IN USE BY U. S. GOVERNMENT. IN USE BY 13 GREAT FOREIGN GOVERNMENTS. IN USE BY PACIFIC COAST LIGHTHOUSE STATIONS.

IN USE BY THEODORE ROOSEVELT ON SOUTH AMERICAN IN USE BY 4000 SCANDINAVIAN FISHERMEN.

In use by thousands of people because the price is so reasonable you can afford to own one. They are simple to operate, have remarkable power and speed. Will handle a large boat in strong tides and swift currents. The Evinrude can be carried by hand; costs nothing to install; doesn't use much gasoline; doesn't take up any room in the boat, as it clamps to stern of boat with two thumb screws. The Evinrude Motor is not a toy. The fact that fourteen governments are using them is convincing proof the Evinrude is one of the most wonderful engines of its kind in the world. Many former users of 4, 6 and 8-horsepower engines, costing \$300 to \$600, are now using an \$80 Evinrude Engine. We have over 100 Evinrude motors on display at west end of Morrison-st, bridge, the largest display of its kind in the West. We keep a boat on the river for demonstration purposes and will gladly show the Evinrude in operation on a boat

without obligating you to pay us a cent of money. We wish to warn the public against accepting inferior machines which are not "Evinrudes," but which are only makeshifts. The Evinrude has a waterproof magneto built within the flywheel. It is not stuck on the cylinder, where it would be in the way and subject to damage.
