No Other Brass Bed in the World Will Undergo This Kind of Test

A sale of the famous Hicksite Lacquer Brass Beds that will prove the greatest bed-selling occasion the Portland buying public ever witnessed and an event that will introduce one of the most wonderful chemical discoveries in a new bed lacquer that has ever been known. By very special arrangement with the Pittsburg Hickson Company, manufacturers of the Hicksite Lacquer Brass Beds, we are enabled to hold this great brass bed sale for one week, and we will sell these splendid beds at a price much below their regular worth. Every woman who has occasion to buy a bed knows that many of the so-called "brass" beds are merely plated and a great number of the "real" brass beds are only finished with an ordinary shellac lacquer, which is easily affected by perspiration from the hands, fly specks, ammonia, soap and water, moisture, salt air, gas or coal fumes, or any kind of ordinary cleaner—in fact, as weak a solution as 6 per cent ammonia would immediately tarnish such beds. Not so, however, with the wonderful Hicksite Lacquer which is used exclusively on all beds made by the Pittsburg Hickson Company, and for which Powers are exclusive selling agents in Portland. Hicksite Lacquer Brass Beds will endure a test of 28 per cent ammonia—an exceedingly strong solution which would immediately blacken any other brass bed on the market. You can wash Hicksite Lacquer Brass Beds with soap and water, ammonia, wood alcohol, salt solution, any kind of acid, alkali cleaners or furniture polish without even the slightest bad effect.

A Five-Year Guarantee Bond against tarnishing with each bed backed fully by an insurance company that is licensed by the United States Government as sole surety in Government Bonds

This is one of the best opportunities of your entire life to secure so wonderful a bed value at so small a price. Read the following special bargains for this extraordinary bed sale:
