BILL IS HARMLESS

"Blue Sky" Measure Attacked by Mitchell.

"JOKERS MAKE IT FARCE" Baker Representative Says His Bill Provides Most Rational and Economical Plan for Supervision of Corporations.

STATE CAPITOL, Salem, Or., Feb. 8.—(Special.)—Representative Mitchell, of Baker, has given out the following interview as to the "blue sky" legislation situation:

The wildcat promoters and crooked corporations in this state will not be adequately curbed by the passage of the "blue sky" bill introduced in the Senate this week by the big business interests of Portland.

These are only a few of the particulars in which the bill favors the big and well-established stock grafter. It is filled with jokers, ambiguities and clauses that will make it a farce and a dead letter if an attempt is ever made to enforce it.

Section four provides that the act shall not apply to the disposal of one's own property when not made in the course of continuing or repeated transactions of a similar nature, or when such sale is made to an incorporator, antecedent promoter or one who is already a holder of the fully paid stock of the Oregon corporation issuing the property so sold.

These are only a few of the particulars in which the bill favors the big and well-established stock grafter. It is filled with jokers, ambiguities and clauses that will make it a farce and a dead letter if an attempt is ever made to enforce it.

As a matter of fact my bill provides the most rational and economical plan for the supervision of corporations, by placing all of the details of administration in one department, under a responsible head, instead of having this work handled by clerks in three or four departments.

There is a strong sentiment throughout the state in favor of a blue sky bill that will actually result in savings of the investing public. If we pass a dummy measure like the big business bill now before the Senate, the Legislature will be branded as a corporation-controlled body.

SIDELIGHTS ON OREGON LEGISLATURE

COLONEL RUSH, the well-known citizen and taxpayer of Bill Run, says: "I used to command a regiment in the war, but I'll be blamed if I can even command attention up here at the Legislature."

"When it comes to wages," said Senator Farrell, discussing the minimum wage bill, "this commission will be compelled to make allowances for particular conditions in different sections of the state. For instance, women employed in Tom Kay's woolen mill at Salem should be able to receive only these 20 cents for the first 20 days of an adjustment; of not less than 60 days nor more than 90 days, and the balance of the session to be devoted to consideration of legislation."

When the House was considering Senate Joint Memorial II, relating to a National medical department, Speaker McArthur told the members that he had promised some one a hearing before that action was taken. The members, however, had decided to "kill" the memorial and refused to postpone action.

This is the time you put the Speaker in the hole," said McArthur, with a smile.

Senators Hawley and Hoskins are the only two real farmers in the Senate. There are a number of near-farmers who own ranches and work them by proxy, but for real horn-handed tillers of the soil there are none that are in the same class with

grateful to you that I could just kiss you."

Whereat Nolita, although his wife is not attending the sessions, fled in wild terror.

What would I advise you to do under the circumstances? I should advise you to get right on as you have been doing. Get along without medicine if you possibly can. Look toward nature for assistance. Clean habits, frugal diet, early to bed, in a well ventilated room. Work every day at something you like to do. Keep up your enthusiasm. Have faith in nature and nature's God. The laws of nature are inexorable, but the rewards of nature are kind and bountiful beyond all expression. If you do these things you may during your whole life escape the necessity of using medicine, but even with all this you may occasionally need medicine.

But you must remember that you and your club are exceptional people, that the great masses of people go on heedlessly. Their diet is very ill-fitted to sustain their bodies properly. Their exposure to cold and wet and heat and fatigue is very reckless. In short, they do not know how to take care of themselves. Consequently, a medicine is necessary often.

The medicine Pe-ru-na is a climatic medicine. It is intended to reach climatic troubles, troubles that arise as the direct result of exposure to climate. It is also intended to meet those difficulties which arise from improper nourishment of the body and improper diet, producing indigestion and biliousness.

Their exposure to cold and wet and heat and fatigue is very reckless. In short, they do not know how to take care of themselves. Consequently, a medicine is necessary often.

The medicine Pe-ru-na is a climatic medicine. It is intended to reach climatic troubles, troubles that arise as the direct result of exposure to climate. It is also intended to meet those difficulties which arise from improper nourishment of the body and improper diet, producing indigestion and biliousness.

Now, such people ought to have Pe-ru-na. At the first symptom that presents itself, or any disturbance of the body, a few doses of Pe-ru-na should be taken. If the disease is acute Pe-ru-na had better be taken a teaspoonful every hour. If it is a disturbance that allows the patient to get about his usual business, taken according to the directions on the bottle is best. If this is done it will save the people untold expense and suffering. Not one case in 50 that comes under the care of the doctor would occur if Pe-ru-na was kept in the house and taken at the very outset of the trouble. Yes, all this is true and more.

I have hoped all my life to live to see the day when obedience to the laws of nature would be prevalent, when the people would live so they would not invite disease or provoke disturbance in the body. But I have not lived to see that day yet. I hardly think I shall. But I have lived to see the day when the people and even the medical profession are very much more interested in hygiene and sanitation than they used to be.

At one time, as a writer, I seemed to be all alone in trying to get the people to listen and become obedient to the laws governing their bodies. Now there are writers galore saying the same things. I am profoundly grateful that this is so.

So long as there are disobedient ones, so long we must have medicine. Even when the people are trying to be obedient to the laws of nature, trying their very best, need medicine for unavoidable conditions that often bring on some derangement. If such little derangements were met promptly with Pe-ru-na the day would more quickly come when even Pe-ru-na would not be needed, the day when the drug dealer would be relegated to the rubbish heap and all doctor books laid aside as curiosities.
