Repetition of Catastrophe of February, When 40 Students Failed, Is Not Unlikely as Result of Inquisition This Week.

UNIVERSITY OF OREGON, Eugene, June 6 .- (Special.) -One week of final examinations, followed by four days of commencement festivities, and the present collegiate year at the Unipersity of Oregon will have passed into the category of things that were. College proper closed yesterday, when the last regular classes were held. A repetition of the catastrophe of last February, when almost 40 students were given their "walking papers" in consideration of their failure to pass the required number of hours, is deemed not unlikely. The members of the faculty have reaffirmed their intention of continuing to raise the standard of scholarship at any cost, and heretofore the slaughter has aland heretofore the slaughter has al-ways been greater at the end of the second semester than after the mid-Year weeding out. Nevertheless, the students are taking a hopeful view of the future, and are putting in much time and energy into preparations for the examinations

OREGON DIOCESE PROFITS

WASHOUGAL, Or., June 6,— (Special.)—William Wood; of this place appears to have made a valuable discovery with regard to the cause of the brown rot, which is the terror of orchardists. Mr. Wood closely examined many trees, which were beginning to show indications of the rot, and after careful search discovered that in every case a small worm, either the "twig borer" or a worm closely allied to it, had punctured the twigs. The leaves then began to wither and the prunes to shrivel. These formed material for nests for propagation of the species.

The prunes thus killed began to mould or to show symptoms of the brown rot. Mr. Wood believes an arsenic spray should be used as soon as the bloom drops, and the sulphur spray for the fungus applied afterward.
