The Evolution of Figure and Form, and the Constant Changes in Fashion Are Authoritatively Depicted in This Store

Welcome--Just From Paris  
New Woolen Dress Fabrics  
Eponges and Broche Ratines

—The woman who, from custom, has always counted upon the regulation mannish mixture for her Spring suit, is doomed to a pleasant disappointment. Soft, clinging materials in exquisite color combinations that lend themselves admirably to the art of tailoring will be first favorites.

—**EPONGE**—the new and beautiful fabric for suits and dresses, promises to be the craze for the coming season. The striped effects are especially attractive and many of the new imported models are shown in this weave.

—There seems to be a riot of new colors today. Brown shades ranging from suede to Havana, soft dull blues, and blues in combination with black. Light biscuit shades and numerous striped effects.

—**BROCHE RATINE**—a heavy cloaking which may be described as having a plain soft finished background with an all-over raised pattern in brocade ratine effects. We show this in a light cream shade. Extremely attractive and light in weight. Second Floor.

## First Display of Spring Hats

—The small hat which has been in greatest favor since late Autumn is forecasted to be the style for the Spring of 1913. They are jaunty in appearance, graceful of line and made of light, pliable straws, soft malines and silks.

—The one illustrated today has a crown of white maline laid in lengthwise folds. The brim, of black hand-made braid, fits closely to the head, and on each is a wing of black velvet edged with the folds of maline.

—Another note of the new Spring millinery is the lavish employment of small flowers in the most beautiful colors imaginable, and these floral sprays and bunches, combined with the malines and silk, make the most charming hats that can be had for Southern wear. Second Floor.

## Etoiled France--The Corset for Slender Figures

—There are many women who are under the false impression that because they are thin any corset will answer their purpose. This is a great mistake, for slender figures require as perfect a fit as the stout figure. The Etoile de France corset is designed especially to meet the requirements of these slender figures. One of their special features being the self-adjusting curve of the back, which gracefully curves with the figure, whether standing or sitting.

—These corsets come in suede, fine batiste, and broche.

## New Table Decorations

—For dinner parties, birthday parties, weddings and all social festivities, we are showing an entirely new and exclusive line of novelties.

—For the center-piece there is the fortune telling or motto pie in the form of a huge white pond lily with 12 ribbon streamers reaching to each place and a name card at the end of each streamer. When the ribbons are pulled from the pie a card is disclosed which tells the fortune, and much merriment is caused. This pie may also be had in the form of an American Beauty or any other flower desired.

—Then there is the Jack Horner pie, which is very artistically made of sweet peas, jonquils, violets, etc., and can be ordered in any color scheme or flower. At each end of 12 long streamers of ribbon is an individual flower place card. Inside the pie is a favor for each guest.
