### Every Corset Does Not Fit Every Woman

but our Etoile de France \$5.00 rest corset seems to fit nearly every woman. —It is soft, light and pliable, clings to the figure without any perceptible feeling of support that enables a woman to carry herself well.  
—Many women who wear more heavily boned corsets tell us they always have in addition one of these light Etoile de France models for their *fatigue* corset.  
—Another Etoile de France \$6.00 corset is made especially for women of full figure who cannot bear any pressure. This model has been recommended by physicians because it is designed to give plenty of breathing space around the diaphragm. These models are now on sale in the Corset Salon, Fourth Floor.

### The Essence of Tailoring

We realize that the garments of the best-dressed women are suggested—not obtruded—and on that basis we fit our garments to the woman and not the woman to her clothes.

—It's this that makes for the essence of tailoring—that marks the line between the master tailor and the one who turns out his product by rule.
