National Manufacturers to Recommend Foreign Trade Body.

SHANGHAI, Sept. 26.—A commission representing the National Association of Manufacturers of the United States, which has been touring the world, makes it known here that it will recommend, upon its return to United States, the creation of a special foreign trade commission that will carry on the work initiated by the present tour. During the 19 years' existence of the association, there has been no investigation of the kind now being undertaken, and the commissioners declare that the value of the work demands its extension.

The commission is composed of two former presidents of the association, Captain David M. Parry, of Indianapolis, and John Kirby, Jr., of Dayton, O., with Dr. Albert A. Snowden, of New York, as the third member. They will include in their recommendations "the systematic advertising of manufactures of the United States in foreign markets, establishment of trade depots and exhibits, and the careful supervision of the field by a permanent foreign trade commission."

An engine has been invented which is driven by the vapor of heated mercury, which is condensed and used repeatedly, the heat given off by the condensation generating steam, which is used independently.
