PROHIBITION VOTE IS CHAMBER PLAN Hotel and Hopmen Canvass Membership to Influence Ballot for Negative. "DRY" OPPOSITION VOICED Abolition of Liquor Declared to Have Proved Failure in Every State Where It Was Tried Because of Higher Taxes. Representative business men of Portland will vote on the subject of statewide prohibition, beginning Monday, when ballots will be mailed out to every member of the Portland Chamber of Commerce. The Chamber itself remains neutral on the question, and the vote of its members will represent simply their opinion as business men and not any official position taken by the Chamber as an organization. The membership of the Chamber is more than 1900 business firms. The ballot they take will be secret. The plan was suggested by the action of the members of the San Francisco Chamber of Commerce, who voted on the subject of statewide prohibition on May 6. The result of the vote in that city was 1187 to 41 against prohibition. The Oregon State Association, which has been prominent in campaigns of all previous years in Oregon; the Hop Growers and Dealers' Association of Oregon; and the Wholesale Liquor Dealers' Association requested the vote for the purpose of ascertaining the attitude of the business men on the subject. All three organizations have circulated the members of the Chamber asking them to participate in the ballot. Hotelmen Urge Negative. M. C. Dickinson, president of the Hotel Association, yesterday sent out to the business men, the following letter on the subject: "Our attention has been called to the fact that the Chamber of Commerce, of which you are a member, is about to take a vote on the question of statewide prohibition. We understand it is to be a secret ballot, the individual preference of members to be held in strict confidence by the secretary, who will canvass the returns and make public only the result. "Our organization is vitally interested in this question and we feel that we would be false to our trust if we failed to impress upon you the serious injury that would result to the hotel industry of Portland should statewide prohibition carry, and to urge you to vote 'No' on this proposition. "Prohibition would impose a serious financial handicap on the larger hotels of this city and many of the smaller hotels would undoubtedly be driven out of business. "State-wide prohibition has proven a failure in every state where it has been tried. It is inevitably followed by decreased revenues and increased taxes. It is impossible of enforcement and no good purpose can be served by its adoption. "The letter of the Hop Growers and Dealers' Association, while sent independently of the other organizations interested, contains similar matter. It says: "Approximately \$6,000,000 is the annual income from the Oregon hop crop, \$3,000,000 of which is paid to labor. A considerable portion of this eventually finds its way to Portland. Oregon produces 50 per cent of the entire hop crop of the United States. "Thousands of acres now devoted to raising hops are not adapted to raising other crops, and if state-wide prohibition is adopted, this land, which now has an average value of \$100 an acre as hop land, will be reduced in value over 60 per cent."
