avoid the slightest taint of monopoly.

Modest Capitalization

We believe that high cost of living is largely due to the enomrous volume of watered stocks.

Fictitious capital, calling for dividends, compels prices out of reason.

So we have clung to modest capitalization, though this is the world's largest tire business. Not a dollar of water in our capital stock.

We count in our assets neither patents nor good-will. We have no bonded debt.

Moderate Profits

We insist on moderate profits. Our eventual interests, we are sure, are best conserved in that way.

Our profit last year on No-Rim-Cut tires averaged 81/2 per cent. That's half the usual in a line like this.

And that in a business where costs are cut to the minimum, by enormous output and

The Human Side of Tires

The Goodyear Code

modern equipment. In a rubber tire business, with fluctuating materials, that's a margin as small as one dares to accept.

Profit Sharing

We believe that men work best who have a share in the earnings. And that owners of the business are apt best to serve its patrons. So 134 of our leading men share in the Goodyear profits. And the Company has helped them acquire their stock.

Our branch managers are stockholders. Thus our dealings with the public, the whole country over, are being conducted by part-

In our factories, building tires, there are 49

Ninety per cent of the Goodyear common stock is owned by the active men in the

quality, every creator of Goodyear reputation, shares the results of his actions. We know of no better way to insure to our customers the service which we intend.

Trained Men

College-bred men are employed here in large numbers. Their accurate training and breadth of view are evident in Goodyear dealings.

Also Monarchy of Tiredom

Do ideals in business pay? Let us note the result after 13 years. Good-

Trade came like a flood as soon as men became acquainted with these tires. Now

ful way. We wish simply to show, in these days of complaint, that Big Business may still be guided by The Golden Rule.

Not in a personal way - not a boast-

For our factories we pick the most promising men who come from great technical schools.

Every year our superintendent visits the best of these schools, where he aims to select the very cream of the graduates.

Thus we have gathered here, in the course of years, an army of trained and competent men. And the future of all of them depends on better tires.

All Young Men

We believe in young men, and our organization consists of them. The most important man in it, in a manufacturing way, is 36 years old

Thus the Goodyear concern typifies the activity, the enthusiasm, the ambition, the enterprise of youth.

Each man's career lies mainly before him. So none rests on his laurels, none is yet easing up.

Goodyear men, wherever you meet them, are the kind you like to meet. They personify intelligent activity.

Fairness and Truth

Above all, with these men we insist on fair dealing, and on utter regard for the truth.

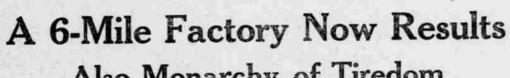

Faults and mistakes are forgiven by all of us, but unfairness and falsehood are not.

Here lies, we believe, the chiefest reason for the Goodycar growth. Wherever you seek you'll find a boundless faith in what the Goodyear people do.

It is estimated that 250 cars of corn will be shipped from the clasts sown this year on fallow lands plants sown this year on fallow lands and without irrigation. The unusually high germination for corn last year has prompted a large number of the grow ers to grow this product for seed pur-

poses ...

year tires now far outsell every other tire. The sales have doubled six times over in the past three years. They double now once in eight months.

Factory Growth

Our original factory had 36,000 square feet. Our additions for the year 1912 alone will total 560,000 square feet.

When these additions are completed they will give us a total of 1,600,000 square feet.

Figure what this means. Were the factory fifty foot wide, and one story high, it would be over six miles long.

Goodyear Popularity

Our monthly sales now just about equal our year's sale in the year 1909.

Last year's output for the first six months was 185,307 automobile tires. This year's out-put, for the same six months, came to 485,983

This has largely come about through what motorists said about Goodyear tires and methods,

Those are eloquent figures to answer the question, "Do ideals in business pay?"

How It Came About

The ablest men we could find have, for 13 years, worked to perfect these tires.

Years ago, in our factory, they built a tire-testing machine. This machine wears out four tires at a time, under all sorts of road conditions,

On this machine they have tested over 200 fabrics, and some 40 formulas for threads.

Every method and process has here been put to the ultimate test of mileage.

New ideas have been constantly compared with the old. Rival tires have been compared with our own.

Every question that came up has been answered only by the mileage test.

After 13 years of that sort of comparison re have brought Goodyear tires pretty close to finality.

Rim-Cutting Ended Completely

Then some of our experts took up the rim-sutting question. They examined thousands of ruined tires, of nearly every make. And they found among all the elincher tires that 23 per cent were rim-cut.

Then a tire was invented to make rimcutting impossible. It is known as the Good-year No-Rim-Cut tire.

These tires now outsell every other tire made. They are used today on tens of thou-sands of cars. Yet never has one been rim-cut.

By this invention alone we wiped out for tireusers about 23 per cent of their tire upkeep.

Saving Blow-Outs

At the same time our experts took up the question of blow-outs, due to overloaded tires.

a monthly output of 100,000 tails to keep pace with the call.

Few business stories ever told compare with the Goodyear story.

> Nine tires in ten, when of just rated size, are at times much overloaded. Sometimes by extras added to the car-sometimes by overweight passengers.

> It is figured that 5 per cent added to the weight takes 15 per cent from the the mileage.

So we made these tires-No-Rim-Cut tires-10 per cent over the rated size. And that 10 per cent oversize, under average conditions, adds 25 per cent to the tire mileage.

These two features together-No-Rim-Cut and oversize-have saved motor-car owners many millions of dollars. For tens of thou-sands of men they have cut tire bills in two.

200,000 Users

There are not less than 200,000 motorlats now using Goodyear tires. Wherever we have made a careful count—at shows and in show-rooms—every third car is equipped with them.

This year, 127 leading motor-car makers contracted for Goodyear tires. Over 100,000 cars of the 1912 models were equipped at the factory with them. That is the present situation, with 25 competitors making tires.

Now Goodyear sales are doubling every eight months. They are twelve times larger than three years ago.

Judge for yourself what condi-ons will be when all men know hese tires.

The Goodyear Tire Book - based n 13 years of tire making-is filled with facts you should know. Ask us to mail it to you.

Goodycar pneumatic tires are guaranteed when filled with nir at the recommended pressure. When filled with any substitute for air our guarantee is withdrawn
