THE SUNDAY OREGONIAN. PORTLAND, JANUARY 5, 1913.

Proposed Change in Law to Be Urged on Coming Legislature.

COMPETITIVE BIDS AIM

Revolutionary Changes in Selection of Books for Oregon Are Embodied in Amendment Framed by State School Superintendent.

SALEM, Or., Jan. 4 .- (Special.) -A tentative draft of the proposed change in the law governing the State Text-book Commission has been completed under the direction of Superintendent Alderman and will be introduced at the next Legislative session. He plans a revolutionary change in the method of adopting textbooks for the schools of

adopting textbooks for the schools of the state. One of the main changes in the pres-ent law that is proposed is to adopt a certain group of books blennially in-stead of changing the entire series of textbooks once in six years. The tentative draft of the bill, sub-ject to possible change before intro-duction, is as follows:

Five-Year Terms Provided.

Sec. 308. 1. At the expiration of the term of the present Textbook Commis-sion the Governor shall appoint one Commissioner to serve one year, one Commissioner to serve one year, one to serve two years, one to serve three years, one to serve four years and one to serve five years, and threafter, on the first Monday in January in each year, he shall appoint one Commis-sioner, who shall serve for a term of five years. These Commissioners shall hold office until their successors are appointed and qualified. The Governor shall have power to remove a Com-

appointed and qualified. The Governor shall have power to remove a Com-missioner at his discretion and shall have power to fill all vacancies. 2. The Board of Textbook Commis-sioners shall be selected as follows: one shall be selected from the County Superintendents, one from the County Superintendents, one from the faculty of the University of Oregon, the Agricultural College or the State Normal School, one from among the teachers of the state at large and one from among the legal voters of the state.

Bids Provided For.

Hids Provided For. Sec. 393. In the month of July, 1913, and every two years thereafter the Superintendent of Public Instruc-tion shall, under the direction of the State Board of Education, issue a cir-cular, and mail a copy of the same to all the leading school book publishers in the United States. Such circular shall contain the following: 1. The name and postoffice address of each member of the Board of Text-book Commissioners. 2. The time and place of meeting of the Board of Textbook Commissioners to adopt textbooks.

the Board of Textbook Commissioners to adopt textbooks. 3. The general form of bid to be followed by publishers in submitting textbooks for adoption. 4. The general form of contract to be entered into between the State Board of Education in behalf of the state and a publisher whose book or

Board of Education in behalt of the state and a publisher whose book or books may be adopted. 5. The branches of study included in the state course of study for which books will be adopted at the next meet-ing of the Board of Textbook Commis-sioners. For schools of all grades. 6. The provisions of this act relating to the adoption of taxibooks

to the adoption of textbooks. 7. Such additional facts and infor-mation as may be deemed expedient.

Myetle Point Benefits.

ł

Myrtle Point Benefits. The contractors make their head-maxters at Myrtle Point, and that city has greatly benefited by the road con-struction, as the payroll now of the men employed is in the neighborhood of \$1000 a day. The least wages paid for common labor is \$2.25 a day. Myrtle Point is deriving most of the benefit of the wage money, with the result that the place has taken on a new feeling of prosperity. Just outside of Myrtle Point con-tractors are building a long treadle which extends over a low part of the land. About three miles out a large steam shovel is making one of the big-gest cuts on the line. All along for over 20 miles are construction camps a mile or so apart. At these camps men are working at clearing, making cuts, building treatles, blasting and tumel boring. O

cuts, building trestles, blasting and tunnel boring. While there has been some clear weather, much of the time heavy rains have failen, making the work exceed-ingly difficult. All of the machinery used, the camp outfits, all supplies needed by the men and equipment of every kind, is transported from Myrtle Point by team. In places the rough country road, which has up to this time been the only means of travel, is hubdeep in water and the big freight wagons carrying supplies to the camps flounder and mire in the almost im-passable roads. passable ronds.

Rich Valley Traversed.

The supervision of the construction of the road for the Smith-Powers Com-particle of the Smith-Powers Com-camp seven miles out of Myrtle Point. Engineer F. A. Haines is at the head of the engineering department, with his headquarters at Myrtle Point, and tharry Butler is resident engineer in charge of the permanent field camp. The engineering corps is located in a camp, where they have most of the conforts of a home or hote. The valley of the south fork of the food extends, is one of the richest parts of Coos County. Many of the fines is to construct the valley. It has, how-ever, been regarded as one of the iso-hat parts of the county, as it is not on a through road. The building of the ratificad will open up this rich ter-ritory and bring it close to a market. Where it has been possible only for the ratch-owners to engage in sheep and cattle raising, because of the tastance from market and lack of transportation, the logging railroad will now give them quick transporta-tion and dairying, gatdening and fruit-growing can replace the grains on the extensive ranges. The railroad 臣 20

Merchant Tailoring Sales Increase Fifteen M.Ilion

"According to the report of the grand secretary of the Merchant Tallors' Association of the U.S. A. the sales of made-to-order clothes for men in-creased 15 millions during 1912, while the sales of the ready-mades decreased 16 millions during the same period." The above statement was made by Ray Barkhurst, the Tallor, at Sixth and Stark streasts to a neuronary man this

The above statement was made by Ray Barkhurst, the Tallor, at Sixth and Stark streets, to a newspaper man this morning. Belng asked for an explana-tion, he proceeded to give his ideas of the situation, as follows: "Tou see, ready-mades have steadily advanced in price during the past 19 years-an advance due to the increased cost of materials and labor. Suits that were sold at \$15 ten years ago cannot be diplicated today under \$22. "The larger part of the cost of a suit consists of labor-about 60 per cent being the proportion. The dealer in ready-to-wear clothing is compelled to carry an enormous stock. He must have every size in modes for tall slim, tall stout, short stout, short slim, and also in regulars. That of course, means a very heavy interest charge on in-vestment, increased rental for store-room and extra help, and depreciation in value on account of changed styles. "The merchant tailor avoids all of these inandicaps. He can carry a much larger assortment on smaller capital. "Ready-to-wear business attained its growth, was made possible only through economy of manufacture. Instead of one making a complete garment, 16 or 12 men have a hand in its construction, thereby cutting cost to a minimum. "Up-to-date and wide-awake mer-chant tailors aw the advantage of this method of manufacturing and began to experiment with H. This method is known as team work." "With due regard to the truth, I can say that I was one of the first tailors in the Northwest to adopt the team-work system, and, through careful study, have brought it to perfection. I've been told by men who know, that my workshop will compare favorably with any in the Northwest as to qual-ity of work and economy of manufac-ture. "So today, in a modern, up-to-date, merchant tailoring establishment you 10 14

ture. "So today, in a modern, up-to-date, merchant tailoring establishment you get the benefit of the attention given to a 'made-to-order' suit, together with the savings made possible by economy in manufacture—or, bolled down, you get a made-to-order suit at the price of a ready-made. So you can readily see why men have turned away from the 'ready-to-wear' and have taken to buving made-to-order clothes — getting buying made-to-order clothes — getting suits that exactly fit their figure and personality at no greater cost."

The engineers who have charge of the supervision of the construction of the road for the Smith-Powers Com-
