### SCHOOL WORK AIDED

Churchill Sends Out Booklet on Parent-Teacher Clubs.

### INTEREST TO BE AROUSED

State Superintendent Proposes That Homes and Public Schools Shall Become Closer Related—Aims and Objects Outlined.

SALEM, Or., Jan. 10.—(Special.)—That more interest may be taken in parent-teacher associations, Superintendent of Public Instruction Churchill is mailing pamphlets giving suggestions to all parts of the state. Mr. Churchill said today that the objects of the organizations were to bring into closer relationship the schools and the homes, to improve the standard of living, to obtain better roads and better sanitation and to help the teachers and children in many ways.

"It is the purpose," says the pamphlet, "to give every parent in the district an opportunity to know what the school is endeavoring to accomplish, what it might be able to accomplish if it were using all its resources, and to find out what these resources are."

"The teacher is of first importance, so always secure the best man or woman possible. Then ask the questions: Is our school sanitary? Has it modern conveniences? Are all the roads and paths leading to it in good condition? Are all the children in the district able to attend school? Has our school playgrounds, and are they being used in the most helpful way? Are we taking advantage of the free extension course lectures offered by the State University and Agricultural Colleges?"

"Do we mothers take opportunity to confer together regarding the most important of all problems—how best to fit our boys and girls for manhood and womanhood? These and many other questions are being considered by the Parent-Teacher Associations all over the state, and the entire United States. Organize at once, see that your child joins the state association and the Oregon Congress of Mothers and Parent-Teacher associations will help you by advice, programmes and loan papers."

"For literature or help in organizing, address Parent Educational Bureau, Courthouse, rooms 550-552, Portland, Or."

"With the co-operation of the teacher call a meeting of mothers at some convenient time in the schoolhouse, or an evening meeting for fathers, too. A brief programme of music, or some ex-

### APPLE MEN PROFIT

Eugene Growers Double Their Capital Stock.

### MANAGER'S PAY INCREASED

"We Have Succeeded Because We Have Pulled Together," Says President McCormack—Members Receive \$100,000.

EUGENE, Or., Jan. 10.—(Special.)—Upon a showing that the business of the Eugene Fruit Growers' Association had more than doubled in the past year, the stockholders at their annual meeting today voted unanimously to increase the capital from \$25,000 to \$50,000 and it is proposed to spend between \$10,000 and \$15,000 in additional buildings before the canning season of 14.

Directors were elected as follows: H. F. McCormack, F. B. Chase, George A. Rorris, F. W. Miller, F. B. Harlow, M. A. Harlow, J. Beebe, J. O. Holt, John Thramer.

Subsequently the directors met and elected officers as follows: H. F. McCormack, president; M. H. Harlow, vice-president; J. O. Holt, secretary; First National Bank, treasurer; J. O. Holt, manager. The salary of the manager was raised to \$2000 a year.

President H. F. McCormack, in his report to the association, announced that shares in the association might be procured by contracting to deliver fruit or vegetables to the cannery should any wish to invest in the stock and not have the ready cash.

"We have succeeded," said Mr. McCormack, "because we have all pulled together. Members of the board of directors have shown a remarkably harmonious spirit, and this has enabled us to pay to our members over \$100,000 even in these times of money tightness. There may be breakers ahead; a crop may fall or there may be a slump in the market, but this will not be serious if we hang together."

Manager Holt while making his report, advised every cherry grower to get rid of their black Republican trees as a commercial proposition, because these cherries are too small to can and to sell readily. The Bings will better fill the demand for a canned black cherry.

Red raspberries and pears were the largest crops handled compared to the average yearly output.

Box Output Increased.

HOOD RIVER, Or., Jan. 10.—(Spe-

### COLFAX CASE IS DELAYED

Action on Restraining Order Against City Officials Due Wednesday.

### EGG TAKE IS LARGE

Salmon Spawn Collection Is Big Success This Season.

### FACILITIES ARE BETTERED

Total Gathering at Clackamas and Sub Stations Will Run \$2,000,000—Hatchery and Pond Improvements Are Under Way.

OREGON CITY, Or., Jan. 10.—(Special.)—The past six months have been some of the most successful for egg collecting in the United States. Bureau of Fisheries has ever had in this section of the country. To date, the total collections of Clackamas and its sub-stations run over \$2,000,000, with egg collecting still continuing for silver salmon at many of the field stations. The egg take is distributed as follows:

- Clackamas station, chinook salmon 987,200
- Upper Clackamas station, silver salmon 585,000
- Little White Salmon station, chinook salmon 34,183,000
- Big White Salmon station, chinook salmon 10,046,700
- Rogue River station, chinook salmon 3,323,000
- Applegate Creek station, chinook salmon 200,000
- Hilina River station, chinook salmon 1,061,000
- Silver salmon 1,200,000
- Lower Rogue River station, silver salmon 6,300,000

Total egg take, \$2,155,800

The Bureau has long felt that the capacity of many of its stations is inadequate for handling its large annual egg take, and for many years it has been the custom to turn over its surplus egg take to the state authorities to be hatched and liberated, but at present the department is taking steps adequately to care for all of its collections.

At the present time a large flume is being constructed, 5000 feet long, three feet wide, two feet deep, with a 15-foot fall in the distance at Little White Salmon station, which will give that station one of the largest and best water supplies of any salmon hatchery in the Northwest; also, an efficient pond system is being worked out for the feeding and rearing of young salmon.

Extensive improvements have been made at the other stations along the same line.

During the present season, to relieve the congested condition of the Clackamas hatchery, 4,337,000 chinook salmon eggs were shipped to Seufert Bros' cannery, Seufert, Or., and a battery of 50 troughs constructed at Fifteen-mile Creek, the eggs hatched

### EX-PRESIDENT ROOSEVELT

Purchased the Evinrude

The Evinrude Detachable Rowboat Motor was purchased by Colonel Roosevelt for use on his South American trip. The engineers of ten governments have officially pronounced the Evinrude the finest motor of its kind in the world.

They have been adopted by Sweden, Denmark, Russia, Holland and U. S. government.

4000 Evinrudes are used in the fishing fleets of Scandinavia alone. It can be carried by hand, and clamps to any rowboat. It has wonderful power and will tow several boats filled with passengers. When clamped to a 14-foot boat or canoe it gives remarkable speed, and will handle a boat in strong tides and swift currents. The cost of the Evinrude Motor is so small that most everyone can afford to own a motorboat. It is being shown in operation daily by F. G. Epton, fac. rep., at 108 4th st. Men in every town are wanted to sell it. Free catalogs and particulars mailed on request.—Adv.

### EYEGASSES NOT NECESSARY

Eyeight Can Be Strengthened, and Most Forms of Diseased Eyes Successfully Treated Without Cutting or Drugging.

"That the eyes can be strengthened so that eyeglasses can be dispensed with in many cases has been proved beyond a doubt by the testimony of hundreds of people who have had their eyesight restored by that wonderful little instrument called 'Actina.' 'Actina' also relieves sore and Granulated Lids as ever it was."

Mr. David Tuttle, Glen Ellyn, Ill., writes: "I sent for your 'Actina' and when it came away and gave the 'Actina' a fair show, I did so, following directions, and soon my eyes were getting in normal condition again and now I can say my eyesight is as good as ever, and my headaches, practically vanished."

Mr. E. M. Detrick, 7124 Idlewild street, E. E. Pittsburg, Pa., writes: "My eyes were very weak, and my vision was so bad that I could recognize people only at short distance. Since using 'Actina' I have discarded my glasses, my headaches are gone, and my vision, I believe, is as good as ever it was."

Mr. J. H. Frankensfield, 522 E. 26th street, Chicago, Ill., writes: "I am proud to say that I am not wearing my glasses at all. As for my cataract, it is almost gone and I have been troubled with it for more than sixteen years."

"A great number of my railroad friends are buying 'Actina,' as you know by the orders I have received. 'Actina' is given in every case. Send for our FREE TRIAL offer and valuable FREE BOOK. Address Actina Application, Dept. 23 N. 811 Walnut St., Kansas City, Mo., Adv."
