END OF HOME RULE FIGHT IS HOPED FOR

Settlement Expected by Average Parliament Member; . Methods Cause Strife.

IRISH VOLUNTEERS DRILL

Nationalists Refuse to Make More Concessions to Ulsterites-Irish Members Say They Have Gone as Far as Possible.

DUBLIN, May 9 .- (Special.) -- Nationalist members of Parliament, who have returned to London after the recess, reiterate the impossibility of making any further concessions to the Ulster-ites, and declare that their constitu-ents could only be induced to agree to optiontal exclusion for Ulster on the understanding that the arrangement is to terminate in six years' time. From all accounts the Nationalist

members are having a good deal of trouble with public opinion in Ireland at present. Those who are back record their astonishment at the passionate depth of the home rule feeling, which recent concessions have called forth. In many districts the Irish volunteer movement is attracting numerous re-cruits, in spite of the fact that the Na-tionalist party has never lent support

The drilling and the route-marching of the Irish volunteers have received a fresh impetus lately, as if in answer to the challenge that the desire for home rule is less active, and preparations are going on behind the scenes to offer a passive resistance to the present form of government in Ireland, should any disaster overtake the home rule bill. The idea is to follow the precedents set by the Ulster Coventers, and those

set by the Ulster Coventers, and those who are organizing the volunteer movement declare that a force of 250,000 men, many of them ex-soldlers, could easily be raised. At all events the Gaelle League and other powerful organizations, which are at present leaving affairs to Mr. Redmond, will give their support to the Irish volunteers and the new national movement which would spring up in the avent of home would spring up in the event of home rule being defeated or postponed.

Opposition to Settlement Plans. The average M. P. clings to the belief that a settlement will be reached. The opposition seems divided into two camps. Those who are anxious to reach settlement advocate a federal solu-on as a way out, and are prepared to in with Liberal Federalists in urging

clare that there could be no question of driving Ulster into a constitution which she disliked. They maintain that which she disliked. They maintain that if this passage represents the view of the cabinet, only a hair's-breadth divides the two parties, and that the government must at any rate give "Ulster" the right of an appeal to the Imperial Parliament against inclusion at the end of the time limit.

The right of an appeal is, they declare, inherent in Mr. Birrell's words, and as it does not amount to an in-

clare, inherent in Mr. Birrell's words, and as it does not amount to an indersement of the principle of permanent exclusion, it could, it is suggested, be accepted by the Liberal party and the Nationalists. On this point, however, Nationalist opinion admits of ne subtle distinctions.

Right of Appeal Is Stumbling Block. The Irish members declare that they have gone as far as they can or dare go, and that the right of an appeal in six years' time would give a minority in Ireland the right to veto national unity, indefinitely and perhaps per-manently, and would keep open all the religious and racial differ-

on this electionsering cry the Die-Hards believe they can win. Their ob-ject, then, is to get a dissolution of Parliament as soon as possible, and hence all the talk in their press about an election in June. The government is to be forced to pass the bill as it stands, and then the Ulster volunteers are to be mobilized, and the Die-Hards believe the government will then be

This, then, is the situation. In spite of a general desire for a settlement, a comparatively small but powerful group on the Tory side are working

group on the Tory side are working against any compromise. Will they succeed?

The answer to a large extent depends on Sir Edward Carson. He spoke the other day of his detestation of using Ulster as a pawn in the party-game. Is he still willing to lend it to the Die-Hards for their last desperate assault on the Parliament act, an assault which will again combine the democratic forces on a still more important issue than that of the budget of 1909? These are some of the questions which members who note present phases at Westminster are asking, and they look forward with some impatience to the denouement a few weeks hence.

Voinnteers Have Big Parade in Dublin.

Voinnteers Have Big Parade in Dublin.

There was a big parade of Irish votunteers in Dublin a few nights ago.

For some time past drilling on a large scale has been carried on in drill halls in the city and the suburbs. The total strength of the force in the city cannot be estimated with accuracy, as the organizers have not published any statistics, but it must be considerable.

On the night referred to there was a muster of nearly all the city companies. They assembled at their own drill halls, and marched after a time to Rutland square, where several other companies had assembled. Here the whole body was put through drill, after which all the companies marched through Sackville street to College Voinnteers Have Big Parade in Dublin.

The appearance of such a large body of men in the streets caused some surprise. The volunteers, who for the most part were well dressed marched in silence, and gave evidence of having been well drilled. On arriving at the Bank of Ireland the parade was dismissed, after which the different companies returned to their own drill halls. A telegram from Athlone states that the police in the town have been directed to practice one hour's military drill in the future. Inquiries at Dublin Castle go to show that nothing of the matter is known at the constabulary headquarters there. In any case, it is with this man, and not with Sir Edheadquarters there. In any case, it is with this man, and not with Sir Eddifficult to say what is meant by "military drill," as the constabulary for a long time have been practing in almost every form of drill known to the army.

But for all that the Marquis of

PALACE OF GOLD DESCRIBED BY FRENCH LECTURER

Plates of Precious Metals, Beautiful Inner Lake Were Some of Its Features.

ROME, May 16.—An interesting de-scription of the wonderful "House of Gold," which Nero built between the Palatine and Esquiline hills in Rome, has been given by M. Prechat in a lec-

ture.
This mighty palace, covered with plates of gold enriched with ivory and adorned with a multitude of beautiful statues, covered an area equivalent to the Champs Elysees and the Place de la Concorde, said the lecturer. The Emperor conceived the idea after reading of the control of manently, and would keep open all the present religious and racial differences. They are as much opposed to the right of appeal as to Sir Edward Carson's plan that "Uister" should not be included until the Imperial Parlisment decrees.

The Die-Hards in the Tory camp, who now look to Mr. Balfour to wreck home rule altogether, of course lay stress on the apparent deadlock to which every suggestion for appeasing Ulster and satisfying the Nationalists at the same time leads. Nothing pleases them better than to see all parties at loggerheads, and they count on the government being unable to pass home rule, or at least to make it operative, in face of the resistance of Ulster. They openly proclaim that the army will never consent to "be used" by a Liberal government for the coercion of Ulster.

"Will you lend the British army to John Redmond to coerce Ulster," is the crystal of the British covenant, and on this electionsering cry the Die-Hards believe they can win. Their ob-Hards believe they can win. Their ob-

Noted American Painter Gives Montana as Habitat.

ETHEL HAYS MODERN NAME

Woman," the Masterpiece of Which Hamilton Wolf Has Dreamed, Now Is Being Put on Canvas for Paris Salon Exhibit.

Wolf Realizes His Dream.

That is how she became acquainted with Hamilton Wolf, how she became with Hamilton Wolf, how she became
his pupil, and later his model.

Like other artists, Wolf long had
cherished an ambition to find and paint
the perfect woman. It was to be his
masterpiece, and for this canvas, the
supreme effort of his life, only one
whose lines were perfect according to
the Greek standards could be considered. She must posses the recutsives

the committee. She must possess the requisites which made the women of ancient Greece the most beautiful of all time. Where was she to be found? He searched everywhere—but in vain. He began to lose faith in American appreciation of beauty, and after months of futile hunting he stormed and swore by the gods of an art dragged from its pedestal by a money-hungry nation that there was no such thing in America as a perfect woman.

that there was no such thing in America as a perfect woman.

Then, one day, she came, the long-sought subject for the one great effort which was to portray on canvas, instead of in plaster or bronze, what Michael Angelo portrayed in plaster. His nerves relaxed, his soul found peace. He settled down to the long grind, and in a few weeks or months, according to his temperament and physical power permit, she—"Woman"

physical power permit, she—"Woman"
—will be on her way to Paris. —will be on her way to Paris.

"I hope to paint a picture which, before it is sent to the salon, will make our naturally beauty loving people realize how far from the great ideals of the masters they have strayed," says the sanguine artist. "I have drawn Miss Hays from every angle in merciess black and white—and she stands the test."

But Miss Hays herself takes her beauty less seriously than Wolf, and

beauty less seriously than Wolf, and seems to regard the fact that she is halled as the one perfect woman of less consequence than her work and progress in her chosen field. She also objects, and seriously, to being claimed as a Los Angeles girl, and when re-porters interview her she is very care-ful to impress upon them the fact that Montana is her home state and Rillings her home city.

Model Also an Artist. So far as her work goes, Wolf him-self admits that she possesses the requisites of the great artist. Quickly eclipsing her fellow workers in the studio of the eccentric illustrator and believe the government will then be go, ulers and burns was advocated by Dr. Barthe before the Academy of as Mr. Balfour said the other day, they believe that a liberal government will all before a difficult executive question of this kind.

In bringing the constituencies in bringing the constituencies in bringing the constituencies of the working many the positive points to a frantic at the constituencies of the working many the positive points of the working and the constituencies of the working many the positive points of the working many the positive points of the working and the constituencies in bringing the old guard for an attack on the government of the working many that the constituencies in bringing the old guard for an attack on the government of the working many that the constituencies in bringing the old guard for an attack on the government of the working many that the constituencies in bringing the old guard for an attack on the government of the working many that the constituencies in bringing the old guard for an attack on the government of the working many that the constituencies in bringing the old guard for an attack on the government of the working many that the constituencies in bringing the old guard for an attack of the point of the point of the

ing infinite pains, which Carlyle says is genius. She can sketch for hours in a dusty studio, depicting the streams and hills of nature's great outdoors; she can trace with wonder-ful exactness the lines of the human body and can turn from that to evolve a cartoon possessing an instantaneous

"Wonwin," with which Wolf hopes to capture Le Grand Prix at the Paris salon, will represent the utmost in femininity, according to its creator. Although idealistic in every line, it will but portray the perfection of Miss

will but portray the perfection of Miss Hays.

"Miss Hays' body is almost inconceivably perfect in construction," says Wolf. "It is just eight times the height of her head, her closely and delicately modeled ears are exactly even with the top and bottom of her nose, her neck is just the right proportion—every feature is in perfect. portion—every feature is in perfect harmony. Look at the space between her eyes—equal to the breadth of one

The parachute, of course, is only in-tended for use in case of fire or the breaking of the machine. Both con-tingencies can, however, be entirely prevented by safeguards and sound con the committee

An even greater number of automatic stabilizers are in the list. The objections against all stabilizers are that they are a complication; that they are of no value in rough air, close to the ground, for they cannot always operate in time. ate in time to prevent a bad smash in landing; and that, if the mechanism gives out, the pilot is in a bad way, because he has not the skill of the pilot who files without such aids.

Stabilizers, therefore, are of value only for easing the labor of piloting, they fail to solve the problem of se-

only for easing the labor of piloting, they fail to solve the problem of security.

Many "naturally stable" machines are entered. These differ from the others, in that the form and arrangement of the planes kept the machine on a level keel without the aid of any mechanical operation. They are open to the same objections, however, save that they are not subject to failure through getting out of gear.

So far as authorities are in favor of the stabilized machine, the weight of opinion is on the side of natural stability and against mechanical.

bility and against mechanical.

The only British design in the competition is the Dunne naturally stable biplane entered by the French licensees. Interesting entries are the Schmidt biplane having wings of which the angle can be varied during flight, a machine responsible for a series of height records with heavy loads, and whose "safety" lies in being flyable whose "safety" lies in being flyable at very low speed for landing. There also are a gyropher, not an aeroplane at all, but a machine with rotating wings, and a balloon aeroplane combination.

Men's collars manufactured in England every year number about 20,000,000.
